INTERNATIONAL CONFERENCE ON
OIL SHALE AND SHALE OIL

CONTENTS

PREFACE
Y. J. Zhu (China) ................................................................. 1

KEYNOTE ADDRESS
Prospect of Oil Shale and Shale Oil Industry
X. L. Hou (China) ............................................................... 7

Ahead Of Our time
J. H. Gary (USA) ............................................................... 19

SECTION I  GEOLOGY OF OIL SHALE
Geological Types of Oil Shale Deposits in China
X. C. Ma and S. C. Yin (China) .............................................. 25

Feature of Distribution and Suggestion on the Development and Utilization of Oil Shale in China
L. Y. Zhao and T. S. Wang (China) ......................................... 29

The Geology of New Brunswick Oil Shales, Eastern Canada
F. D. Ball and G. Macauley (Canada) ...................................... 34
### The Conditions of Kukersite Deposition
V. Puura, H. Bauert and R. Mannil (USSR) ........................................ 42

### Commercial Zonation of the Estonia Oil Shale Deposit
V. Kattai and V. Puura (USSR) .......................................................... 51

## SECTION II  CHEMISTRY AND GEOCHEMISTRY OF OIL SHALE

### The Relationship between Oil Shales and Low-Matured Heavy Oil Pools in Huanghua Depression
Z. R. Wang, R. Z. Qin and M. Lei (China) .......................................... 61

### Organic Geochemistry of the Onshore Kimmeridge Clay Oil Shale of Britain
P. F. V. Williams (U. K) ................................................................. 73

### Variations in the Composition of Sterans and Triterpanes in Oil Shales of Different Origins and Stages of Maturity
E. Bondar (USSR) ................................................................. 85

### The Petroporphyrins in Several Oil Shales, China
Z. Q. Liao and D. F. Huang (China) .......................................... 92

### Investigation of the Structure of Kerogens based on the Oxidation Products from Multistep Alkaline Permanganate Degradation
Q. S. Yang, R. J. Xie, Z. Y. Cao, S. X. Li, G. Z. Zhang and W. Y. Fan (China) .......................................... 101

### Structural Characterization of the Kerogen from Pumpherston Oil Shale
D. Vitorovic (Yugoslavia), A. Ambles (France), S. Bajc, O. Cvetkovic and D. Milojkovic (Yugoslavia) ............... 110
Dissociation of Organic and Mineral Matrix of Maoming Oil Shale at Low Temperature and Ambient Atmosphere
S. K. Lee, H. J. Lian and T. F. Yen (USA) ......................... 112

Thermal Properties of Chinese Oil Shale:
Measurement of Thermal Conductivity of Oil Shale
S. X. Lu, T. F. Wang, M. Guan, and Y. Huang (China) ......................... 120

High Resolution Transmission Microscopy (TEM) in the Study of Oil Shales
M. Gilkson (Australia) .................................................. 127

Neutron Activation Analysis Possibilities for the Elemental Composition Research in Oil Shales, Oil-Bituminous Rocks, Petroleum and their Fractions
V. P. Solodukhin, G. M. Kabirova, and V. V. Smetannikov (USSR) ......................... 136

Comparison between Chinese and Colorado Oil Shales
D. S. Laity, B. K. Lok and C. R. Hsieh (USA) ......................... 137

Factors Affecting the Results of Fischer Assay of Oil Shale
J. Y. Chen and C. S. Liu (China) ........................................ 145

SECTION III PROCESSING OF OIL SHALE
SECTION III-A PRODUCTION OF CHEMICALS
Potential Production of Specialty Chemicals from Oil Shale in the United States
J. E. Sinor (USA) ...................................................... 159
A Study of Oxidation Technique of Oil Shale
Z. Y. Cao, Q. R. Zhao, Q. S. Yang, S. X. Li,
G. Z. Zhang and G. Z. Nan (China) ........................................ 167

Some Aspects of Nonfuel Utilization of Oil Shales
based on their Oxidation
V. Rein (USSR) ................................................................. 176

The Electrochemical Oxidation of Oil Shale
Y. F. Zhao, H. Y. Chi and H. Dai (China) ..................................... 179

SECTION III-B EXTRATION AND LIQUEFACTION

Hydroretorting, Rock Eval and Fisher Assay
Analysis of Some World Oil Shales
J. R. Dyni and D. E. Anders (USA) ........................................... 191

Supercritical Extraction of Chinese Oil Shales
S. C. Guo, H. Q. Hu, R. Wang,
W. Han and G. W. Huang (China) ........................................... 193

Comparison of Extracts and Yields from the Thermal
Solution of a Typical Green River Oil Shale and a
Sunbury Oil Shale
A. L. Tyler, D. R. Leavitt and
A. S. Kafesjian (USA) ......................................................... 201

Liquefaction of Oil Shales in Different Solvents
and Reagents
H. E. Luik, I. R. Klesment
and J. T. Teder (USSR) .................................................... 208
Liquid Fuel from Oil Shales by Hydrogenation and Aqueous Conversion
   L. Nappa and I. Klesment (USSR) ........................................ 216

SECTION III-C   PYROLYSIS AND ITS KINETICS

Drying Mechanism and Kinetics Model of Lump-Size Maoming Oil Shale with High Moisture Content
   J. Q. Wang, F. C. Ding, S. Y. Li,
   and J. L. Qian (China) ................................................... 225

Study on the Viability of Upgrading Brazilian Shale Fines through Floatation
   R. M. P. Wodtke and R. C. Carrisso (Brazil) .......................... 233

Thermal Decomposition of new Brunswick Oil Shale
   D. Karman and B. Hender (Canada) ................................. 235

Isothermal Pyrolysis and Char Combustion of Oil Shales
   T.T. Coburn, R. W. Taylor, C. J. Morris,
   and V. Duval (USA) ...................................................... 245

A Study on the Kinetics of Kerogen Pyrolysis by means of Pressure Differential Scanning Calorimetry
   S. X. Lu, T. F. Wang, D. J. Shen,
   Y. L. Zhang and K. Z. Qin (China) .............................. 253

Investigation on Pyrolysis of Huangxian Oil Shale between 550-750°C
   J. T. Yang (China) ....................................................... 263

</table>
Comparison of Fischer Assay Shale Oils Produced from Different Oil Shales
   R. Y. Wu (China),
   S. L. Chong and F. P. Miknis (USA) ........................................ 327

Kinetics of Cracking and coking of Oil shale Vapors and their Relevance to the Processing of Australian Oil Shales
   G. C. Wall and P. Udaja (Australia) ........................................... 335

SECTION III-D  RETORTING TECHNOLOGY

Fluidized Bed Retorting of Australian Oil shales
   N. V. Dung and P. Udaja (Australia) ........................................... 345

Reactor-Combustor Fluidized Bed Retorting of Maoming Oil Shale
   R. T. Luo (China) ................................................................. 353

Development of an Oil Shale Fines Pyrolysis Technology
   A. C. L. Lisboa (Brazil) ......................................................... 360

Oil Shale Retoring in Dense Phase Hot-Solid Recycle Systems
   R. J. Cena and R. W. Taylor (USA) ............................................. 361

Retorting of Four Kinds of Small Size Oil Shale with an Inclining Type Continuous Retort
   M. Enomoto, S. Takahashi and S. Sato (Japan) ............................... 369

Design of a New Oil Shale Retort for China's Fushun Region
   H. E. Nuttall (USA) and C. J. Du (China) .................................... 376
Maoming and Huadian Oil Shale Retorting
Using Solid Heat Carrier
S. C. Guo, C. Q. Luo, Z. Han,
L. B. You and W. Han (China) ........................................ 384

Development of Oil Shale Retorting Plant in Japan
Part I Construction of the Pilot Plant
T. Yabushita (Japan) ...................................................... 392

Development of Oil Shale Retorting Plant in Japan
Part II Operation of the Pilot Plant
T. Yabushita, K. Yuta and T. Oki (Japan) ............................. 400

Large Capacity Aggregates for Retorting
Lump Oil Shale
V. M. Yefimov, Riik, Rooks,
and Nazinin (USSR) ...................................................... 408

Technical Features of Fushun-Type Retort Today
X. G. Wang and G. Z. Huang (China) ................................. 409

Oil Shale Retorting Technology in Maoming
Y. H. Lin (China) .......................................................... 415

Advances in Fragmentation for In-Situ Bed Production
K. Britton (USA) ............................................................ 424

The Significance of Dilatancy to In-Situ Bed Preparation
K. Britton (USA) ............................................................ 432

Modified In Situ Technology Combined with Aboveground
Retorting and Circulating Fluid Bed Combustors Could
Offer a Viable Method to Unlock Oil Shale Reserves
in the Near Future
J. Hulsebos, B.P. Pohani, R.E. Moore, R.L. Zahradnik (USA) .... 440
SECTION IV CHEMISTRY AND UPGRADING OF SHALE OIL

Preliminary Study on Hydrotreating of a High Sulfur Content Shale Oil
Z. H. Zhu, K. Z. Qin, T. F. Wang,
Y. J. Zhu and Y. P. Zhang (China) ......................... 451

UNOCAL Corporation's Commercial Experience in Upgrading Shale Oil to Produce a High Quality Syncrude
C. P. Reeg, J. H. Duir and A. C. Randle (USA) .................. 461

Upgrading Julia Creek Shale Oil
- Syncrude or Fully Refined Products
L. C. Stephenson, A. Muradian, C. J. R. Fookes,
A. R. Atkins and C. K. Walters (Australia) ......................... 470

Upgrading of Shale Oil by an Ebullated-Bed Reactor
M. Hayashi, F. Kohno, T. Masuda,
N. Shinoda, T. Shimada, M. Kaneko,
H. Fujita and S. Ohmoto (Japan) ................................. 478

A New Scheme for Upgrading Fushun Shale Oil
H. Y. Qian and H. Y. Tian (China) ................................. 486

SECTION V COMBUSTION

A Study on the Combustion Kinetics of Fushun and Maoming Shale Char Particles
X. Q. Wang, M. Lin, J. L. Qian,
and Y. J. Zhu (China) .................................................. 495
The Self-Desulphurating Characteristics of High Sulphur Oil Shale in Fluidized Bed Combustor

Z. Z. Fu, G. Q. Lu and B. Q. Liu (China) ........................................... 506

Fluidized Bed Combustion of the Oil Shale

S. Vanichseni, K. Silapabunleng, V. Chongvisal, and P. Prasertdham (Thailand) .................................................. 514

Fluid-Bed Boiler Burning Particulate Oil Shale

Y. Z. Chen and Y. Q. Que (China) .................................................. 527

Utilization of High-Sulfur Shale Oil in Power Plant Integrated with Gasification System

Y. A. Vyskubenko, V. M. Maslennikov, and E. A. Tsalko (USSR) .................................................. 533

Thermal Fatigue Cracking of Estonian Oil Shale Fired Boilers's Tubes Caused by On-Load Water Deslagging

R. Touart (USSR) .................................................. 536

SECTION VI SHALE ASH UTILIZATION

Multipurpose Use of Shale Ash and its Paragenetic Mineral in China

G. S. Tian, X. S. Zhou, Z. P. Han, Z. H. Xu and X. L. Li (China) .................................................. 547

Properties of Shale Ash (Taken From the Boiling Furnace) Portland Cement

Z. P. Han and Q. H. Xiao (China) .................................................. 552

Investigation on the Portland Pozzolana Cement with More Shale Ash Content

G. S. Tian, X. S. Zhou, Z. P. Han and X. L. Li (China) ............... 559
Studies on Strength and Workability of High-Strength Flowing Concrete Utilizing Low Calcium Oil Shale Ash

Z. M. Wang, H. Z. Lia, M. Z. Li,
and R. T. Luo (China) ........................................... 565

SECTION VII ENVIRONMENTAL IMPACT

Prevention of Oil Shale Dust Explosions

M. Hertzberg and K. L. Cashdollar (JSA) .......................... 575

Preferred Explosives for Blasting in Oil Shale Mines

E. S. Weiss, M. J. Sacko and R. W. Watson (USA) .............. 584

Sorption of Pyridine and Quinoline onto Rundle Spent Shale

S. Zhu, P. R. F. Ball,
and P. F. Greenfield (Australia) ................................. 592

Identification and Treatability of Organics in the Waste Water from Oil Shale Retorting Units

M. C. Yao and D. N. Xie (China) .................................. 593

Industrial Testing of Retorting Waste Water Treatment in Towered Biological Filtration Pond

M. C. Cai, K. X. Jin, Z. H. Zhu,
B. J. Yi and Q. Ye (China) ....................................... 603

SECTION VIII INDUSTRIAL DEVELOPMENT ASSESSMENT

Status of Oil Shale Developments and Supporting Research in Australia

P. G. Alfredson and A. J. Gannon (Australia) .................... 613
The Swedish Shale Gasification Research Program
L. A. Andersson and I. Bjerle (Sweden) ............................... 621

The Current Situation with Respect to Oil Shale Research and
the Use of Oil Shale in the Federal Republic of Germany
H. H. Schmitz (Federal Republic of Germany) ....................... 632

Oil Shale Activities in Morocco
O. Bekri (Morocco) ..................................................... 634

Oil Shale Industrialization in Brazil
A. R. D. Batista and K. Terabe (Brazil) .............................. 635

Initiation and Development of Oil Shale Fluidized-
Bed Boilers in China
Z. Y. Zhao (China) ..................................................... 643

Utilization of Estonian Oil Shale at Thermal Power Plants
A. Ots (USSR) ............................................................ 650

Sixty Years of Oil Shale Retorting Industry in Fushun
J. Yan and G. F. Liu (China) .......................................... 658

Economic Assessment of the Fushun Type
Commercial Shale Oil Plant
C. N. Li and G. L. Yan (China) ....................................... 663

Shale Oil Industry in Maoming
G. Q. Shi (China) ....................................................... 670

Some Ideas on the Development of Maoming
Oil Shale and Shale Oil Industry
G. P. Liang, G. Q. Shi and Y. S. Yang (China) ...................... 679

Oil Shale in Central Jordan
Y. M. Hamarneh (Jordan) .............................................. 686
