CONTENTS

HIGHLIGHTS

I. GENERAL

CORPORATIONS
IGT Highlights Research Efforts in Natural Gas and Coal Conversion 1-1

GOVERNMENT
Clinton Administration Releases Domestic Oil and Gas Plan 1-3
National Research Council Makes Recommendations for DOE Fossil Energy Research 1-5

ENERGY POLICY AND FORECASTS
Battelle Forecasts Slight Increase in Overall R&D Spending for 1994 1-10
United States Dependence On Oil Imports Continues to Climb 1-11
World Energy Council Foresees Big Increases in Energy Demand By 2020 1-12
Bechtel Sees Need for 100 GW of New U.S. Generating Capacity in Next 10 Years 1-17

ECONOMICS
Attractive Subsidies are Available for Biomass Gasification 1-20

TECHNOLOGY
New Small Business Innovation Research Projects Described 1-23

INTERNATIONAL
Finnish Companies Making Progress in Pressurized Gasification 1-25
Wood Gasifier Being Developed in Brazil 1-26

COMING EVENTS

II. OIL SHALE

PROJECT ACTIVITIES
Little Change Reported on Status of Stuart Project 2-1

CORPORATIONS
Ramex Gets Financing for Further Oil Shale Gasification Work 2-2

ECONOMICS
Byproduct Market Possibilities Examined for Eastern Oil Shale 2-3

TECHNOLOGY
New Opportunities Seen for High-Value Chemicals From Shale 2-8
Recent Oil Shale Patents Listed 2-9
Solar Gasification of Oil Shale Proposed 2-10

SYNTHETIC FUELS REPORT, MARCH 1994
III. OIL SANDS

PROJECT ACTIVITIES
- Oil Sands Production Figures Updated 3-1
- Imperial Oil Defers Phases 9 and 10 at Cold Lake 3-1
- Shell Canada Testing SAGD Process at Peace River 3-2

CORPORATIONS
- Canadians to Pool Resources for Oil Sands R&D 3-4

GOVERNMENT
- Oil Sands Orders and Approvals Listed 3-5

TECHNOLOGY
- Recent Oil Sands Patents Listed 3-7
- In Situ Combustion in Canadian Heavy Oil Reservoirs Reviewed 3-8
- Supercritical Fluid Extraction of Oil Sand Bitumen Studied 3-11
- Steam-Assisted Gravity Drainage Becoming Proven Technology for Oil Sands and Heavy Oil 3-13

INTERNATIONAL
- Intevep Plans Heavy Crude Processing Plant 3-17
- Orimulsion Picks Up Support in Europe and Canada 3-17

RESOURCE
- Heavy Oil Potential in Alaska Studied 3-18

STATUS OF OIL SANDS PROJECTS 3-21

INDEX OF COMPANY INTERESTS 3-47
IV. COAL

PROJECT ACTIVITIES
ENCOAL Plant Starts Up Again 4-1
Advances Made in Shell-Based IGCC Plant Design 4-1
Groundbreaking Set for 2-Megawatt Molten Carbonate Fuel Cell 4-4
Great Plains Project Building Scrubbers for Coal Lock Vent Gases 4-4
Healy Clean Coal Project Hits Snag 4-5
TVA Cancels Work on Coproduction Power and Fertilizer Concept 4-5
Western Energy SynCoal Process May Find a Customer 4-5
Carbonate Fuel Cell Being Tested in Slipstream at Destec Gasification Facility 4-6

CORPORATIONS
Proof-of-Concept Liquefaction Facility Dedicated at HRI 4-8

GOVERNMENT
Status of Clean Coal Technology Projects Updated 4-9

ENERGY POLICY AND FORECASTS
$25 Billion in Gasification Projects Already Committed 4-11

ECONOMICS
MITRE Finds Direct Liquefaction More Economical Than Indirect 4-12
IGCASH Cycle Shows Promise for Intermediate Load Applications 4-14
Baseload Power Generation Technologies Compared By Black and Veatch 4-16

TECHNOLOGY
History of Dispersed Catalysts in Coal Liquefaction Reviewed 4-22
Hot-Gas Particulate Removal Systems Studied for IGCC Applications 4-24
Liquid Phase Methanol Attractive for Dispatchable Energy Storage 4-26
Lignite Overburden From Clay Mining Could Be Retorted 4-29
Air-Blown Versus Oxygen-Blown PRENFL0 Gasifiers Compared 4-31
Aromatic Polymer Precursors Could Provide a New Direction for Coal Chemicals 4-33

INTERNATIONAL
CRE Gasifier Developed for Topping Cycle 4-35
Gasification Projects Progressing in China 4-37
Puertollano IGCC Project to Be Operational in 1996 4-38
KoBra Project Using HTW Gasifier Scheduled for Commissioning in 1996 4-40
Buggenum IGCC Plant Ready for Demonstration 4-42

ENVIRONMENT
Fugitive Emissions at Cool Water Were Low 4-45
Environmental Impacts at Wabash River Gasification Project Addressed 4-46
Coal Agglomeration Process Cleans Up Tar at Gas Plant Sites 4-49

RESOURCE
U.S. Coal Production and Reserves Updated 4-51
Record United States Coal Production Forecast for 1994 4-53

STATUS OF COAL PROJECTS
4-56

INDEX OF COMPANY INTERESTS
4-106

SYNTHETIC FUELS REPORT, MARCH 1994
V. NATURAL GAS

TECHNOLOGY
DOE Contractors Report Progress in Natural Gas Conversion 5-1
New Methane Conversion Process Doubles Yield of C₂ Chemicals 5-3

INTERNATIONAL
China Makes Bid to Develop Coal-Bed Methane 5-4

RESOURCE
Forty Trillion Cubic Feet of Natural Gas Identified in Hydrates on Alaskan North Slope 5-5

STATUS OF NATURAL GAS PROJECTS 5-6
