PERSONNEL & PERFORMANCES
for the
SIXTIETH CAMPAIGN

1964 - 1965

THIRD ANNUAL EDITION
presented by

The Sugar Press

THE MAGAZINE FOR GREAT WESTERNERS
Established 1917 • Vol. 48, No. 7 • September 1964

JAMES LYON, EDITOR
Operations

- Vice President Lloyd T. Jensen, who heads up factory operations at all locations, sits on the left with his assistant, Jack B. Powell. At the rear, from left, District Superintendents Harold D. Burk, Stephen L. Force, and Robert E. Munroe. Burk's district includes the four factories in Western Nebraska and at Billings and Lovell. Force, in a recent change of assignments, supervises the factories at Eaton, Greeley, Windsor, Loveland, Longmont, Brighton and Johnstown. Munroe, who was promoted to district superintendent in September, now supervises the factories at Ovid, Sterling, Fort Morgan, Fremont, Findlay and the distribution terminal in Chicago.

Campaign Command

Agriculture

- Vice President Fred G. Holmes, in charge of agricultural administration, sits on the left with P. B. Smith, development director. At the rear, from left, District Managers Lyman H. Andrews, John D. Edmiston, and Davis L. Sunderland. Andrews, who observes his 45th campaign this October, oversees crop activities in all of the factory districts in Northern Colorado. Edmiston supervises the districts in Western Nebraska and at Billings, Lovell and Wheatland. Sunderland, located at Fremont, handles the subsidiary Northern Ohio Sugar Company crop in the Fremont and Findlay districts.

Engineering

- Chief Engineer Charles E. Hirsch, in charge of all engineering and construction projects, appears at the rear with the three district engineers, from left, Harry J. Ward, Clair H. Iverson, and Patrick R. Pumphrey. Ward supervises engineering for the factories at Brighton, Ovid, Sterling and Fort Morgan. Iverson's district includes the factories at Eaton, Greeley, Windsor, Loveland, Longmont and Johnstown. Pumphrey, located at Scottsbluff, supervises engineering at the factories at Scottsbluff, Gering, Bayard, Mitchell, Billings and Lovell. (Traveling Engineer A. Wayne Argabrite handles engineering assignments at Fremont, Findlay and the Chicago Terminal.)
Appointments & Advancements

• Joseph R. Booth, now recovered from illness, has assumed the position of cashier at the Johnstown factories. Booth succeeds H. R. Koenig, who retired.

Booth was to take up the appointment on June 1, but was stricken before that time. He was assistant cashier at Johnstown for the previous 11 years. He joined Great Western at Billings in 1952 and worked briefly at the General Office in Denver in 1953 before he moved to Johnstown.

A native of Montana, Booth was born in Billings and graduated from high school in Anaconda.

• Donald E. Ebner has been appointed to the new Operating Department position of package control and development supervisor. Ebner joined Great Western on Sept. 1 with a broad background in packaging operations and sales work in the food industry.

Most recently, Ebner was a plant superintendent in Chicago for the Continental Coffee Co., where he worked for 10 years. He previously worked with a ceramic printing firm and served three years in the Navy, including action in the Pacific in the Marianas.

• Robert E. Vandell, mechanical designer at Scottsbluff, has been promoted to traveling engineer at the General Office. He will serve the factories at Brighton, Ovid, Sterling and Fort Morgan.

Vandell joined GW in 1958 after his graduation from the University of Nebraska. A native of Mitchell, he attended high school there and served three years in the Army. His father, Earl Vandell, now retired from the Postal Dept., was once a sugar boiler at Mitchell.

• Robert N. Gwin, assistant superintendent at Bayard, has been advanced in the same job to Scottsbluff. He replaces the late L. L. Enwall (see Page 31).

Gwin was at Bayard for three years and previously was an assistant at Eaton for two years. His earlier service was at Longmont, his native town, where he became an end foreman in 1952. Gwin joined GW in 1947, but worked campaigns as early as 1942 before he left to serve in the Army. He is the son of Jim Gwin, who retired as an end foreman at Longmont.

* 1800 tons for first period for break-in of new carbonation and filtration stations.
† 2800 tons for first period for break-in of new sugar end.

Increases in standards total 935 tons daily capacity—or about equal to the slicing of one shift at a factory the size of Fort Morgan.
The new bulk sugar storage bins at Eaton rise like a skyscraper over the downtown area in this view from First Street. The white cluster of "tall-boys," like others built in recent years, hold up to 300,000 hundredweight bags of sugar. At right, on the opposite page, the Eaton bins loom over the mill in a view from the southeast looking over a field of sugar beets.

Slicing Standard for 1964-65:
- 1850 tons per day—up 75 tons—
  with a twin-scroll diffuser

Record Campaign Slicing Average:
- 2174 tons per day in 1963-64
  (122.5% above 1775-ton standard)

Record Slicing Rate for One Day:
- 2445 tons on Nov. 6, 1963
  (138.3% above 1775-ton standard)

Record Sugar Beet Yield:
- 20.33 tons per acre in 1963

Pennant Winner:
Campaign of 1937-38

Safety Award Winner: Year of 1960
Slicing Standard for 1964-65:
- 1850 tons per day—up 100 tons—with a twin-scroll diffuser
- 1800 tons for first period only for break-in of new carbonation and filtration stations

Record Campaign Slicing Average:
- 2084 tons per day in 1963-64 (119.5% above 1750-ton standard)

Record Slicing Rate for One Day:
- 2345 tons on Dec. 5, 1963 (134.0% above 1750-ton standard)

Record Sugar Beet Yield:
- 19.28 tons per acre in 1952

Slicing Standard for 1964-65:
• 1850 tons per day—up 100 tons—
  with a twin-scroll diffuser

Record Campaign Slicing Average:
• 2186 tons per day in 1963-64
  (125.3% above 1750-ton standard;
  highest percentage campaign
  slicing average in GW history)

Record Slicing Rate for One Day:
• 2480 tons on Jan. 2, 1964
  (141.7% above 1750-ton standard
  third highest rate in GW history)

Record Sugar Beet Yield:
• 19.49 tons per acre in 1963

Pennant Winner: Campaigns of
1927-28, 1929-30, 1936-37, 1942-43,
1943-44, 1944-45, and 1945-46
(record number in Pennant contest)
Safety Award Winner: 1953 and 1954
Slicing Standard for 1964-65:
- 3025 tons per day—unchanged—with continuous tray diffuser

Record Campaign Slicing Average:
- 3519 tons per day in 1963-64
  (116.3% above 3025-ton standard)

Record Slicing Rate for One Day:
- 3809 tons on Oct. 31, 1963
  (125.9% above 3025-ton standard)

Record Sugar Beet Yield:
- 19.93 tons per acre in 1963

Slicing Standard for 1964-65:
- 2400 tons per day—up 100 tons—with a twin-scroll diffuser

Record Campaign Slicing Average:
- 2816 tons per day in 1963-64
  (122.4% above 2300-ton standard)

Record Slicing Rate for One Day:
- 3234 tons on Nov. 9, 1963
  (140.6% above 2300-ton standard)
The GW record percentage rate of 147.3% was set by Ovid on Oct. 28, 1961, with 3020 tons sliced above a standard of 2050 tons.

Record Sugar Beet Yield:
- 19.97 tons per acre in 1963

Pennant Winner: Campaign of 1941-42

Sterling

Slicing Standard for 1964-65:
• 1950 tons per day—up 100 tons—with a twin-scroll diffuser

Record Campaign Slicing Average:
• 2259 tons per day in 1963-64 (122.1% above 1850-ton standard)

Record Slicing Rate for One Day:
• 2578 tons on Nov. 7, 1963 (139.3% above 1850-ton standard)

Record Sugar Beet Yield:
• 18.27 tons per acre in 1963

Pennant Winner:
Campaigns of 1962-63 and 1963-64
Slicing Standard for 1964-65:
• 2900 tons per day—up 400 tons—with continuous tray diffuser;
  2800 tons for first period only for break-in of new sugar end.

Record Campaign Slicing Average:
• 2932 tons per day in 1963-64
  (117.3% above 2500-ton standard)

Record Slicing Rate for One Day:
• 3409 tons on Oct. 31, 1963
  (136.3% above 2500-ton standard)

Record Sugar Beet Yield:
• 19.02 tons per acre in 1960

Pennant Winner: Campaigns of
1923-24, 1924-25, 1930-31,
1931-32 (tie), 1950-51, 1957-58
(Also finished in second place in
Impressive Improvements

• Fort Morgan's expanded sugarland appears from the outside here with the addition of two new bays to the right of the crane's cable. The 35-foot extension to the main building houses one new pan, one new crystallizer, a modern automatic centrifugal station, plus other equipment. As a result of the expansion, Morgan's slicing standard was raised from 2500 to 2900 tons of beets per day, the largest increase of any house in the history of the modernization program.

• Loveland's gleaming centrifugal station with Assistant Master Mechanic Alex Fritscher at left and Chief Electrician King Minnick. One new automatic machine was added to the Loveland line this summer, while either automatic or continuous machines, or both, were also installed at Fort Morgan, Scottsbluff, Billings, Brighton and Mitchell.

• Sterling's new gas-fired boilerhouse, above, was fabricated by Union Iron Works and erected by the crew. This view shows the pressure reducing fittings overhead, leading to the gas manifold and the burners at the front of the furnace. The modern unit evaporates 50,000 pounds of steam per hour; it is designed for high pressure operation at 460 PSIG, but will be used at 160 pounds until such time that other high pressure equipment can be installed. The new boiler, with oil standby, replaces five older and smaller units.

• Longmont's new twin-scroll automatic diffuser, with Master Mechanic Charlie Kupish on the catwalk, replaced a troublesome continuous scroll type model. It was the 15th twin-scroll unit installed by Great Western in the last nine years, leaving only Fort Morgan and Loveland with continuous diffusers of the tray type.

• And here is Longmont's "aqueduct," an open belt conveyor for carrying the pulp from the diffuser in the main house over the trestle to the dryer building in the background above. It replaces an underground pipe system with water pressure for moving the pulp and helps to eliminate formation of lactic acid in the diffuser.
Slicing Standard for 1964-65:
- 3145 tons per day—unchanged—with a twin-scroll diffuser

Record Campaign Slicing Average:
- 3468 tons per day in 1961-62 (110.3% above 3145-ton standard)

Record Slicing Rate for One Day:
- 3975 tons on Nov. 26, 1961 (126.3% above 3145-ton standard)

Record Sugar Beet Yield:
- 21.73 tons per acre in 1963 (highest tonnage average for any factory district in Great Western history)

Offices at the Sugar Building in Denver.

Yards and shops at Loveland sugar factory; principal stations at Loveland, Johnstown, Windsor, Eaton, Milliken, and Longmont.
The Bayard factory takes on an entirely new appearance with the erection of bulk sugar storage bins for holding up to 300,000 hundredweight bags of sugar. The Bayard bins, with their cap of "GW," dominate the horizon for miles along the scenic North Platte River in Western Nebraska. They rise about 185 feet like the other "tall-boy" bins built in recent years.

Death Takes Les Enwall, Scottsbluff Assistant

Death has taken Lester L. Enwall, assistant superintendent at Scottsbluff and a familiar figure among Great Westerners. Les died on Aug. 31 of injuries suffered in a fall at his home. His age was 47. Les was a brother of Asst. Supt. Ivan E. Enwall of Billings. His wife, Frances, served in campaign capacities in recent years at Scottsbluff, Eaton and Fort Morgan. Other survivors include his two daughters, Linda, a sophomore at Scottsbluff Junior College, and Nancy, a high school student.

Before moving to Scottsbluff in 1961, Les was an assistant at Gering for two years and at Eaton for two years. Earlier, from 1950 to 1957, he was at Fort Morgan where he was warehouse foreman, sugar boiler and then an end foreman. In 1955, he also served briefly in Northern Ohio.

While in the foremen's group, Les was secretary-treasurer and then president of the Union Inter-Factory Council. Les began his career at Brighton in 1946 as superintendent's clerk.

Born in Mason City, Neb., and raised in Ovid, where he was graduated from high school, Les first worked in Civil Service at Littleton, Colo. During World War II, he served at the Army and became a first lieutenant.

On behalf of his wide circle of friends throughout the Company, The Sugar Press extends sincere sympathies to Fran, Linda, Nancy, and to his brother, Ike.

Appointments

Continued from Page 5

• Jerry W. Shannon, assistant superintendent at Fremont, has been promoted in the same job to the Brighton factory. Shannon was an assistant at Fremont for two years after serving as a sugar end foreman for three years. He began his continuous service in 1939, but worked earlier at Fremont from 1954 to 1956. A native of Fremont, Shannon attended Ross High School and Ohio State University before he served in the Army and became an infantry sergeant. He is the son-in-law of Don F. Richter, former superintendent at Fremont.

Cashier Harry Koenig Retires at Johnstown

• H. R. Koenig, veteran cashier at the Johnstown factories, retired on Aug. 1 with nearly 45 years of continuous service. Harry was to leave in May, but stayed on the job until the recovery of his successor, Joseph R. Booth. A cashier for 33 years, Harry moved to Johnstown in 1947 and took up the added duties there with the MSG Plant in 1953. Previously he was cashier at Mitchell from 1940 to 1947 and at Wheatland from 1932 to 1940. He also served briefly as cashier at Wheatland and Mitchell in 1931. Harry began his long career in 1920 as a timekeeper at Bayard and moved to the General Office in 1924, where he worked until 1931. A native of St. Louis, Harry attended the University of Denver and served in the Army Engineers in World War I. For the present, Harry plans to stay in Johnstown and continue with his interests in civic activities.

Billings Chief Chemist Glenn Rogers Stricken

• W. G. Rogers, veteran chief chemist at Billings, suffered a heart attack on Sept. 19. At last report late in the month, Glenn was making a satisfactory recovery. During his convalescence, the acting chief chemist at Billings for the first part of campaign will be Jerry W. Steinmeyer, chief chemist at Sterling and former assistant at Billings. At Sterling, the acting chief chemist will be Roger Feil, assistant chemist at Scottsbluff. His temporary replacement at the Bluffs will be LeRoy Measner, assistant chemist at Johnstown. To Glenn, meantime, best wishes for a speedy recovery.

The front cover shows the Longmont factory in Colorado during a recent campaign with cars of sugar beets in the foreground awaiting processing.

The back cover shows an illustration from a series of colorful advertisements in national magazines and Sunday newspaper supplements promoting the sale of mid-America's favorite—Pure GW Sugar, the energy food!

The aerial views in this issue were photographed by Dennis S. Walla of Roach Photomurals, Denver, Curt P. Frank of Greeley, and Tom Root of Plymouth, Ohio.
