Denver, Colorado, September 26th. 1904.

Director Agricultural Experimental Station,
Fort Collins, Colo.

Dear Sir:

A young Belgian to whom I have forwarded, some time ago, the prospectus and literature of your school is studying for the present at Amherst where he will stay until Easter.

He is desirous to come at that time and study at Fort Collins to take a short course.

Kindly advise me what you require of him. I know that before returning to Belgium he wants to understand your system of irrigation.

Respectfully yours,

Belgian Consul.
