

Vitamin  
Sea

## **Artist Statement**

### **Bayley Warren**

Ever since I was a child I have been a lover of the outdoors, from fishing and hiking, to road trips and camping. Through the past years I have also developed a love for technology and have worked on combining these two very prominent aspects of my life into one collective work. My inspirations come from calligraphers like Ian Bernard to photographers like Clark Little and Michael Block.

My work explores the duality of nature and technology and in the future I see myself continuing to find new ways to push that aspect.

	<u>Title</u>	<u>Media</u>	<u>Original Format</u>
<b>Figure 1:</b>	Carmen	Print	Illustrator, Drawing (22x30)
<b>Figure 2:</b>	Mars One	Print	Illustrator, InDesign (11x17)
<b>Figure 3:</b>	Colorado Discoveries	Print	Illustrator (4x5)
<b>Figure 4:</b>	Hills & Hops Website	Print	InDesign, Photography (11x8.5)
<b>Figure 5:</b>	Drifter Magazine	Print	InDesign, Photography (17x11)
<b>Figure 6:</b>	Protect Local	Print	Photography, InDesign (11x17)

## Earthlings With Dreams

By Bradley Scott

When it comes to picking a group of people to colonize a new planet, there has to be some qualifications and goals. It's not as simple as the people you want to pick or the planet you want to pick. It's a complex process. It's not just about the people, it's about the planet. It's about the future.

By 2030, the world's population is expected to reach 9 billion. That's a lot of people. It's a lot of people who are going to need a place to live. It's a lot of people who are going to need a place to work. It's a lot of people who are going to need a place to play.

My next idea is to build a group of people to colonize a new planet. It's a lot of people who are going to need a place to live. It's a lot of people who are going to need a place to work. It's a lot of people who are going to need a place to play.

# MARS ONE

## Our Journey to Mars by 2024

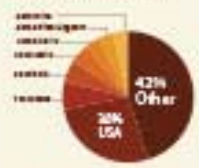

By Heley Warm

As the world continues to debate the idea of human exploration beyond our planet, the possibility of humans colonizing Mars remains in the news. It's a lot of people who are going to need a place to live. It's a lot of people who are going to need a place to work. It's a lot of people who are going to need a place to play.

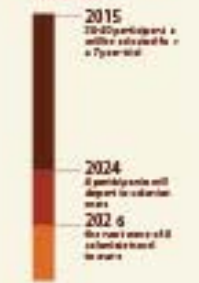

It's a lot of people who are going to need a place to live. It's a lot of people who are going to need a place to work. It's a lot of people who are going to need a place to play.

It's a lot of people who are going to need a place to live. It's a lot of people who are going to need a place to work. It's a lot of people who are going to need a place to play.
