CONTENTS

HIGHLIGHTS A-1

I. GENERAL

GOVERNMENT

Energy Secretary Announces Oil and Gas Initiative 1-1
DOE's 1994 Budget Request Shows Shift in Priorities 1-1

ENERGY POLICY AND FORECASTS

NERA Expects Real Oil Price of $30 in Year 2000 1-4

TECHNOLOGY

Residue Upgrading Choices Multiply 1-6

INTERNATIONAL

Biomass Gasification to be Tested in Sweden 1-9
U.N. Funds Biomass Gasification in Brazil 1-10

ENVIRONMENT

EPRI Compares Global Warming Mitigation Strategies 1-11

COMING EVENTS

1-13

II. OIL SHALE

PROJECT ACTIVITIES

PAMA to Start Up Retorting Pilot Plant in 1994 2-1
Australian Election Results Are Good News for Oil Shale 2-1

CORPORATIONS

NaTec to Focus on Flue Gas Desulfurization Market 2-2

GOVERNMENT

BLM Receives Three Expressions of Interest in White River Property 2-3

TECHNOLOGY

Shale Oil Tested as Source for Carbon Fibers 2-4
Geokinetics Tested Rocket Fuels to Create horizontal Fracturing 2-5

SYNTHETIC FUELS REPORT, JUNE 1993
INTERNATIONAL

Former Shale Oil Refinery in China Now Important Wax Producer
Luxembourg Oil Shale Described
Russian Technology Proposed for Shale-Fired Powerplants in Israel
JOSECO Pilot Plant Designed Elaborated
Oil Shale Ash Finds Use as Fertilizer in Estonia

WATER

Arizona May Fight Plan to Lease Oil Shale Water Rights to Nevada
U.S. FWS to Designate Critical Habitat for Colorado River Fish Species

RESOURCE

Oil Shale Reserves to be Assessed for Oil and Gas Potential

STATUS OF OIL SHALE PROJECTS

INDEX OF COMPANY INTERESTS

III. OIL SANDS

PROJECT ACTIVITIES

- Imperial Will Put Phases 7 and 8 in Operation at Cold Lake
- Startup of Bi-Provincial Upgrader Described
- Suncor Sets Record, Awards Contracts

CORPORATIONS

- Sun Notes Decline at Suncor in 1992
- Gulf Canada Notes Oil Sands Holdings
- Ontario Sells Suncor Stake

ECONOMICS

- Bitumen Supply Costs From UTF Projected to be Less Than $10 Per Barrel
- Mobile Equipment Found Most Economical for Canadian Oil Sands Mining

TECHNOLOGY

- Top-Down In Situ Combustion Process Revealed
- Whiterocks Oil Sands Pyrolysis Liquid Yield Improved
- Synthetic Crude Offers Advantages to Refiners
- Asphaltenes Rejected From Bitumen By Supercritical Extraction
- Freeze/Thaw Disposal System Proposed for Fine Tailings
- Emulsified Bitumen Vacuum Bottoms Proposed as New Fuel Product
- Coprocessing of Bitumen and Coal Yields High Quality Liquids
- Hydrotransport a Key Technology at Syncrude

INTERNATIONAL

- Production and Upgrading Projects Proposed for Orinoco Tar Belt
- Orimulsion Passes 3 Million Tonnes, Reaches for New Markets
IV. COAL

PROJECT ACTIVITIES

Great Plains Makes Profits and Progress
Amax Running 5-Ton-Per-Hour Briquetting Plant
Testing Completed on TRW Molten Caustic Leaching Process
West Virginia IGCC Project Dies

CORPORATIONS

Gasification Research Continuing at EERC

GOVERNMENT

DOE Updates Status of Clean Coal Technology Program
New Funding Provided for British Clean Coal Research
Energy Policy Act Provides Large Incentives for Coal Upgrading
Clean Coal Round V Winners Announced
DOE Defines Strategy for Indirect Liquefaction Research

ECONOMICS

Gasification Combined Cycle Seen More Economic Than Natural Gas Soon After 2000
Coal Gasification With Molten Carbonate Fuel Cells Approaching Competitive Position
Critical Costs Delineated for Alcohol Fuels From Coal

TECHNOLOGY

Fullerenes Made Directly From Coke
Mild Pre-Treatment Improves Liquefaction Reactivity
Transmission Electron Microscopy Sheds Light on Gasification of Brown Coal
PyGas Process Described
Petroleum Coke Makes Good Feedstock for Texaco Gasifier
Hopes are High for Molten Carbonate Fuel Cells

INTERNATIONAL

China to Study SGI Process
International Gasification Projects Proliferate
V. NATURAL GAS

PROJECT ACTIVITIES

Mossgas Achieves Commercial Status
Shell MDS Plant Starts Up in Malaysia

CORPORATIONS

Mobil Sells Its Share of New Zealand Synfuels

TECHNOLOGY

Exxon Gas Conversion Process Ready for Commercialization

RESOURCE

NPC Report Estimates U.S. Gas Potential at 1,300 Trillion Cubic Feet

STATUS OF NATURAL GAS PROJECTS
