

CONTENTS

HIGHLIGHTS	A-1
-------------------	-----

I. GENERAL

GOVERNMENT	
DOE Fossil Energy Budget Realigned for 1994	1-1
U.S. DOE and Russian Federation to Cooperate in Fossil Energy	1-2
ECONOMICS	
MITRE Estimates Synthetic Transport Fuels to Cost \$36 Per Barrel	1-3
TECHNOLOGY	
Hot Gas Cleanup Studied for Biomass Gasification	1-6
INTERNATIONAL	
Methanol Tested as Turbine Fuel in Japan	1-9
IGCC Project in the United Kingdom Could Use Both Orimulsion and Coal	1-9
RESOURCE	
U.S. Reserves of Gas and Oil Declined in 1992	1-10
COMING EVENTS	1-11

II. OIL SHALE

PROJECT ACTIVITIES	
LLNL Retort Project Without Funds—Status Reviewed	2-1
Nahcolite Mine Producing From Oil Shale Basin in Colorado	2-4
Petrosix Project Status Updated	2-4
New Paraho Reports Favorable Results From Ongoing Test Program	2-7
Southern Pacific Petroleum Reports Continued Progress on Stuart Project	2-12
GOVERNMENT	
Corrective Action Plan Released for Naval Oil Shale Reserves	2-14
ECONOMICS	
Economic Parameters for Shale Oil Production Listed	2-15
Baltic Shale Oil Produces Commercial Non-Fuel Materials	2-16
Potential Seen for Byproducts From Eastern Oil Shale	2-18
Shale Oil Value Enhancement Research Targets Byproducts From Western Oil Shale	2-19
TECHNOLOGY	
Oil Shale Could Be Feedstock for Carbon Materials	2-23
First Hot Runs Reported With 50-Pound Per Hour KENTORT Unit	2-23
Combined Retorting/Upgrading Process Could Cut Costs	2-26
Concrete Formulated With Oil Shale Ash Shows Good Properties	2-27

INTERNATIONAL	
Substantial New Oil Shale Deposit Defined in Israel	2-31
Nitrogen-Containing Compounds in Chinese Light Shale Oils Identified	2-31
DOE and World Bank Reports Analyze Oil Shale Position in Estonian Energy Sector	2-33
Chinese Geological Atlases Completed, Cooperation Sought	2-35
OIL SHALE PUBLICATIONS	2-36
STATUS OF OIL SHALE PROJECTS	2-38
INDEX OF COMPANY INTERESTS	2-54

III. OIL SANDS

PROJECT ACTIVITIES	
CIM Reviews Syncrude Story	3-1
Bitmin Resources Building CCDS Pilot Plant	3-2
Suncor Takes Position in UTF Project	3-3
New Funding Pending for NewGrade Upgrader	3-4
CORPORATIONS	
Murphy Oil Buys Interest in Syncrude	3-6
Express Pipeline Withdraws NEB Application	3-6
Suncor Oil Sands Profitability Improves	3-6
Solv-Ex Pursuing Mineral Extraction	3-7
Buenaventura Resources Plans to Develop New Tar Sand Extraction Process	3-9
GOVERNMENT	
Oil Sands Orders and Approvals Listed	3-11
Utah Tar Sands Development Potential Affected by Diamond Mountain Plan	3-11
ECONOMICS	
Product Shift Increases Value at Suncor Plant	3-16
Economic Advantage Seen for AOSTRA Taciuk Process	3-17
TECHNOLOGY	
Coal Used as Adsorbent for Bitumen Recovery From Fine Tailings	3-21
Novel Bitumen Upgrading Concepts Being Studied at CANMET	3-23
INTERNATIONAL	
Venezuela Approves Orinoco Joint Ventures	3-27
Orimulsion Makes Marketing Progress	3-27
ENVIRONMENT	
Technologies for Reducing Environmental Impact of Fine Tails Cataloged	3-29
OIL SANDS PUBLICATIONS	3-31
STATUS OF OIL SANDS PROJECTS	3-33
INDEX OF COMPANY INTERESTS	3-59

IV. COAL

PROJECT ACTIVITIES

Coal-to-Methanol Project Moves to Eastman Site in Tennessee	4-1
North Dakota Provides Funds for Byproduct Development at Great Plains	4-1
ThermoChem Will Demonstrate Gasification/Pulsed Combustion at Wyoming Site	4-2
Agreement Reached on Healy Clean Coal Project in Alaska	4-4
IGT/Kerr-McGee Mild Gasification Pilot Plant Will Produce Value-Added Coproducts	4-4
Morgantown PyGas Facility Described	4-5
ABB Combustion Engineering's Technology for City Water Light and Power Project Described	4-7
Design and Permitting Issues Detailed for Pinon Pine Project	4-10
Duke Energy Project Will Use BGL Gasifier	4-11
DOE/SCS Power Systems Development Facility Reaches 50 Percent Completion	4-14

CORPORATIONS

Fossil Fuel Liquefaction Consortium Tackles Coliquefaction of Coal and Waste	4-16
SGI is Expanding Its Clean Coal Refineries Programs in Asia	4-17

GOVERNMENT

GAO Reviews the Magnetohydrodynamics Program	4-20
----------------------------------------------	------

ECONOMICS

Coal-Derived Alcohols Deemed Competitive With MTBE for Transport Fuels	4-24
------------------------------------------------------------------------	------

TECHNOLOGY

Coliquefaction of Waste Plastic With Coal Tested	4-27
Foster Wheeler Studying Partial Gasification Combined-Cycle System	4-28
Scrap Tires Could Serve as Hydrogen Donors for Coal Liquefaction	4-30
Dimethyl Ether Route for Syngas-to-Gasoline Improves on Methanol-to-Gasoline Process	4-31
Evolution of HRI's Coal Liquefaction Technologies Described	4-34
Coproduction of Iron and Methanol Proposed	4-36
IEA Coal Research Sees Potential for Coal in Fuel Cells	4-38

INTERNATIONAL

North Dakota Researchers to Explore Underground Gasification Possibilities in Thailand	4-40
European THERMIE Program Supports IGCC Technology	4-40
China's Coal Mining Sector Hopes to Diversify	4-42
GSP Dust Pressure Gasification Process Available for Development	4-42
Eight Coal Gasification Projects Listed in China	4-44
Development of CRE Topping Cycle Summarized	4-44
Repowering of Polish Powerplants With IGCC Under Study	4-47

ENVIRONMENT

IGCC Plants Found Advantageous if Carbon Dioxide Capture is Required	4-52
In Situ Bioremediation Promising for Cleanup at Old Gas Manufacturing Plants	4-53

COAL PUBLICATIONS

4-57

STATUS OF COAL PROJECTS

4-61

INDEX OF COMPANY INTERESTS

4-98

V. NATURAL GAS

PROJECT ACTIVITIES

New Zealand Synfuel Plant Cuts Back	5-1
Shell's Gas to Distillates Plant Back On Line	5-1

CORPORATIONS

Amoco and Argonne Initiate Joint Project for Methane Conversion Research	5-2
Rentech Gas-to-Liquids Technology Makes Progress	5-2

GOVERNMENT

PETC's Natural-Gas-to-Liquids Program Reviewed	5-3
------------------------------------------------	-----

ENERGY POLICY AND FORECASTS

NERA Forecast Sees Gas Prices Falling, Then Rising to 2005	5-5
------------------------------------------------------------	-----

RESOURCE

Shell Profile Details World Natural Gas Resources	5-7
---------------------------------------------------	-----

NATURAL GAS PUBLICATIONS

5-8

STATUS OF NATURAL GAS PROJECTS

5-9
