## MECHANICAL LOADERS

GENERAL OFFICES AND PLANT

FRANKLIN, PA., U.S.A.

December 1, 1932

Mr. George W. Rienks, Chief Engineer  
Great Western Sugar Company  
Sugar Building  
Denver, Colorado

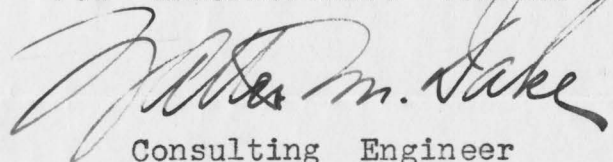

Dear Sir:

In the publication "Business Week", issue of November 30, on page 16, we note a photograph of a power driven sugar beet harvesting machine which you have recently developed, and we would like to know whether, in your opinion, there is an opportunity to use our gathering and loading principle either in direct connection with or immediately following the operation of the lifting and topping machine.

As you are of course familiar with our units, we will appreciate anything that you may be able to tell us in regard to the above.

Yours very truly,

JOY MANUFACTURING COMPANY

Consulting Engineer  
In Charge of Sales

December 6, 1932

Joy Manufacturing Company  
Franklin  
Pennsylvania

Gentlemen:           Attention: Mr. W. M. Dake, Consulting Engineer

In reply to your inquiry of December 1, wish to advise that the beet harvester is not yet well enough developed to be of any practical value, and its further development will be the problem, before any action could be taken to gather the beets behind it.

Yours very truly

Geo. W. Rienks  
GWR:EMG

Supervising Engineer
