Gentlemen:

Enclosed please find blue prints for both machines
Serial Numbers attached Canada and U.S.A.

This spacer on 22" rows has worked two years C.K.
The harvester worked last year C.K. with the exception of picking up the tops which we have overcome, it does not show the top lift on the blue prints yet, but can give them any time. This machine works on turnips as well as beets. We leave the tap root of the turnip in the ground.

Now if you are interested in these machines or know of any manufacturer that does, I am ready to sell the patents. Are sure the serial numbers gives the right to build and sell. Please return blue prints if not interested.

This harvester can be built for about $50.00, or that is what I can build for and hire it all done.

Hoping to hear from you soon.

Dear Sir:

We have looked over the blue prints of your beet spacer and harvester and wish to advise that we would not be interested in buying the patents, and do not know of any company which would be interested in same.

As per your request, I am returning to you herewith, your blue prints and specifications.

Thanking you, I remain

Yours very truly
