
Dear Grower:

I have reasons to believe that the Co-op will purchase Great Western in the near future. Therefore, I urge all growers to plant their intended acreage. The price outlook on sugar is very encouraging and I feel that even with late planting you stand an excellent chance of getting a very acceptable return on your crop.

Sugar beet acreage is down in other beet growing areas. That fact, combined with growers' ownership points even more than ever to a better than average price for your crop.

You will be interested in knowing that we are close to 70% on Addendum signups. If you have not yet sent yours in, I would suggest that you do so immediately. A reminder, you must sign an addendum for each contract. As you know, when the cooperative owns the company, a contract will not be valid unless a grower has signed an addendum.

In closing, I say after running a long race we are now close to the wire. Gentlemen, let's continue our efforts to make the beet growing business better. Let's make this a standout year.

I again urge you to help reach this goal by planting your intended acreage and returning your signed contract addendums as quickly as possible.

Sincerely,

Henry Schaffer, President
