Artist Statement

Teresa Miller

For me, graphic design it is all about exploring and being inspired by others as much as it is using my own imagination. My goal is to solve creative problems that have drawing as a base. This includes visual research as well as keeping a visual journal. I work with digital imagery, mix media, as well as found objects to create my graphics. Expression illustration done on a 2 dimensional surface and then collaged together with found or made objects has been an exploration I would like to continue discover and develop.
