## **Artist Statement**

### **Stephanie Luthye**

As a designer, I recognize that there are many different ways to convey a message. There is never one single right answer to a design problem and I love that. I strive to see the work of others and learn from what they do. For me personally, I have always enjoyed the idea of incorporating my own artwork into the designs I create. I love creating a painting and using it as the main illustration in my magazine spread or cutting up construction paper and using it as a book cover. I pride myself in my ability to see multiple avenues that a project could go and not subject it to immediate dismissal. I take inspiration from the world around me and attempt to incorporate it into my work. I acknowledge that I do not know everything and I am always willing to learn new skills to broaden my horizons.

# Art Animates

The visual arts and art history animate the lives of individuals and communities

The visual arts comprise the study of the variety of means of visually expressing human thoughts, interests, attitudes, emotions, and ideas. Artists use many different media such as oils, watercolors, acrylics, pastels, clay, plaster and computers. Visual artists create abstract works and images of objects, people, nature, typography and events. The Art Department offers several options of study. The B.F.A. (Bachelor of Fine Arts) degree in studio art and the B.A. (Bachelor of Arts) degree in art history, art education, or studio art are all professional degrees, leading to related art careers.
