ACKNOWLEDGMENTS

The Colorado Natural Heritage Program is grateful to the following who thoughtfully invested their time, energy, and knowledge to ensure the Natural Heritage conservation status list is as up-to-date and accurate as possible:

For Animals:

The status of Colorado's fauna cannot be adequately addressed without the volumes of information that are located and maintained in biological museums. The following institutions have been instrumental to our understanding of Coloradan fauna: C. P. Gillete Insect Biodiversity Museum, Ray Stanford Lepidoptera Collection, Denver Museum of Natural History, University of Colorado Museum, University of Northern Colorado Museum, and the U.S.G.S. Biological Resources Division Collection at the Museum of Southwestern Biology at Albuquerque, New Mexico. We would also like to thank the following individuals associated with the above institutions for their enthusiasm and support of our efforts: Boris Kondratieff, Paul Opler, Ray Stanford, Cheri Jones, Dave Armstrong, Jim Fitzgerald, Cindy Ramotnik, and Mike Bogan.

There were a number of individuals who offered time, energy, expertise, and perspective which helped to shape the development of the list of zoological conservation priorities at CNHP. For agreeing to assist with this effort, we are extremely grateful to the following persons: Dave Armstrong, Kevin Bestgen, Carl Bock, Mike Carter, Ken Giesen, Geoff Hammerson, Hugh Kingery, Fritz Knopf, Ron Lambeth, Lauren Livo, Chuck Loeffler, Carron Meaney, Kirk Navo, Tom Nessler, Chris Pague, Bob Righter, Bruce Rosenlund, Chris Schultz, Gary Skiba, Hobart Smith, Jay Thompson, John Toolen, Lee Upham, Ron West, and Bruce Wunder. Additionally, we would like to thank Larry Master, chief zoologist for the Natural Heritage Network, for his advice and guidance in this effort.

For Plants:

The Colorado Rare Plant Technical Committee dedicates their time to provide expertise to continuously review this list of plants of concern. Special thanks to Carol Spurrier (BLM), Andy Kratz (USFS), Tim Hogan (CU Herbarium), Janet Coles (CNHP), Jan McKee (USFWS), Carol Dawson (DBG), William Weber (CU), Ron Hartman (RM Herbarium), Bill Jennings (local expert), and Betsy Neely (TNC). The herbaria of the area also provide extremely important information to assess the rarity of the plants of Colorado. The herbaria most frequently used in this way are: University of Colorado, Colorado

State University, Rocky Mountain (Wyoming State University), Colorado College, Kathryn Kalmbach (Denver Botanic Gardens), and the Universities of Northern and Southern Colorado. We would also like to thank the Botany Department of the Home Office of The Nature Conservancy for technical support and coordinating global information. An important part of continuing an ongoing look at the rarity of the plants of Colorado comes from those who contribute data, especially the numerous biologists of the U.S. Forest Service, and the Bureau of Land Management. We would like to thank these individuals and encourage this ongoing practice.

For Plant Communities:

Marion Reid and Pat Comer of The Nature Conservancy's Western Conservation Science Department, Denny Grossman and staff at the Nature Conservancy's Home Office, Tom Andrews, Barry Johnston, Dean Erhard and numerous ecologists of the U.S. Forest Service, the Colorado Riparian Association, Colorado Riparian Task Force, Betsy Neely, Holly Richter of The Nature Conservancy of Colorado, William Baker of the University of Wyoming, Sue Galatowitsch, David Cooper, and the Colorado Natural Areas Program.

For General Support:

Great Outdoors Colorado, Colorado Department of Natural Resources, Colorado Division of Wildlife, Colorado Division of State Parks, Colorado Natural Areas Program, Colorado State Forest, Colorado Department of Transportation, U.S. Forest Service Rocky Mountain Region II, University of Colorado, Colorado State University, The Nature Conservancy, U.S. Fish and Wildlife Service, Federal Highway Administration, Environmental Protection Agency, Bureau of Land Management, Bureau of Reclamation, National Park Service, Department of Energy, Air Force Academy, Peterson Air Force Base, Jefferson County, Delta County, Mesa County, Las Animas County, Saguache County, Park County, Routt County, Douglas County, El Paso County, Larimer County, City of Fort Collins, Pitkin County, Summit County, City of Boulder, Boulder County, Denver Water Board, El Paso Department of Transportation, Colorado Springs Utilities, Colorado Native Plant Society, San Isabel Foundation, Aspen Wilderness Workshop, National Fish and Wildlife Foundation, American Mountain Foundation, The Conservation Fund, Cannon Exploration Grants Program, Earthwatch, Design Workshop, Bioresources, ENSR, Carter & Burgess, Dames & Moore, and ERO, Jane Ragle and John Smith, Dave Armstrong, Cate and Steve Werner, Kathlyn Fayette, Peter Davis, William Vanderpoel, Fred Karstedt, Caroline Coleman, Matt Wills, Robert Poole, David Hughes, Randall Ferguson, Bob Barford, and Vince McElligott.

Special thanks to the CSU Student Chapter of the Society of Conservation Biology, and the myriad of individual interns and volunteers who have

contributed to various aspects of CNHP's operations, including field surveys, museum and herbaria canvassing, mapping and data processing, GIS, administrative functions, plant and animal rarity ranking, natural history species abstracts, and much, much more. Your time and effort have truly been invaluable to the success of the Colorado Natural Heritage Program.

DIRECTOR'S NOTE

Thank you for your interest in Colorado's natural heritage. By using this book as a reference to help you understand which species and natural communities are of greatest conservation concern in the state, you are demonstrating your commitment to the long-term health of our environment.

The Colorado Natural Heritage Program has published this handbook each year since 1993 as a way of sharing information regarding the conservation status of imperiled plants and animals, as well as natural communities of concern. The citizens of Colorado have embraced this information, using it to help inform public discussions regarding a wide variety of topics, from how to conduct responsible land development to which species should be targeted for conservation as we proceed with open space programs in our local communities.

Within this document you will find information about the most unusual and precious species and natural communities in the state. Each is accompanied by status information that will help you judge relative rarity and imperilment, that can be used to help set conservation priorities. The resources available for land preservation and environmental conservation will always be limited, so the ability to set meaningful priorities becomes more and more valuable over time. As Colorado's landscape continues to change, we hope that you will become involved in decisions about land use in your community, and will be mindful of the precious biological resources that live there.

Mary L. Klein

CHAPTER 1: INTRODUCTION

What's New?

Since the last publication of “Colorado’s Natural Heritage: Rare and Imperiled Animals, Plants, and Natural Communities, Vol. 3, No. 1” many changes have occurred. The first change is in the name. We have adopted the term “handbook” to convey the intent of developing a useful reference that be be consulted often. Vertebrate state conservation ranks have undergone an intensive expert peer review process, global conservation ranks were updated by the Natural Heritage Network via The Nature Conservancy, and a significant number of plants and plant communities have been determined to be rare or imperiled enough to be added to the list. Specific changes that have been made are documented in the chapter introductions.

As with Vol. 3, No.1, this edition will be made available on the internet. It can be downloaded from the CNHP web site at: <http://www.cnhp.colostate.edu> Hard copies of the document will be available from CNHP. Contributions of \$10 to cover the costs of shipping and handling are appreciated.

As always, we appreciate any comments, corrections, or related data that you may have to offer. Our address, phone numbers, and e-mail addresses are at the end of this Chapter. Field forms to assist in reporting locations of rare species or significant plant communities are located in Appendix 1.

Colorado's Natural Heritage

Just as ancient artifacts and historic buildings represent our cultural heritage, a diversity of plant and animal species and their habitats represent our "natural heritage". Colorado's natural heritage encompasses a wide variety of ecosystems from tallgrass prairie and shortgrass high plains to alpine cirques and rugged peaks, from canyon lands and sagebrush deserts to dense subalpine spruce-fir forests and wide-open tundra.

These widely diversified habitats are determined by water availability, temperature extremes, altitude, geologic history, and land use history. The species that inhabit each of these ecosystems have adapted to the specific set of conditions found there. But, because human influence today touches every part of the Colorado environment, we are responsible for understanding our impacts and carefully planning our actions to ensure that our natural heritage persists for future generations.

Some generalist species, like house finches have flourished over the last century, having adapted to habitats altered by humans. However, many other species are specialized to survive in vulnerable Colorado habitats; among them are Bell's twinpod, the Arkansas darter, and the Pawnee montane skipper. These species have special requirements for survival which may be threatened by competition from non-native species and incompatible land management. Many of these have become imperiled not only in Colorado, but throughout their range of distribution, some existing in less than five populations in the entire world! The decline of these specialized species often indicates disruptions that could permanently alter entire ecosystems. Thus, recognition of rare and imperiled species is crucial to maintaining Colorado's diverse natural heritage.

Colorado is inhabited by some 800 vertebrate species and/or subspecies, and tens of thousands of invertebrate species. In addition, there are approximately 3,100 species of vascular plants and 1,200 nonvascular species. Finally, there are more than 450 recognized plant communities that represent terrestrial and wetland ecosystems. It is this rich natural heritage that has provided the basis for Colorado's diverse economy. Some components of this heritage have always been rare, while others have become imperiled with human-induced changes in the landscape. This document identifies the most rare and imperiled elements of Colorado's biological diversity.

What is Biological Diversity?

Protecting biological diversity has become an important management issue for many natural resource professionals. Biological diversity at its most basic level includes the full range of life on earth, from species such as bacteria, viruses, and protists, through multicellular kingdoms of plants, animals, and fungi. At finer levels of organization, biological diversity includes the genetic variation within species, both among geographically separated populations and among individuals within single populations. On a wider scale, diversity includes variations in the biological communities in which species live, the ecosystems in which communities exist, and the interactions between these organizational levels. All levels are necessary for the continued survival of species and plant communities, and all are important for the well-being of humans. It stands to reason that natural diversity should be of concern to all people.

The biological diversity of an area can be described at four levels:

1. Genetic Diversity -- the genetic variation within a population and among populations of a plant or animal species. The genetic makeup of a species is variable between populations of a species

within its geographic range. Loss of a population results in a loss of genetic diversity for that species and a reduction of total biological diversity for the region. This unique genetic information cannot be reclaimed.

2. Species Diversity -- the total number and abundance of plant and animal species and subspecies in an area.
3. Community Diversity -- the variety of natural communities within an area. These communities may be diagnostic or even endemic to an area. It is within communities that all life dwells.
4. Landscape Diversity -- the type, condition, pattern, and connectedness of natural communities. A landscape consisting of a mosaic of natural communities may contain one multifaceted ecosystem, such as a wetland ecosystem. A landscape also may contain several distinct ecosystems, such as a riparian corridor meandering through shortgrass prairie. Fragmentation of landscapes, loss of connections and migratory corridors, and loss of natural communities all result in a loss of biological diversity for a region. Humans and the results of their activities are integral parts of most landscapes.

The conservation of natural diversity must include all levels of diversity: genetic, species, community, and landscape. Each level is dependent on the other levels and inextricably linked. In addition, and all too often omitted, humans are also linked to all levels of this hierarchy. We at the Colorado Natural Heritage Program believe that healthy natural and human environments go hand in hand, and that recognition of the most imperiled elements is an important step in comprehensive conservation planning.

The Colorado Natural Heritage Program

To place this document in context, it is useful to understand the history and functions of the Colorado Natural Heritage Program (CNHP). CNHP is the state's primary, comprehensive, biological diversity data center, gathering information and field observations to help develop statewide conservation priorities. After operating in Colorado for 14 years, the Program was relocated from the State Division of Parks and Outdoor Recreation to the University of Colorado Museum in 1992, and finally to the College of Natural Resources at Colorado State University, where it has operated since 1994. CNHP is part of an international network of conservation data centers that use the Biological and Conservation Data System developed by The Nature Conservancy. There are 85

conservation data centers, including one in each of the 50 United States. Information collected by the Heritage Programs throughout the globe provides a means to protect species before the need for legal endangerment status arises.

The multi-disciplinary team of scientists, information managers, and conservation planners gathers comprehensive information on rare, threatened, and endangered species and significant plant communities of Colorado. Life history, status, and locational data are incorporated into a continually updated data system. Sources include published and unpublished literature, museum and herbarium labels, and field surveys conducted by knowledgeable naturalists, experts, agency personnel, and our own staff of botanists, ecologists, and zoologists. Information management staff carefully plot the data on 1:24,000 scale USGS maps. The data are digitized into a geographical information system (GIS) and the tabular data are entered into the Biological and Conservation Data System.

Concentrating on site-specific data for each element of natural diversity allows us to evaluate the significance of each element to the conservation of Colorado's, and indeed the nation's, natural biological diversity. The Element Occurrence database can be accessed by many categories, including taxonomic group, county, quadrangle map, source, observation date, watershed, management area, township, range, and section, precision, conservation unit, global/state conservation rank, and federal/state legal status. By using species imperilment ranks and occurrence quality ratings, priorities can be established for the protection of the most sensitive or imperiled sites. This updated locational database and priority-setting system is an effective, proactive land-planning tool.

CNHP has effective partnerships with several state and federal agencies, including the Colorado Natural Areas Program, Colorado Department of Natural Resources, Colorado Division of Wildlife, Bureau of Land Management, U.S. Fish and Wildlife Service, and the U.S. Forest Service. Numerous local governments and private entities also work closely with CNHP. Use of the data by many different individuals and organizations, including Great Outdoors Colorado, encourages a proactive approach to development and conservation thereby reducing the potential for conflict.

The Natural Heritage Ranking System

Information is gathered by CNHP on Colorado's plants, animals, and plant communities. Each of these species and communities is considered an **element of natural diversity**, or simply an **element**. Each element is assigned a rank that indicates its relative degree of rarity or imperilment on a five-point scale (e.g., 1 = critically imperiled because of extreme rarity, 5 = demonstrably secure). The primary criterion for ranking elements is the number of occurrences, i.e., the number of known distinct localities or populations. This factor is weighted more heavily because, all other factors being equal, an element found in one place is more imperiled than something found in twenty-one places. Also of importance is the size of the geographic range, the number of individuals, trends in both population and distribution, identifiable threats, and the number of already protected occurrences. However, the emphasis remains on the number of occurrences, such that ranks are an index of known biological rarity.

Element conservation ranks are assigned both in terms of the element's abundance within Colorado (its State or S-rank) and over its entire range (its Global or G-rank). A complete description of each of the Natural Heritage ranks is provided in Table 1.

Conservation priorities are determined by examining G-rank, S-rank, and the element occurrence tracking status collectively. CNHP actively collects, maps, and electronically processes specific occurrence information for elements that have a tracking status of Y (yes) and P (partial) and W (watchlisted) as discussed on page 10 of this document.

This single rank system works readily for all natural communities and species, except those species that are migratory. Those animals that migrate may spend only a portion of their life cycles within the state. In these cases, it is necessary to distinguish between breeding, non-breeding, and resident species. As noted in Table 1, ranks followed by a "B", e.g., S1B, indicate that the rank applies only to the status of breeding occurrences. Similarly, ranks followed by an "N", e.g., S4N, refer to nonbreeding status, typically during migration and winter. Elements without this notation are believed to be year-round residents within the state.

Table 1. Definition of Colorado Natural Heritage Conservation Ranks.

<p>Global conservation ranks are based on the range-wide status of a species. State conservation ranks are based on the status of a species in an individual state. State and Global ranks are denoted, respectively, with an "S" or a "G" followed by a character. These ranks should not be interpreted as legal designations.</p>	
G/S1	Critically imperiled globally/state because of rarity (5 or fewer occurrences in the world/state; or very few remaining individuals), or because of some factor of its biology making it especially vulnerable to extinction.
G/S2	Imperiled globally/state because of rarity (6 to 20 occurrences), or because of other factors demonstrably making it very vulnerable to extinction throughout its range.
G/S3	Vulnerable through its range or found locally in a restricted range (21 to 100 occurrences).
G/S4	Apparently secure globally/state, though it might be quite rare in parts of its range, especially at the periphery.
G/S5	Demonstrably secure globally, though it may be quite rare in parts of its range, especially at the periphery.
GX	Presumed extinct.
G#?	Indicates uncertainty about an assigned global rank.
G/SU	Unable to assign rank due to lack of available information.
GQ	Indicates uncertainty about taxonomic status.
G/SH	Historically known, but not verified for an extended period, usually.
G#T#	Trinomial rank (T) is used for subspecies or varieties. These species or subspecies are ranked on the same criteria as G1-G5.
S#B	Refers to the breeding season imperilment of elements that are not permanent residents.
S#N	Refers to the non-breeding season imperilment of elements that are not permanent residents. Where no consistent location can be discerned for migrants or non-breeding populations, a rank of SZN is used
SZ	Migrant whose occurrences are too irregular, transitory, and/or dispersed to be reliably identified, mapped, and protected.
SA	Accidental in the state.
SR	Reported to occur in the state, but unverified.
S?	Unranked. Some evidence that species may be imperiled, but awaiting formal rarity ranking.
<p>Notes: Where two numbers appear in a state or global rank (e.g., S2S3), the actual rank of the element falls between the two numbers. # represents rank (1-5)</p>	

Legal Designations

Natural Heritage conservation ranks should not be interpreted as legal designations. Although most species protected under state or federal endangered species laws are extremely rare, not all rare species receive legal protection. Legal status is designated by either the U.S. Fish and Wildlife Service under the Endangered Species Act or by the Colorado Division of

Wildlife under Colorado Revised Statutes 33-2-105 Article 2. In addition, the U.S. Forest Service recognizes some species as "Sensitive," as does the Bureau of Land Management.

Federal Status

The US Fish and Wildlife Service (USFWS) is directed by the Endangered Species Act (ESA) to identify and protect threatened and endangered plants and animals. The USFWS revised its candidate system in 1996 thus eliminating the old categories of C2 and C3. The categories being used to rank listed and candidate species and the associated CNHP code are provided below.

Endangered Species Act (USFWS)

LE – Listed Endangered – defined as a species, subspecies, or variety in danger of extinction throughout all or a significant portion of its range.

E(S/A) – Endangered – treated as endangered due to its similarity of appearance with a listed species.

LT – Listed Threatened – defined as a species, subspecies, or variety likely to become endangered in the foreseeable future throughout all or a significant portion of its range.

P – Proposed – taxa formally proposed for listing as Endangered or Threatened (a proposal has been published in the Federal Register, but not a final rule).

C - Candidate (formerly C1) – taxa for which substantial biological information exists on file to support a proposal to list as Endangered or Threatened, but no proposal has yet been published in the Federal Register.

The US Forest Service (USFS) and the US Bureau of Land Management (BLM) have adopted policies to ensure that agency actions do not result in the decline of species and the subsequent listing as Endangered or Threatened by the USFWS. The categories being used by the USFS and the BLM along with the associated CNHP are provided below.

Other Agency Status (e.g., Agency Status)

FS – Sensitive – those plants and animal species identified by the Regional Forester for which population viability is a concern as evidenced by i) significant current or predicted downward trends in population numbers or density and ii) significant current or predicted downward trends in habitat capability that would reduce a species' existing distribution.

BLM – Sensitive – those species found on public lands, designated by a State Director, that could easily become endangered or extinct in a state. The protection provided for sensitive species is the same as that provided for C (candidate) species.

State Status

The Colorado Division of Wildlife has developed categories of imperilment for nongame species (refer to the Colorado Division of Wildlife’s Chapter 10-Nongame Wildlife of the Wildlife Commissions regulations). The categories being used and the associated CNHP codes are provided below.

T – Threatened – those species or subspecies of wildlife which, as determined by the Commission, are not in immediate jeopardy of extinction but are vulnerable because they exist in such small numbers, are so extremely restricted in their range, or are experiencing such low recruitment or survival that they may become extinct.

E – Endangered – those species or subspecies of native wildlife whose prospects for survival or recruitment within this state are in jeopardy, as determined by the Commission.

SC – Special Concern – species or subspecies of native wildlife which have been removed from the state threatened or endangered list within the last five years; are proposed for federal listing (or are a federal listing “candidate species”) and are not already state listed; have experienced, based on the best available data, a downward trend in numbers or distribution lasting at least five years which may lead to a threatened or endangered status; or are otherwise determined to be vulnerable in Colorado.

Comments Welcomed - Help Needed!

CNHP plays an important role as a member of the Natural Heritage Network in determining the global conservation rankings for all elements whose range extends into Colorado as well as developing our state conservation ranks. All ranks can change with new information; we depend on experts, agency personnel, naturalists, and others to submit occurrence information on species and plant communities found on this listing, and to otherwise comment on ranks and status. Examples of CNHP animal, plant and plant community survey forms are provided in Appendix 1.

CHAPTER 2: ZOOLOGY

Townsend's big-eared bat
Plecotus townsendii

Introduction

The list of zoological elements of conservation concern in Colorado has changed substantially since last publication in 1997. Changes in EO tracking status are as follows:

EO tracking change	Number of Elements	EO tracking change	Number of Elements	EO tracking change	Number of Elements
No to W	3	W to No	27	Y to No	163
No to P	7	W to P	1	Y to W	7
No to Y	9	W to Y	6	Y to P	15

The zoology team uses a combination of factors to determine the conservation priority status of zoological elements in Colorado. In the lists that follow, we present the global rank, the state rank, and the EO tracking status for all zoological elements that we consider conservation priorities in Colorado. When using these lists, it is important to consider all three of these values to understand the conservation priority. None of the factors should be used in isolation. State conservation rank is no longer the primary determining factor in assigning information management priorities. Information management activity is now reflected by the EO tracking status. We actively solicit data for elements whose EO tracking status is: Yes (**Y**), Partial (**P**), or Watch List (**W**) which are employed as follows:

Y = “Yes” indicates that all locational data are maintained in the BCD. It is used for elements that conform to the criteria listed below.

P = “Partial” indicates that only those occurrences of very high environmental quality or those within a specified population will be

San Luis dunes tiger beetle
Cicindela theatina

maintained in the BCD. All other occurrences will be maintained in the observation/monitoring database. It is used for elements that marginally meet the criteria listed below with regard to their populations in Colorado or for elements with restricted geographic ranges and for which the majority or all populations within these ranges occur in Colorado.

W = “Watchlisted” indicates that observations/occurrences will be maintained in the manual files and observation/monitoring database. It is used for elements that harbor conservation priority, but that priority is not specifically derived from the criteria listed below.

The EO tracking prioritization criteria used are as follows:

Rare - Can be considered in terms of geographic range, habitat specificity, and local population size. Rabinowitz (1981) defines seven forms of rarity:

1. Constantly sparse over a large range and in several habitats;
2. Constantly sparse in a specific habitat but over a large range;
3. Constantly sparse and geographically restricted in several habitats;
4. Constantly sparse and geographically restricted in a specific habitat;
5. Locally abundant over a large range in a specific habitat (see endemic below);
6. Locally abundant in several habitats but restricted geographically (see endemic below);
7. Locally abundant in a specific habitat but restricted geographically (see endemic below).

Evolutionarily distinct or isolated - Is considered disjunct in time or space respectively. For more mobile elements, we focus on disconnects in space. Discontinuity in the spatial range of a mobile element identifies a potentially distinct group, in an evolutionary sense, that merits conservation focus. For less mobile elements, disconnect in time is of greater significance. That is, if an element is relatively sedentary, the individuals at the edges of the distribution range will have little, if any, genetic communication with those individuals at the core of the range.

Endemic - Is restricted in geographic or habitat distribution. For our purposes, we define geographic endemism (number 6 by Rabinowitz above) in terms of physiogeographic regions. A geographic endemic worth conservation consideration might be restricted in global distribution to the Colorado Plateau. Habitat endemism (number 5 by Rabinowitz above) we define in terms of soil type, vegetative cover, substrate, food source, etc. A habitat endemic worthy of conservation priority might be restricted in global

range to sand dunes, oil shale, or to riparian areas in western North America (in all cases, the element must not occur in other habitats). An element may also be both a habitat endemic as well as a geographic endemic (number 7 by Rabinowitz above).

Trend - Will be used sparingly and to limited extent. It will generally be reserved for use only with those elements that do not quite meet any of the above criteria and for which we have reliable trend data. Interpretation of trend data can be misleading depending on the temporal and spatial scale at which the analysis occurs; the same data can yield opposite trends at varied temporal scales. Moreover, we do not have long-term, reliable trend data for many zoological elements.

Amphibians

Order ANURA	Scientific Name	Common Name	CNHP Status and Ranking			Regulatory Status		State Status

CHAPTER 3: BOTANY

Parachute penstemon (*Penstemon debilis*)

Introduction

The botany team is currently reviewing the entire Colorado flora to determine a more complete list of the state's rare and imperiled species. This is an ongoing process as information is acquired and the species status change. The current list includes 493 species. The botany team uses two forms

of tracking status Y (yes) and W (watchlist). A species marked with a Y indicates a full tracking status and all data are entered into the Biological Conservation Datasystem. For watchlist (W) species, all data are acquired and kept in manual files but are not entered into the Biological Conservation Datasystem. These watchlist species (10) are noteworthy because they are uncommon, but are less of a conservation priority by CNHP standards. If more data are accrued and the threats to these species do not increase they may be taken off the list altogether. In contrast, if the threats to these species increase we will be in a good position to add them to the Y category.

List Content and Nomenclature

Nomenclature follows Weber and Wittmann (1992) and Kartesz (1994). Where the nomenclature of these references differ, both of the names appear in alphabetical order in the list, and their synonyms are provided.

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Abronia carletonii</i>		Carlton's Sand Verbena	Y	G4	S1			
<i>Abronia nana</i>		Dwarf Sand Verbena	Y	G4	S1			
<i>Abutilon incanum</i>		Hoary Mallow	Y	G5	S1			
<i>Acer grandidentatum</i>		Bigtooth Maple	Y	G4	S1			
<i>Acorus calamus</i>		Sweet Flag	Y	G?	SH			
<i>Adiantum aleuticum</i>		Aleutian Maidenhair Fern	Y	G5?	S1			
<i>Adiantum capillus-veneris</i>		Southern Maiden-Hair	Y	G5	S2	FS		
<i>Agastache foeniculum</i>		Lavender Hyssop	Y	G4G5	S1			
<i>Aletes anisatus</i>		Rocky Mountain Aletes	W	G3G4	S3S4			
<i>Aletes humilis</i>		Larimer Aletes	Y	G2G3	S2S3	FS		
<i>Aletes latilobus</i>	<i>Lomatium latilobum</i>	Canyonlands Lomatium	Y	G1	S1	BLM		
<i>Aletes lithophilus</i>	<i>Neoparrya lithophila</i>	Rock-Loving Neoparrya	Y	G2	S2	FS/BLM		
<i>Aletes macdougalii ssp breviradiatus</i>		Mesa Verde Aletes	Y	G3G4T3?Q	S1			
<i>Aletes nuttallii</i>	<i>Lomatium nuttallii</i>	Dog Parsley	Y	G3G4	S1			
<i>Aletes sessiliflorus</i>		New Mexico False Carrot	Y	G3	S1?			
<i>Aletes tenuifolius</i>	<i>Musineon tenuifolium</i>	Slender Parsley	Y	G4	S3			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Allium nevadense</i>		Nevada Onion	Y	G4	S2			
<i>Allium schoenoprasum var sibiricum</i>		Wild Chives	Y	G5T5	S1			
<i>Alsianthe stricta</i>	<i>Minuartia stricta</i>	Rock Sandwort	Y	G5	S1			
<i>Ambrosia linearis</i>		Plains Ragweed	Y	G2	S2	FS		
<i>Amorpha nana</i>		Dwarf Wild Indigo	Y	G5	S2S3			
<i>Amsonia jonesii</i>		Jones Blue Star	Y	G4	S1	BLM		
<i>Anagallis minima</i>		Chaffweed	Y	G5	S1			
<i>Anemone riparia</i>	<i>Anemone virginiana var riparia</i>	White-Flowered Anemone	Y	G5T4T5	SH			
<i>Anemone virginiana var riparia</i>	<i>Anemone riparia</i>	White-Flowered Anemone	Y	G5T4T5	SH			
<i>Anticlea vaginatus</i>	<i>Zigadenus vaginatus</i>	Alcove Death Camas	Y	G2	S2			
<i>Apios americana</i>		American Groundnut	Y	G5	S1			
<i>Aquilegia chrysantha var rydbergii</i>		Golden Columbine	Y	G4T1Q	S1	BLM		
<i>Aquilegia micrantha var mancosana</i>		Mancos Columbine	Y	G5THQ	SH			
<i>Aquilegia saximontana</i>		Rocky Mountain Columbine	Y	G3	S3			
<i>Arabidopsis salsuginea</i>	<i>Thellungiella salsuginea</i>	Salt-Lick Mustard	Y	G4G5	S1			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Arabis crandallii</i>	<i>Boechea crandallii</i>	Crandall's Rock-Cress	Y	G4	S2	BLM		
<i>Arabis fernaldiana</i> var <i>feraldiana</i>	<i>Boechea fernaldiana</i>	Park Rockcress	Y	G3G4T3T4	S2			
<i>Arabis gunnisoniana</i>	<i>Boechea gunnisoniana</i>	A Rock Cress	Y	G3	S3			
<i>Arabis oxylobula</i>	<i>Boechea oxylobula</i>	A Rock Cress	Y	G3	S3			
<i>Aralia racemosa</i>		American Spikenard	Y	G5	S1			
<i>Argillochloa dasyclada</i>	<i>Festuca dasyclada</i>	Utah Fescue	Y	G3	S3			
<i>Aristida basiramea</i>		Forktip Three-Awn	Y	G5	S1			
<i>Armeria maritima</i> ssp <i>sibirica</i>	<i>Armeria scabra</i> ssp <i>sibirica</i>	Sea Pink	Y	G5T5	S1	FS		
<i>Armeria scabra</i> ssp <i>sibirica</i>	<i>Armeria maritima</i> ssp <i>sibirica</i>	Sea Pink	Y	G5T5	S1	FS		
<i>Arnica alpina</i> var <i>tomentosa</i>	<i>Arnica angustifolia</i> ssp <i>tomentosa</i>	Alpine Arnica	Y	G5T5	S1			
<i>Arnica angustifolia</i> ssp <i>tomentosa</i>	<i>Arnica alpina</i> var <i>tomentosa</i>	Alpine Arnica	Y	G5T5	S1			
<i>Artemisia pattersonii</i>		Patterson's Wormwood	Y	G3	S3			
<i>Artemisia pygmaea</i>	<i>Seriphidium pygmaeum</i>	Pigmy Sagebrush	Y	G4	S1			
<i>Asclepias involucrata</i>		Dwarf Milkweed	Y	G5	S1			
<i>Asclepias macrosperma</i>		Large-Seeded Milkweed	Y	G4	S1			
<i>Asclepias macrotis</i>		Long-Hood Milkweed	Y	G4	S2			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Asclepias oenotheroides</i>		Zizotes Milkweed	Y	G4G5	S1			
<i>Asclepias stenophylla</i>		Narrow-Leaved Milkweed	Y	G4G5	S2			
<i>Asclepias uncialis</i>		Dwarf Milkweed	Y	G3?	S1S2	FS/BLM		
<i>Askellia nana</i>	<i>Crepis nana</i>	Dwarf Hawksbeard	Y	G5	S2			
<i>Asplenium adiantum-nigrum</i>		Black Spleenwort	Y	G5	S1			
<i>Asplenium platyneuron</i>		Ebony Spleenwort	Y	G5	S1			
<i>Asplenium resiliens</i>		Black-Stemmed Spleenwort	Y	G5	S1			
<i>Asplenium septentrionale</i>		Grass-Fern	W	G4G5	S3S4			
<i>Asplenium trichomanes-ramosum</i>		Green Spleenwort	Y	G4	S1S2			
<i>Aster alpinus var vierhapperi</i>		Alpine Aster	Y	G5TU	S1			
<i>Aster novae-angliae</i>	<i>Virgulus novae-angliae</i>	New England Aster	Y	G5	S1SE?			
<i>Aster perelegans</i>	<i>Eucephaius perelegans</i>	Nuttall Aster	Y	G5	S1			
<i>Astragalus allochrous var playanus</i>	<i>Astragalus wootonii var wootonii</i>	Wooton Milkvetch	Y	G4T3?	S1			
<i>Astragalus anisus</i>		Gunnison Milkvetch	Y	G2	S2	FS/BLM		
<i>Astragalus aretioides</i>	<i>Orophaca aretioides</i>	Cushion Orophaca	Y	G4	S1	BLM		

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Astragalus argophyllus</i> var <i>martinii</i>		Meadow Milkvetch	Y	G5T4	S1			
<i>Astragalus bodinii</i>		Bodin Milkvetch	Y	G4	S2			
<i>Astragalus brandegeei</i>		Brandegee Milkvetch	Y	G3G4	S1S2	BLM		
<i>Astragalus calycosus</i> var <i>scaposus</i>		Torrey's Milkvetch	Y	G5T3?	S2			
<i>Astragalus cerussatus</i>		A Milk-Vetch	Y	G2	S2			
<i>Astragalus chloodes</i>		Grass Milkvetch	Y	G3	S?			
<i>Astragalus cibarius</i>		Browse Milkvetch	Y	G4	S1			
<i>Astragalus coltonii</i> var <i>moabensis</i>		Colton Milkvetch	Y	G4T3?	S2			
<i>Astragalus cronquistii</i>		Cronquist Milkvetch	Y	G2	S2	BLM		
<i>Astragalus debequaeus</i>		Debeque Milkvetch	Y	G2	S2	BLM		
<i>Astragalus deterior</i>		Cliff-Palace Milkvetch	Y	G2	S2			
<i>Astragalus detritalis</i>		Debris Milkvetch	Y	G3	S2	BLM		
<i>Astragalus duchesnensis</i>		Duchesne Milkvetch	Y	G3	S1S2	BLM		
<i>Astragalus gilviflorus</i>	<i>Orophaca triphylla</i>	Plains Milkvetch	Y	G5	S1			
<i>Astragalus hamiltonii</i>	<i>Astragalus lonchocarpus</i> var <i>hamiltonii</i>	Hamilton Milkvetch	Y	G1	S1			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Astragalus humillimus</i>		Mancos Milkvetch	Y	G1	S1		LE	
<i>Astragalus hyalinus</i>	<i>Orophaca hyalina</i>	Summer Orophaca	Y	G4	S1?			
<i>Astragalus jejunus</i>		Starvling Milkvetch	Y	G3	S1	BLM		
<i>Astragalus lentiginosus var chartaceus</i>		San Pitch Valley Milk-Vetch	Y	G5T3Q	S1			
<i>Astragalus linifolius</i>		Grand Junction Milkvetch	Y	G3Q	S3	BLM		
<i>Astragalus lonchocarpus var hamiltonii</i>	<i>Astragalus hamiltonii</i>	Hamilton Milkvetch	Y	G1	S1			
<i>Astragalus lutosus</i>		Dragon Milkvetch	W	G4	S3S4			
<i>Astragalus microcymbus</i>		Skiff Milkvetch	Y	G1	S1	BLM		
<i>Astragalus missouriensis var humistratus</i>		Missouri Milk-Vetch	Y	G5T2	S1?			
<i>Astragalus molybdenus</i>		Leadville Milkvetch	Y	G3	S2	FS		
<i>Astragalus musiniensis</i>		Ferron Milkvetch	Y	G3?	S1	BLM		
<i>Astragalus naturitensis</i>		Naturita Milkvetch	Y	G2G3	S2S3	BLM		
<i>Astragalus nelsonianus</i>		Nelson Milkvetch	Y	G2	S1	BLM		
<i>Astragalus newberryi</i>		Newberry's Milk-Vetch	Y	G5	S1			
<i>Astragalus oocalycis</i>		Arboles Milkvetch	Y	G4	S2S3			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Astragalus osterhoutii</i>		Osterhout Milkvetch	Y	G1	S1		LE	
<i>Astragalus piscator</i>		Fisher Towers Milkvetch	Y	G1?	S1	BLM		
<i>Astragalus plattensis</i>		Platte River Milkvetch	Y	G5	S1			
<i>Astragalus proximus</i>		Aztec Milkvetch	Y	G4	S2	FS		
<i>Astragalus rafaensis</i>		San Rafael Milkvetch	Y	G3	S1	BLM		
<i>Astragalus ripleyi</i>		Ripley Milkvetch	Y	G3	S2	FS/BLM		
<i>Astragalus saurinus</i>		Dinosaur Milkvetch	Y	G3	S?			
<i>Astragalus schmolliae</i>		Schmoll Milkvetch	Y	G1	S1			
<i>Astragalus sesquiflorus</i>		Sandstone Milkvetch	Y	G3?	S1	BLM		
<i>Astragalus sparsiflorus</i>		Front Range Milkvetch	Y	G3?	S3?			
<i>Astragalus tortipes</i>		Sleeping Ute Milkvetch	Y	G1	S1		C	
<i>Astragalus wetherillii</i>		Wetherill Milkvetch	Y	G3	S3			
<i>Astragalus wootonii var wootonii</i>	<i>Astragalus allochrous var playanus</i>	Wooton Milkvetch	Y	G4T3?	S1			
<i>Astrolepis cochisensis</i>		Scaly Cloak Fern	Y	G5?	S1			
<i>Azaleastrum albiflorum</i>	<i>Rhododendron albiflorum</i>	White-Flowered Azalea	Y	G4	S2			
<i>Besseyia ritteriana</i>		Ritter's Coral-Drops	Y	G3?	S3?			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Besseyia wyomingensis</i>		Kittentail	Y	G5	S1			
<i>Betula papyrifera</i>		Paper Birch	Y	G5	S1			
<i>Boechea crandallii</i>	<i>Arabis crandallii</i>	Crandall's Rock-Cress	Y	G4	S2	BLM		
<i>Boechea fernaldiana</i>	<i>Arabis fernaldiana var fernaldiana</i>	Park Rockcress	Y	G3G4T3T4	S2			
<i>Boechea gunnisoniana</i>	<i>Arabis gunnisoniana</i>	A Rock Cress	Y	G3	S3			
<i>Boechea oxylobula</i>	<i>Arabis oxylobula</i>	A Rock Cress	Y	G3	S3			
<i>Bolophyta alpina</i>	<i>Parthenium alpinum</i>	Wyoming Feverfew	Y	G3	S1	FS		
<i>Bolophyta ligulata</i>	<i>Parthenium ligulatum</i>	Ligulate Feverfew	Y	G3	S2	BLM		
<i>Bolophyta tetraneuris</i>	<i>Parthenium tetraneuris</i>	Arkansas River Feverfew	Y	G3	S3			
<i>Bothriochloa springfieldii</i>		Springfield Bluestem	Y	G4?	S1			
<i>Botrychium campestre</i>		Prairie Moonwort	Y	G3	S1	FS		
<i>Botrychium echo</i>		Reflected Moonwort	Y	G2	S2	FS		
<i>Botrychium hesperium</i>		Western Moonwort	Y	G3	S2			
<i>Botrychium lanceolatum</i>	<i>Botrychium lanceolatum var lanceolatum</i>	Lance-Leaved Moonwort	Y	G5T4	S2S3			
<i>Botrychium lanceolatum var lanceolatum</i>	<i>Botrychium lanceolatum</i>	Lance-Leaved Moonwort	Y	G5T4	S2S3			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Botrychium lineare</i>		Narrowleaf Grapefern	Y	G1	S1		FS	
<i>Botrychium lunaria</i>		Common Moonwort	Y	G5	S2S3			
<i>Botrychium minganense</i>		Mingan Moonwort	Y	G4	S1			
<i>Botrychium multifidum</i>	<i>Botrychium multifidum ssp coulteri</i>	Leathery Grape Fern	Y	G5	S1			
<i>Botrychium multifidum ssp coulteri</i>	<i>Botrychium multifidum</i>	Leathery Grape Fern	Y	G5	S1			
<i>Botrychium pallidum</i>		Pale Moonwort	Y	G2	S2		FS	
<i>Botrychium pinnatum</i>		Northern Moonwort	Y	G4?	S1			
<i>Botrychium simplex</i>		Least Moonwort	Y	G5	S1			
<i>Botrychium virginianum</i>	<i>Botrypus virginianus ssp europaeus</i>	Rattlesnake Fern	Y	G5	S1			
<i>Botrypus virginianus ssp europaeus</i>	<i>Botrychium virginianum</i>	Rattlesnake Fern	Y	G5	S1			
<i>Boykinia jamesii</i>	<i>Telesonix jamesii</i>	James' Telesonix	Y	G4	S2?			
<i>Braya glabella</i>	<i>Braya glabella var glabella</i>	Arctic Braya	Y	G5	S1		FS	
<i>Braya glabella var glabella</i>	<i>Braya glabella</i>	Arctic Braya	Y	G5	S1		FS	
<i>Braya humilis</i>		Alpine Braya	Y	G4	S2			
<i>Bupleurum americanum</i>	<i>Bupleurum triradiatum ssp arcticum</i>	Thoroughwax	Y	G5	S1			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Bupleurum triradiatum ssp arcticum</i>	<i>Bupleurum americanum</i>	Thoroughwax	Y	G5	S1			
<i>Caesalpinia repens</i>		Creeping Rush-Pea	Y	G2	S1			
<i>Callitriche heterophylla</i>		Large Water-Starwort	Y	G5	S1			
<i>Calochortus flexuosus</i>		Weak-Stemmed Mariposa Lily	Y	G4	S1			
<i>Camissonia andina</i>		Mountain Camissonia	Y	G4	S1			
<i>Camissonia eastwoodiae</i>		Eastwood Evening-Primrose	Y	G3?	S1			
<i>Campanula aparinoides</i>		Marsh Bellflower	Y	G5	SH			
<i>Carex capitata ssp arctogena</i>		Round-Headed Sedge	Y	G5T4?	S1			
<i>Carex concinna</i>		Low Northern Sedge	Y	G4G5	S1	BLM		
<i>Carex crawei</i>		Crawe Sedge	Y	G5	S1			
<i>Carex diandra</i>		Lesser Panicked Sedge	Y	G5	S1			
<i>Carex gravida var lunelliana</i>		Heavy Sedge	Y	G5TU	SU			
<i>Carex lasiocarpa</i>		Slender Sedge	Y	G5	S1			
<i>Carex leptalea</i>		Bristle-Stalk Sedge	Y	G5	S1			
<i>Carex limosa</i>		Mud Sedge	Y	G5	S2			
<i>Carex livida</i>		Livid Sedge	Y	G5	S1	FS		

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Carex molesta</i>		Troublesome Sedge	Y	G4	S1			
<i>Carex oreocharis</i>		A Sedge	Y	G3	S1			
<i>Carex peckii</i>		Peck Sedge	Y	G4G5	SH			
<i>Carex retrorsa</i>		Retorse Sedge	Y	G5	S1			
<i>Carex sartwellii</i>		Sartwell's Sedge	Y	G4	S1			
<i>Carex saximontana</i>		Rocky Mountain Sedge	Y	G5	S1			
<i>Carex scirpoidea</i>		Canadian Single-Spike Sedge	Y	G5	S2			
<i>Carex sprengei</i>		Sprengel's Sedge	Y	G5?	S2S3			
<i>Carex sychnocephala</i>		Many-Headed Sedge	Y	G4	S1			
<i>Carex tenuiflora</i>		Slender-Flower Sedge	Y	G5	S1			
<i>Carex torreyi</i>		Torrey Sedge	Y	G4	S1			
<i>Carex viridula</i>		Green Sedge	Y	G5?	S1			
<i>Castilleja lineata</i>		Marsh-Meadow Indian-Paintbrush	Y	G4?	S1			
<i>Castilleja puberula</i>		Downy Indian-Paintbrush	Y	G2G3	S?			
<i>Ceanothus martinii</i>		Utah Mountain Lilac	Y	G4	S1			
<i>Centaureum arizonicum</i>		Arizona Centaury	Y	G5?	S1			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Centaureum exaltatum</i>		Great Basin Centaury	Y	G5	S1			
<i>Cheilanthes eatonii</i>		Eaton's Lip Fern	Y	G5?	S2			
<i>Cheilanthes standleyi</i>	<i>Notholaena standleyi</i>	Standley's Cloak Fern	Y	G4	S1			
<i>Cheilanthes wootonii</i>		Wooton's Lip Fern	Y	G5	S1			
<i>Chenopodium cycloides</i>		Sandhill Goosefoot	Y	G3G4	S1	FS		
<i>Chionophila jamesii</i>		Rocky Mountain Snowlover	W	G4?	S3S4			
<i>Cirsium barnebyi</i>		Barneby's Thistle	Y	G3	S1			
<i>Cirsium ownbeyi</i>		Ownbey Thistle	Y	G3	S2	BLM		
<i>Cirsium perplexans</i>		Rocky Mountain Thistle	Y	G2	S2	BLM		
<i>Cirsium scapanolepis</i>		Mountain-Slope Thistle	Y	G1	S1			
<i>Cleome multicaulis</i>		Slender Spiderflower	Y	G2G3	S2S3	BLM		
<i>Cleomella angustifolia</i>		Northern Rhombo-Pod	Y	G5	S1			
<i>Cleomella palmerana</i>	<i>Cleomella palmeriana</i>	Rocky Mountain Rhombopod	Y	G3?	S3			
<i>Cleomella palmeriana</i>	<i>Cleomella palmerana</i>	Rocky Mountain Rhombopod	Y	G3?	S3			
<i>Collomia grandiflora</i>		Showy Collomia	Y	G5	S1			
<i>Comarum palustre</i>		Marsh Cinquefoil	Y	G5	S1S2			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status		
			Tracking Status	Global Rank	State Rank	Agency Sensitive	Federal Status	State Status
<i>Commelina dianthifolia</i>		Birdbill Day-Flower	Y	G5	S1?			
<i>Conimitella williamsii</i>		Williams Bishop's Cap	Y	G3	SH			
<i>Conopholis alpina var mexicana</i>		Squaw-Root	Y	G5T5	S1			
<i>Corispermum navicula</i>		A Bugseed	Y	G?	S1			
<i>Corydalis caseana ssp brandegeei</i>	<i>Corydalis caseana ssp brandegeei</i>	Sierra Corydalis	W	G5T3T4	S3S4			
<i>Corydalis caseana ssp brandegei</i>	<i>Corydalis caseana ssp brandegeei</i>	Sierra Corydalis	W	G5T3T4	S3S4			
<i>Crataegus chrysocarpa</i>		Yellow Hawthorn	Y	G5	S1			
<i>Crataegus saligna</i>		Willow Hawthorn	Y	G2?	S2?			
<i>Crepis nana</i>	<i>Askellia nana</i>	Dwarf Hawksbeard	Y	G5	S2			
<i>Crocانthemum bicknellii</i>	<i>Helianthemum bicknellii</i>	Frostweed	Y	G5	S2			
<i>Cryptantha aperta</i>	<i>Oreocarya aperta</i>	Grand Junction Cat's-Eye	Y	GH	SH			
<i>Cryptantha brevipflora</i>	<i>Oreocarya brevipflora</i>	Short-Flower Cryptanth	Y	G4	S1			
<i>Cryptantha caespitosa</i>	<i>Oreocarya caespitosa</i>	Tufted Cryptanth	Y	G4	S2	BLM		
<i>Cryptantha cana</i>	<i>Oreocarya cana</i>	Mountain Cat's-Eye	Y	G5	S2			
<i>Cryptantha cinerea var pustulosa</i>		Catseye	Y	G5T?	S1			
<i>Cryptantha elata</i>	<i>Oreocarya elata</i>	Tall Cryptanth	Y	G3	S2			

Plant Species

Scientific Name	Synonym	Common Name	CNHP Status and Ranking			Regulatory Status

CHAPTER 4: ECOLOGY

Montane grassland (*Festuca arizonica*-*Muhlenbergia filiculmis*)

Introduction

In order to answer the most basic questions necessary to ensure good management and conservation decisions, and to direct our limited conservation resources to the specific places where they will have the greatest impact, we must have clear answers regarding what plant

communities exist, how rare they are, and the status of their condition. In cooperation with the Nature Conservancy, the Heritage programs have developed a standard for classification, inventory, and mapping work by all U.S. federal agencies, including the National Park Service, the National Forest Service, and the Fish and Wildlife Service. These agencies, along with other academic and professional conservation and management organizations, are increasingly becoming partners with the Heritage programs and The Nature Conservancy in the ongoing development and application of the classification and its provision to a burgeoning number of users and contributors (Maybury 1999).

Recognizing the need for a national and international system for classifying terrestrial communities to carry out its mission effectively, the Natural Heritage network, in conjunction with the Nature Conservancy, undertook development of the U.S. National Vegetation Classification System. A team of more than 100 Conservancy and Heritage ecologists established the standardized classification framework and defined the first iteration of U.S. communities within it. The *International Classification of Ecological Communities: Terrestrial Vegetation of the United States* by Anderson et al. 1998 can be found on the World Wide Web at www.tnc.org. The following list is a subset of the international list of plant communities, including those that are classified as rare, imperiled, and common.

List Content and Nomenclature:

The Colorado Natural Heritage Program collects information on rare and imperiled natural communities, as well as high quality examples of common native communities. Together these constitute our “coarse filter” approach to conservation. The coarse filter concept states that if aggregates (e.g., plant communities) are managed well, the components of these aggregates (e.g., plants animals, microbes, ecological processes, etc.) will be managed as well. Thus, plant communities are used to identify and formulate conservation strategies for all the components of native ecological systems, including both the rare and common as well as the known and unknown.

In various Natural Heritage Program literature from around the West, the following terms may appear: "plant community," "plant association," "natural community," and “community type.” These terms all denote "a plant community of definite floristic composition, presenting a uniform physiognomy, and growing in uniform habitat conditions" (Third International Botanical Congress 1910). As used here, this concept applies to existing vegetation regardless of successional status.

Plant community naming conventions are as follows:

- a) Diagnostic upper canopy level species are named first. A dash (-) indicates that the next named species occurs within the same vegetation layer. A slash (/) indicates a change to a different layer.
- b) Parentheses are placed around named species when that species is not always present within a plot classified as a particular plant association. Species not in parentheses are assumed to have high constancy within that plant association.
- c) Plant nomenclature follows Kartesz (1994), except in cases where the taxonomic status of a taxon compels use of Weber and Wittmann (1992).

CHAPTER 5: COUNTY OCCURRENCES

boreal toad Southern Rocky Mtn. population
(*Bufo boreas* Pop 1)

Bell's twinpod
(*Physaria bellii*)

Mountain Plover
(*Charadrius montanus*)

Three-sided bullrush and plains cottonwood / Switchgrass
(*Scripus pungens* and *Populus deltoides* spp. *monolifera* / *Panicum virgatum*)

County: Adams

Amphibians

Scientific Name

Rana pipiens

Common Name

northern leopard frog
