EVAN EDWARDS.
At Denver, stopping at the Wentworth Hotel, a clean, nosey, quiet stopping place, presided over by my new host, Estes, an Englishman who pride himself on having worked up from almost nothing. This large establishment. I have generally slept here and have by a curious coincidence, been assigned to room 91. The plan a good room well furnished.

This past day of the year might have a longer and bitter record, but it was a stormy day, and snow fell most of time. With Rev. Hale, of the School of Mines, I called at the Republican Office, to correct some editorial misrepresentations as to the relations of the New College and the New College State college. Then, upon Stimson and Johnson, regents of the School of Mines. In afternoon called on Dr. Philander Wiley, 5-32, lived 01, and stayed a couple of hours, discussing Abenaki matter of rear Japanese relics, letters, boxes, pictures, at 01. R. W. at his wife lives alone in a couple of upper rooms, at coast and gun burner store. Very near college situated.

Wentworth, Denver.

The cold of yesterday continues. Made an indefinite effort at changing myself. Wonder why the urge I drop my rag. The other is grit, and the harder I pull. A letter for whom this morning, with newspaper greeting all well—I wish every evening.

At ten a.m. went to my way to St. James, where I was the officials called for in Rev. H. J. H llen. Pastor Andrew was there on account of storm or cold rather. Made a new departure.

Extemporizing on the old "Say and that the former days the, " I succeeded reasonably well. Have a mind to discard reading except in lecturing funds to lecture to the society only might need. Answer his must interview my soliloquy before I can announce subject. Went back to hotel after dinner with Mrs. Hillen. A long interview with Mrs. Hille. Came near preventing me from going to church. Went to Old Lawrence St. And Earl Cranston. Church crowded and very attentive.

Wendworth - Denver.

The winter still reigns; after breakfast called at the Alford Hotel, c.d. found them the following members of the State Board of Agriculture, Waters, Stratten, Sargent, Hanner, Horner, and Ryan. At 10 we went up to the Glen Avenue building, (State House) called upon the Governor, Sup. of Pub. Instruction, c.d. Sec. of State. There was only an informal meeting of the Board before dinner. At 2, a regular meeting was held in the Governor's private room. All present but Bracken. No very great amount of business was transacted. The committees and being eating ready to depart, Strange and Hanner having been elected to the Senate to resign their places in the Board, in consequence, Mr. County asks another member, and it will be Boyd.

Called with Ryan upon Judge Stone of the Supreme Court, an old acting schoolmate, found him grizzled and set in age, the much so. Worked in room (91.) his midnight with Comm. The (ninth) Army of chairman) a running law.

Austin’s Boulder.

Had a very good night rest, which I much needed, had a very medium breakfast, after which I called on Judge North, and Judge Chilton, whom we went in to his place somewhat in surprise. He fixed me and his coming, as usual, against my will, so I have not been able to his eye or care, or my visit. After dinner at Judge North’s I went back to hotel and found Prof. Blount but around and was not in. I then called on Dr. Sewall at the University, and spent an hour or two, and then upon my old Lewand friend, Captain Lowe, Austin. Having, Julia as I came, went in the house at one. The good old mother had been a few weeks before carried to her long home, honored and blessed, a loving character.

The Captain notion in his tight shoe consisted in waiting back with me to church a mile away on Sunday morning, and from her occurred I dismissed him.

Jan 16, SUNDAY

At home. Collins.

The mild weather of yesterday has turned cold and chilly with some snow falling on the foothills, sending us only a few mild flakes. Have been unexpectedly cold all day. Have been precious little of any thing but glances over some religious newspapers of the last, reading the last numbers of New Repository and Golden Hours.

Went to church this morning to hear a sermon by Rev. Allen. His nasal tones are more and more rasping, the more so I suspect he efforts them from an impression that they are effective. So soothing.

An expression in his sermon quite nearer to my orthodox ear. "From Christ he said, "succeeded grandly in his mission."

I can hardly define the feeling excited by this expression. I experienced something similar when I had a disagreement with a person in the Almighty for his knowledge of language. The same feeling that I had last night oppressed my mind and heart for most of the night. Alice heard Rev. O'Leary fish tonight.
At Home. Day opened with heavy snow - 5 or 6 inches. Pulling sleds out for news. Mr. Kenna Enright called for message who was not well enough to go with him to college. The 5th term of college, 1st term of second year opened with the following students: Akin, Brady, Carpenter, Carpenter Davis, Edward E., Enright, E., Peterson, W. Glenn, Hovse, Hires, Smith, Leonis, Leech, Markham, McAllister, Nicholas, Port, Sullivan, Thomas, Walters, T. Wilson, Wilson, S. L., Syn H.

Organized a sophomore class, 1st on the president's principal classes an zoology (agriculture) and the grammar Rhetorica of Latin (ex cathedra). No new tutor. Mr. Rice, present.

We again did not Nicholas see any N.E., upper room, of T. painter home and came for hours for his room. Akin came for a while. Mr. Rice 2.

Spent afternoon in college. Sold Rhetorica & Paris, 1st. Went to church 7 1/2. There were a proper meeting at a revival last by Rev. O. L. Fisher, after which 4 or 5 came forward. About 40 or so. Akin

received long letter from his man and his wife Wilson giving description of his town in Emanc.

at that time in a melting condition.

from Geo. Hogg.  A letter from
Dr. Craig, regarding how he to\r
had a fifteen page letter from
Mary Field, of Chicago - Mrs. Allen;

At Cape Cod and Michigan.

This evening Allen and I attended a lecture by Rev. B. L. Fisher, at M. S. Church. Subject: Books of Poetry. The best of them for a very good lecture. This is the last in the course. The course has not been a success in every respect. Andrews, rather small, Rev. Gillam had no audience and did not lecture. Rev. Allen is holding a series of meetings, with some little show of success.

In my old position I listen for my college alumna Mark, now Miss M. L. Petrie, MC, 10th Dir of Indiana. Club 7 53 in the ascendant.

The day very cool but bright, as what is called here. Paid for a ton of coal from Patterson at a boil of water. The water was clear, which is good. A man interviewed me about digging a well. He wants 125 a foot, and will walk it for that. Thinks 140 will reach water, and thinks also that the water will be too alkaline for printing purposes.

Spent afternoon at college painting, rubbing, and finishing raft. Glued some of my pictures with asphaltum, with good immediate effect.

Mail of leaded paper to fall. Sumner cd 4 express at Evansville to Mary Fields.

March 7th Wednesday

At home. Day spent painless but the snow is dazzling and there is mud beneath. This morning I had a vivid dream that has some psychological bearing. I got an alarm for 5 in the morning at which time I was too fast asleep as I remember dreaming; if dreams are consistent with sound sleep, a chain of events of some length led to the alarm. I was going to thought to a living state, and there found no one in considerable perplexity I turned around for a bell pull, and finding one at last, reached up and touched it. The moment of touching is the alarm went off and awoke me. It was not the sound of I was expecting and startled me in sort of slumber. I very was then presence in the dream, or was it still completed from the time I first heard the click of the alarm bell at my waking? Call for Mr and Mrs Avery. The letter prepares a music class.
Astronomical Phenomena

To the interested observer of the starry spheres, the latter part of the month of February and the beginning of March will this year afford an interesting and sublime view of the planetary bodies in their various aspects. If we turn for a moment to glance at the western sky soon after sunset we are at once impressed with the magnificence of the scene. Within a compass of a few degrees are presented before us the three most radiant members of our planetary group—Venus, Jupiter and Saturn; while a little higher up in the zodiac the invisible Neptune stands guard, and lower down just above the western horizon, the winged Mercury gradually shows his twinkling countenance. So that five of the seven contemporary members of our system are all in the same region of the heavens.

It will be interesting to observe the varying motions of their bodies. During winter months of last year Jupiter and Saturn were our evening stars, but were high overhead at this time in the evening. In January last they were to be seen slowly sinking to the west, while Venus at the same time were just coming into view. Those three planets then presented a straight line with Jupiter in the center. The motion of Venus is so much more rapid than that of either of the others that she soon overtakes them and passes above, and on February 25th the three planets will form a perfect equilateral triangle, whose sides are five degrees in length. After this the triangle is gradually altered as Venus moves eastward, until on March 1 it presents the form of a right-angled one, with Saturn occupying the position of the right angle.

This group is just below the head of Aries, and in the direction of a line drawn through the two principal stars of that constellation.

Venus is constantly growing more magnificent, and soon leaves Jupiter and Saturn far behind. Their brightness is slowly fading, and ere another month is passed they will have disappeared in the rays of the approaching Sun. Venus, however, continues to illuminate our sky until May 3, when she, too, is lost to view. Thus are the beautiful combinations broken up to make room for others, for endless variety is the most sublime charm of the grand science called astronomy.

Mercury reaches his greatest distance east of the sun on February 23, and becomes evening star. On that day he sets at 7:20 p. m., an hour and a half after the sun. So that while observing this beautiful triangle of Venus, Jupiter and Saturn above, we can cast our eyes toward the horizon and also steal a glimpse of this god of light.

To add to the charming scene, the young moon modestly places her slender crescent among the group. On March 3 she passes very near Venus, and north of latitude 46° north will occult that planet. This will be a beautiful phenomenon as Venus suddenly disappears on the dark edge of the moon. If the latitude of Cincinnati the planet touches the lower border of the moon as they are setting at 9:15 p. m.
