Community At Risk Information			
<b>Name of Project:</b>	Ward Property		
<b>Community Name(s):</b>	Sunshine Canyon		
<b>County:</b>	Boulder	<b>Congressional District:</b>	2 <sup>nd</sup>
<b>Latitude (decimal degrees):</b>	40.05 N	<b>Longitude (decimal degrees):</b>	105.348 W
Threat Description (check all that apply)			
<b>Homes:</b>	<input checked="" type="checkbox"/>	Number of:	1
<b>Businesses:</b>	<input type="checkbox"/>	Number of:	
<b>Watersheds:</b>	<input type="checkbox"/>	Number of:	
<b>Other (Describe):</b>			

Requested Grant Amount / Project Description	
All information for the project must fit into the space provided below. The review committee will not consider attachments.	
<b>Dollar Amount Requested May Not Exceed \$470 x Number of Acres Proposed For Treatment</b>	
<b>Dollar Amount Requested</b>	\$16,450.00
<b>Will this Project be conducted as a Pass-Through Grant?</b>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Provide a brief overview of the project and the project area. (If applying for a fuels reduction project, identify vegetation types)</b>	
<p>The property has had recent fire activity through the Four Mile Canyon Fire. Burn intensity ranges from moderate in some areas to severe in others. Vegetation consists of predominately ponderosa pine and douglas fir in the overstory, and rocky mountain juniper and random native grasses throughout the understory. Slopes throughout the project area range from mild to steep.</p>	

### Scope of Work / Project Timeline

All information for the project must fit into the space provided below. Attachments will not be considered by the review committee.

**Provide a brief scope of work that clearly describes how grant funds will be spent. (This should be more specific than the project description)**

4

Project funding will be used to conduct hazardous fuels reduction throughout the intended project area. In areas of moderate burn intensity, trees will be thinned from below to increase the residual crown spacing. Bole-wood material will be cut into manageable lengths and stacked for firewood consumption at a later time. Slash will be chipped, with no new depth to exceed 4 inches. In areas of severe burn intensity, trees will be thinned heavily, leaving many wildlife habitat trees (7-10/acre). Bole-wood will either be contour felled and used for erosion control purposes, or cut into manageable lengths and stacked for firewood consumption at a later time. Slash will be chipped where it can be reasonably reached or lopped and scattered (no new depth to exceed 18 inches) elsewhere. All remaining trees throughout the project area will be limbed, and all stumps cut as low as possible. All completed work will reflect CSFS standards of approvable forest management.

**Describe all planned long-term maintenance (grant funded or other).**

Landowner will continually monitor property for any new undesirable re-growth of trees, and remove upon detection. Landowner will also monitor maturing, growing vegetation, and continually remove limbs and other ladder fuels as they become present.

**What is the duration of this project? (check one)**  1 Year  2 Years  3 Years  4 Years

**Is this a continuing project from previous year/s? (check one)**  Yes  No

**Provide a timeline for the project**

Project work will begin as soon as funding is in place, and will continue through completion, which is targeted for Summer 2012

### Interagency Collaboration

**Specify the private, local, tribal, county, state, federal and/or non-governmental (501c3) organizations that will contribute to or participate in the completion of this project. Describe briefly the contributions each partner will make (i.e. – donating time/equipment, funding, etc.).**

5

None

### Community Wildfire Protection Plan (CWPP)

**Does this community have a wildfire protection plan that follows the Healthy Forest Restoration Act CWPP guidelines? (check one)**  yes  no

**Is this project part of the plan? (check one)**  yes  no
