

CREAM AT THE TOP

I have known for a long time, cream comes to the top
of sitting milk.
This phenomenon is nature's plan of separation of milk.
Cream is used in many many fashions, seems to be richer in ways.
Got a family newsletter today, stating a trip to Israel
by a family.
Father, mother, son and daughter seeing a part of the Middle East.
It is good for different casts of life to observe one another.
What is really expected of life depends on what one works with.
Each person does have a mind all his own. Just theirs,
nobody else's.
I reckon it boils down to those that have and
those that don't have.
Minds, intelligence, means, curiosity, wanting to
observe other cultures.
There is no reason not to look see the glory
of other civilizations,
Going to the top most pedigreed colleges and universities
for education.
Preparing for the demands of higher echelons status
must be a chore.
That is, if there are ways and means to make the climb.
For just what?
Over the years, learning, education, progress, do play a part.
Times do change.
For just who, except the beneficiary the world can be made better?
What is the price if one sells their soul for money,
power and glory?
There are far more souls that know only the poor
downtrodden side of life.
Only the countless numbers know not what luxury is.
I do not begrudge these folk such a trip in any way,
(their business).
It only pointed out to me, after all these years,
what a difference there is.
Which side of the tracks and what chance each does have.
Longing for a better life on this earth must go back
to the beginning,
For people to leave their native land in hopes of
a better life elsewhere.
Seems as though there will never be a balance.
The rich get richer and the poor get poorer.
The angles get sharper, the calls are closer
of what's right, what's wrong.
But don't worry, all of it will get sorted out someday, somehow.
The learning, the wealth and knowledge all will be here on earth,
When it's time to go.
