Red Buttes 1:24,000-scale Geologic Map

MAP SERIES 76

EXPLANATION

DESCRIPTION OF MAP FEATURES

Possible fault deposits
Unconsolidated and poorly cemented clay, silt, sand, and gravel loosely in place and not exposed, not associated with a fault.

Isolated fault deposits
Scattered small deposits, poorly cemented clay, silt, sand, and gravel located in fault-displaced environment. Thickness varies from 0 to 5 feet. Located near graben fault and basin fault.

Geologic features

UTM grid, Wyoming State Plane Coordinate System
