	Contracted Services ¹	Landowner Services ²	Totals
Labor Cost	\$1,372.00	\$1,130.25	A Labor Cost = \$2,502.25
Operating Exp ^{3,*}	DID NOT KEEP RECEIPTS		B Oper. Exp. = 0
Revenue Generated (from sale of wood products only) ^{4,*}	SOLD 2 CORDS OF SPLIT WOOD		C Revenue = \$270.00
Project Cost			D Total Project (A+B-C) = \$2,232.25
			Amount Originally Approved = \$1,000.00
Reimbursable to Applicant ⁵			Amount to be Reimbursed = 1,000

¹ Any contracted services where payment was made for services.
² Use up to \$ 11.68/hour for Landowner time. This is the maximum allowable.
³ Equipment rental, supplies, etc. needed to complete project. (Tools and Equipment purchases are not reimbursable.)
⁴ Any revenue generated from the sale of wood products is deducted from total project cost.
⁵ Reimbursement amount cannot exceed amount approved. No partial payments.
* Attach receipts (contractor costs, your time ledger, gas, oil, etc). Keep copies for your files.

Landowner Signature: Clifford A. Doyle Date: 9/16/04
Mailing Address: 1140 E. BROADMOOR DR. City: LOVELAND
County: LARIMER State: CO. Zip: 80537 Phone: 970-667-5986
Practice certified by: Michael M. Anglin
Payment Approval: Jan J. Hackett Amount: \$1,000 Date: 9-15-04

Return this form, along with your completed Cost Documentation Form and W9 form to your local Colorado State Forest Service District Office. Retain documentation such as receipts and payment for six (6) years. The IRS considers reimbursable funds as ordinary income. Please consult your tax advisor.

July 15, 2004

Clifford Doyle
1140 E. Broadmoor Dr.
Loveland, CO 80537

Dear Clifford:

This is a reminder that your Forest Land Enhancement Program (FLEP) grant project must be completed by September 15, 2004.

As you recall, the FLEP Grant requires a 50/50 fund match. In your original packet you received an Accomplishment Report for Reimbursement, a Cost Document form, and a W9. Upon completion of the practice, contact our office to schedule a final inspection. All costs and revenues must be documented on the above forms. The W9 must be completed and returned to assure reimbursement. Final reimbursement cannot be processed without completion of these forms.

If you will be unable to complete the project, please notify us as soon as possible, so that we may adjust your grant and reallocate the remaining funds to other projects.

If you have any questions, please call me at (970) 491-8839, or Mike Hughes (970) 491-8453, or the Fort Collins District office (970) 491-8660.

Sincerely,

Norland K. Hall
Forester

FAX (970) 491-8645

September 16, 2003

Clifford Doyle
1140 E. Broadmoor Dr.
Loveland, CO 80537

Mr. Doyle,

Your Forest Land Enhancement Program (FLEP) grant application has been reviewed and funding approved as shown on the attached copy of your application. Our office received over \$120,000 in grant requests. Needless to say we were not able to fund all projects. In most cases, we were able to partially fund a project.

Before you begin project implementation please contact our office to schedule a site visit to review the project and accomplishment standards and expectations. We hope this alleviates any surprises when the final inspection is completed. Please review the attached standards prior to the site visit.

As you recall, the FLEP Grant requires a 50/50 fund match. The project must be completed by September 15, 2004. If it becomes apparent you will not be able to the project by this day, please contact our office as soon as possible.

Enclosed you will also find an Accomplishment Report for Reimbursement, a Cost Documentation form, and a W9. Upon completion of the practice contact our office to schedule a final inspection. All costs and revenues must be documented on the above forms. The W9 must be completed and returned to assure reimbursement. Final reimbursement cannot be processed without completion of these forms.

If you have any questions, please contact our office at (970) 491-8660.

Sincerely,

A handwritten signature in black ink that reads "David A. Farmer".

David A. Farmer
Assistant District Forester

Program eligibility is without regard to race, color, religion, national origin, age, gender, sexual orientation, veteran status or disability. For more information contact your local Colorado State Forest Service District Office.

The Forest Land Enhancement Program

The Program has been established to promote sustainable forest management practices on nonindustrial private forest (NIPF) lands. It provides financial, technical and educational assistance to NIPF landowners. It will replace both the Stewardship Incentives Program and Forestry Incentives Program. The new authority combines the better of the two previous cost-share programs into one and is now funded through mandatory Commodity Credit Corporation money to the tune of \$100 million over the life of the six-year bill (2002-2007).

States may use Program funds to assist landowners in managing their nonindustrial private forest lands and related resources through:

1. Development and implementation of educational programs;
2. Resource management expertise/technical assistance; and
3. Financial assistance/cost-share programs.
4. Funds may also be used to cover administrative costs.

Colorado's list of eligible practices:

FLEP 1-Forest Stewardship Plans
FLEP 2-Afforestation/Reforestation
FLEP 3-Forest Stand Improvement
FLEP 4-Agroforestry Implementation
FLEP 5-Water Quality Improvement and Watershed Protection
FLEP 6-Fish and Wildlife Habitat Improvement
FLEP 7-Forest Health and Protection
FLEP 8-Invasive Species Control
FLEP 9-Fire and Catastrophic Risk Reduction
FLEP 10-Fire and Catastrophic Event Rehabilitation
FLEP 11-Special Practices

Applications will be ranked according to priority resource issues.

No Program funds shall be used for capital investments, capital improvements, purchase of land or any interest in land, or any interest in an endowment.

Eligibility Requirements:

1. **Non-industrial Private Forest (NIPF) Landowners** qualify for FLEP. *Nonindustrial private forest land* means rural lands with existing tree cover or which are suitable for growing trees and owned by any landowner as defined in this subpart.

Landowner means any private individual, group, association, corporation, Indian tribe or other native group, or other private legal entity, excluding corporations whose stocks are publicly traded or legal entities principally engaged in the production of wood products.

2. A landowner is only eligible to receive cost-share funds under the Program for **treatment of not more than a total of 1,000 acres** of nonindustrial private forest land annually, except where the State Forester, with the concurrence of the Regional Forester, determines that significant public benefits would accrue from approval of a landowner treating up to 5,000 acres annually. Consideration should be given to cost-effective resource management objectives without unduly affecting Program participation of other eligible landowners.

3. A Forest Stewardship Plan is the only plan that may be cost-shared and is exempt from the acreage limitations described in subpart (b). Forest Stewardship plans are not subject to any acreage maximum, and therefore cost-sharing such a plan under the Program is not subject to the 1,000 or 5,000 acre limits.

4. To be eligible to receive cost-share under the Program, a landowner **shall not own less than 2 acres** of non-industrial private forestland (NIPF).

5. To be eligible to receive cost-share funds under the Program, a landowner must agree to conduct treatment according to the forest management plan and to **maintain Program practices for 10 years**, unless otherwise specified by the State Forester.

Management Plan

Eligible landowners shall have an approved management plan. The management plan shall apply to those portions of the landowner's property on which any project or activity funded under the Program shall be carried out, as well as lands affected by the activity or practice. Suggested outline:

1. Have a cover page with signatures lines.
2. Clearly state landowner objectives
3. Address resource elements present
4. Describe treatment and timeline to meet objectives.

FLEP practice #1 will cost-share a comprehensive Forest Stewardship plan.

Program Procedures

- Landowner contact local CSFS district office for application.
- Landowner with CSFS completes application and management plan.
- If approved a landowner must complete each practice within 12 months of approval.
- CSFS certifies practice has been completed in accordance with specifications.
- Landowner can receive payment up to 50% of actual project cost.

A practice may consist of one or more component activities. **A landowner may not receive partial payments.** No money may be received in advance.

5,6	580-1	Streambank and Shoreline Protection (rock -rip rap)	4	Cu. Yard	\$ 25.00
5,6	580-2	Streambank and Shoreline Protection (gabions, installed)	4	Cu. Yard	\$ 50.00
5	580-3	Streambank and Shoreline Protection (stream crossings)	4	Each	\$ 600.00
5	587	Structure for Water Control (culvert installation)	4	Each	\$ 400.00
2,3,10	595	Pest Management (herbaceous)	2	Acre	\$ 20.00
2,6,10	612-1	Tree/Shrub Establishment (seedling and planting)	4	Per Tree	\$ 1.50
2,10	612-2	Tree/Shrub Establishment (direct seeding)	2	Acre	\$ 50.00
6	648	Wildlife Water Facility (includes potholes)	4	Each	\$ 200.00
4	650	Windbreak/Shelterbelt Renovation (tree removal)	2	Acre	\$ 400.00

9	666-6.302	Defensible Space	4	Each	\$ 1,200.00

***Measurement Guidelines**

When measuring treatment area to determine cost-shared units, measure according to the following guidelines:

1. Landowner Forest Stewardship Plan Development (#30) acreage should include only actual acres planned. For a given property this must include all currently forested acreage and acreage planned to be treated by a FLEP practice. Plan acreage can include additional non-forested acreage only if those acres are specifically evaluated on a multiple resource basis and are included in long-term recommendations for the use of woody vegetation to meet landowner objectives.
2. Components that are intended to treat a “block” of land should be measured using standard area calculations based on the perimeter of the “block”.
3. Components intended to be conducted in a “linear” fashion. The linear feet installed or treated should be measured.
4. Components are simply cost-shared on a per unit or project basis.

COLORADO FOREST LAND ENHANCEMENT PROGRAM

COMPONENT LIST AND MEASUREMENT SPECIFICATIONS

The following list contains the Technical Practice Code, Description, Unit of measure, and per unit Maximum Cost-Share Rate for all eligible components of the Colorado Forest Land Enhancement Program. The **Maximum Cost- Share Rate represents 50% of the actual cost**, not to exceed the amount listed.

FLEP Practice	Code	COMPONENT DESCRIPTION	Measurement Guideline*	Unit	Maximum C/S Rate
1	30-1	Plan Development: (20-120 acres)	1	Acre	\$ 10.00
1	30-2	Plan Development: (121-320 acres)	1	Acre	\$ 7.50
1	30-3	Plan Development: (321 or more acres)	1	Acre	\$ 4.75 up to \$6,000 Max.
2,4-6,10	36	Tree Shelters	4	Each	\$ 1.00
3,6,8,9	314-1	Brush Management (chemical)	2	Acre	\$ 100.00
8	314-2	Brush Management (mechanical)	2	Acre	\$ 200.00
2,3,6,8	338-1	Prescribed Burn	2	Acre	\$ 100.00
9	338-2	Prescribed Burn (interface broadcast burn)	2	Acre	\$ 200.00
10	342-1	Critical Area Planting (seed and broadcast or drilling)	2	Acre	\$ 60.00
10	342-2	Critical Area Planting (contour log felling)	2	Acre	\$ 250.00
10	342-3	Critical Area Planting (straw wattles)	2	Acre	\$ 250.00
10	342-4	Critical Area Planting (gabions, installed)	4	Cu. Yard	\$ 50.00
4	380	Windbreak and Shelterbelt Establishment (includes seedlings, site preparation and planting)	4	Per Tree	\$ 1.00
2-8,10	382-1	Fencing (barbwire)	3	Foot	\$.75
2-8,10	382-2	Fencing (woven)	3	Foot	\$ 1.00
5	391	Riparian Forest Buffer (includes site prep, plants and planting)	4	Per Tree	\$ 2.50
2,3,4,9	394	Firebreak	3	Foot	\$.10
4	441	Irrigation System, Trickle/Drip (from on-site water source)	4	Per Tree	\$ 1.50
2,4,5,6,10	484-1	Mulching (weed barrier fabric or plastic with mulch cover, includes installation).	4	Sq. Foot	\$.05
10	484-2	Mulching (straw on seeded slopes)	2	Acre	\$150.00
2,10	490-1	Forest Site Preparation - Light	2	Acre	\$ 15.00
2,10	490-2	Forest Site Preparation - Medium	2	Acre	\$ 30.00
2,10	490-3	Forest Site Preparation - Heavy	2	Acre	\$ 45.00
5,6,8	550	Range Planting (seed and broadcast or drilling)	2	Acre	\$ 60.00
6	574	Spring Development	4	Each	\$ 750.00

Michael Hughes
Assistant District Forester
Fort Collins District

July 23, 2003

Dear Mike,

Please find attached my application for the Forest Land Enhancement Program. I have also included the objectives that were established at the beginning of our Forest Stewardship Plan. I entered the FLEP practice number FLEP-3 Forest Stand Improvement as the main practice. This entry could have been FLEP-9 Fire and Catastrophic Risk Reduction per Ray's assessment on the original plan (see page 9/plan page number) and the plan objectives.

The seedling request for only 60 trees is a function of Unit 5 being somewhat rocky plus we have already planted many trees in this area.

The resources present will be our families labor including 2 college kids looking for work.

The equipment used will be 2 trucks, 2 trailers, 4 chainsaws, and 1 woodsplitter.

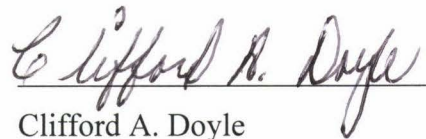

The timeline will be August 15, 2003 to August 14, 2004. This work area is hard to get to in snow. It's on the back steep road.

The main intent will be to cut and stack the timber lying on the ground this fall. The standing dead (Fir budworm kill) will be cut and hauled out in the spring and summer of 2004.

We do plan to sell the good wood for firewood. I believe this should explain our plan but if there are questions, please call me at 667-5986.

Thanks,

Cliff
Property Owner

Clifford A. Doyle

FOREST STEWARDSHIP PLAN - DOYLE PROPERTY

OWNER'S OBJECTIVES

The owner's objectives for ownership and management of this parcel of land are:

- to manage the forest resource for the profitable sale of forest products.
- to improve the health of the forest, including the elimination of dwarf-mistletoe and keeping bark beetle populations endemic.
- to improve the habitat for wildlife.
- to provide for a safe and aesthetically pleasing location for a family residence.
- to increase private recreation opportunities.
- to reduce the hazard of wildfire occurrence and potential damage.
- to provide for re-establishment of trees in all stands at reasonable cost.
- to protect other resources, including soil and water, during harvest operations and all other management activities.

PROPERTY DESCRIPTION

Location-This 105 acre tract is located approximately 41 miles northwest of Fort Collins, Colorado. It can be reached from Fort Collins by traveling north on US Highway 287 to Colorado Highway 200 at Livermore. Turn west on Colorado 200 on the Red Feather Lakes Road. Approximately 3 miles west of the Log Cabin Junction, turn north on a private road. The property is about 0.6 miles north of the Red Feather Lakes paved road.

The property is bounded on the east and north by the Roosevelt National Forest. Lands on the south and west of the Doyle property are in private ownership. (See Figure 1)

Topography-One of the significant features of the property is Windy Gap Lake. The property can be characterized as relatively gentle slopes with significant rock outcrops. There are five very obvious rocky "peaks" that lend character to the property. One is at the northeast corner, two border the main access road on the south boundary, another lies along the south boundary on the west, and the fifth is located on the north boundary northwest of Windy Gap Lake.

Unit 3: Ponderosa pine, mature, overstocked, 5.2 acres.

This is a ponderosa pine stand with an occasional Douglas-fir in the overstory. It is located north of Unit 2 and directly west of the lake. Stand density averages 105 BA with a range of 60-140 BA. Average diameter of overstory trees is 8.8 inches DBH. Average height is 41 feet. No dwarf-mistletoe was found. Beetles have also been active here. Slopes range from 2-12%. Regeneration is scattered and mostly artificial. Age is 105.

Unit 4: Mixed ponderosa pine and Douglas-fir, mature, adequately stocked, 4.6 acres.

Originally a mixed stand, the budworm and beetles have made it a nearly pure stand of ponderosa pine. Most of the dead Douglas-fir trees are still standing. It is located immediately west of Unit 3. Stand density averages only 65 BA with a range of 10-140. Average diameter of overstory trees is 7.0 inches DBH. Average height is 35 feet. No dwarf-mistletoe found. Slopes range from 18-27%. The unit is very short of conifer regeneration. There are several aspen. Average age of overstory trees is 115 years.

Unit 5 Ponderosa pine, mature, overstocked, 23.6 acres.

Primarily a ponderosa pine stand. There are scattered patches of dead Douglas-fir trees. Most of the dead trees are still standing. They are smaller diameter than the ponderosa pine. This unit is located over the ridge and west to the boundary. Stand density is 90 BA. Average diameter of overstory trees is 7.6 inches DBH. Average height is 30 feet. As this unit drops into the drainage on the west, the stand increases in DBH, height, and density. No dwarf-mistletoe was found. Slopes range from 15-22%. Regeneration is good in patches with 2-4 foot seedlings of both Douglas-fir and ponderosa pine. There are several patches of sapling pines which should be thinned. A few Douglas-fir from 5-12 feet are available for Christmas tree production. Age of the remaining overstory stand is 100 years.

Unit 6 Ponderosa pine, mature, adequate+ stocking, 20.4 acres.

This unit is comprised of 4 areas that are physically separated but very similar in character. Timing of management activities will be different, however. The stand is ponderosa pine with an occasional Douglas-fir. Tree densities have never been as high as in this unit as in the others. Current density is an average 124 BA. Range in BA is 100-180. The average diameter of overstory trees is 8.8 inches DBH. Average height is 45 feet. No dwarf-mistletoe was found. Slopes range from 2-22% where plots were taken. Regeneration is short. Both ponderosa pine and Douglas-fir seedlings are present. Age of the remaining overstory trees is 109 years.

Other A total of 26.3 acres.

Windy Gap Lake, measured at the high water line, stores water on 10.8 acres. The meadow surrounding the lake and following the outlet drainage accounts for another 13.1 acres. A small stand of aspen in the northwest accounts for 0.9 acres. A large rock outcrop on the north boundary west of the lake accounts for the final 1.5 acres on this 105 acre tract.

Rock	1.5				
TOTALS/ AVERAGE	105.0		45	116	107

WILDFIRE HAZARDS

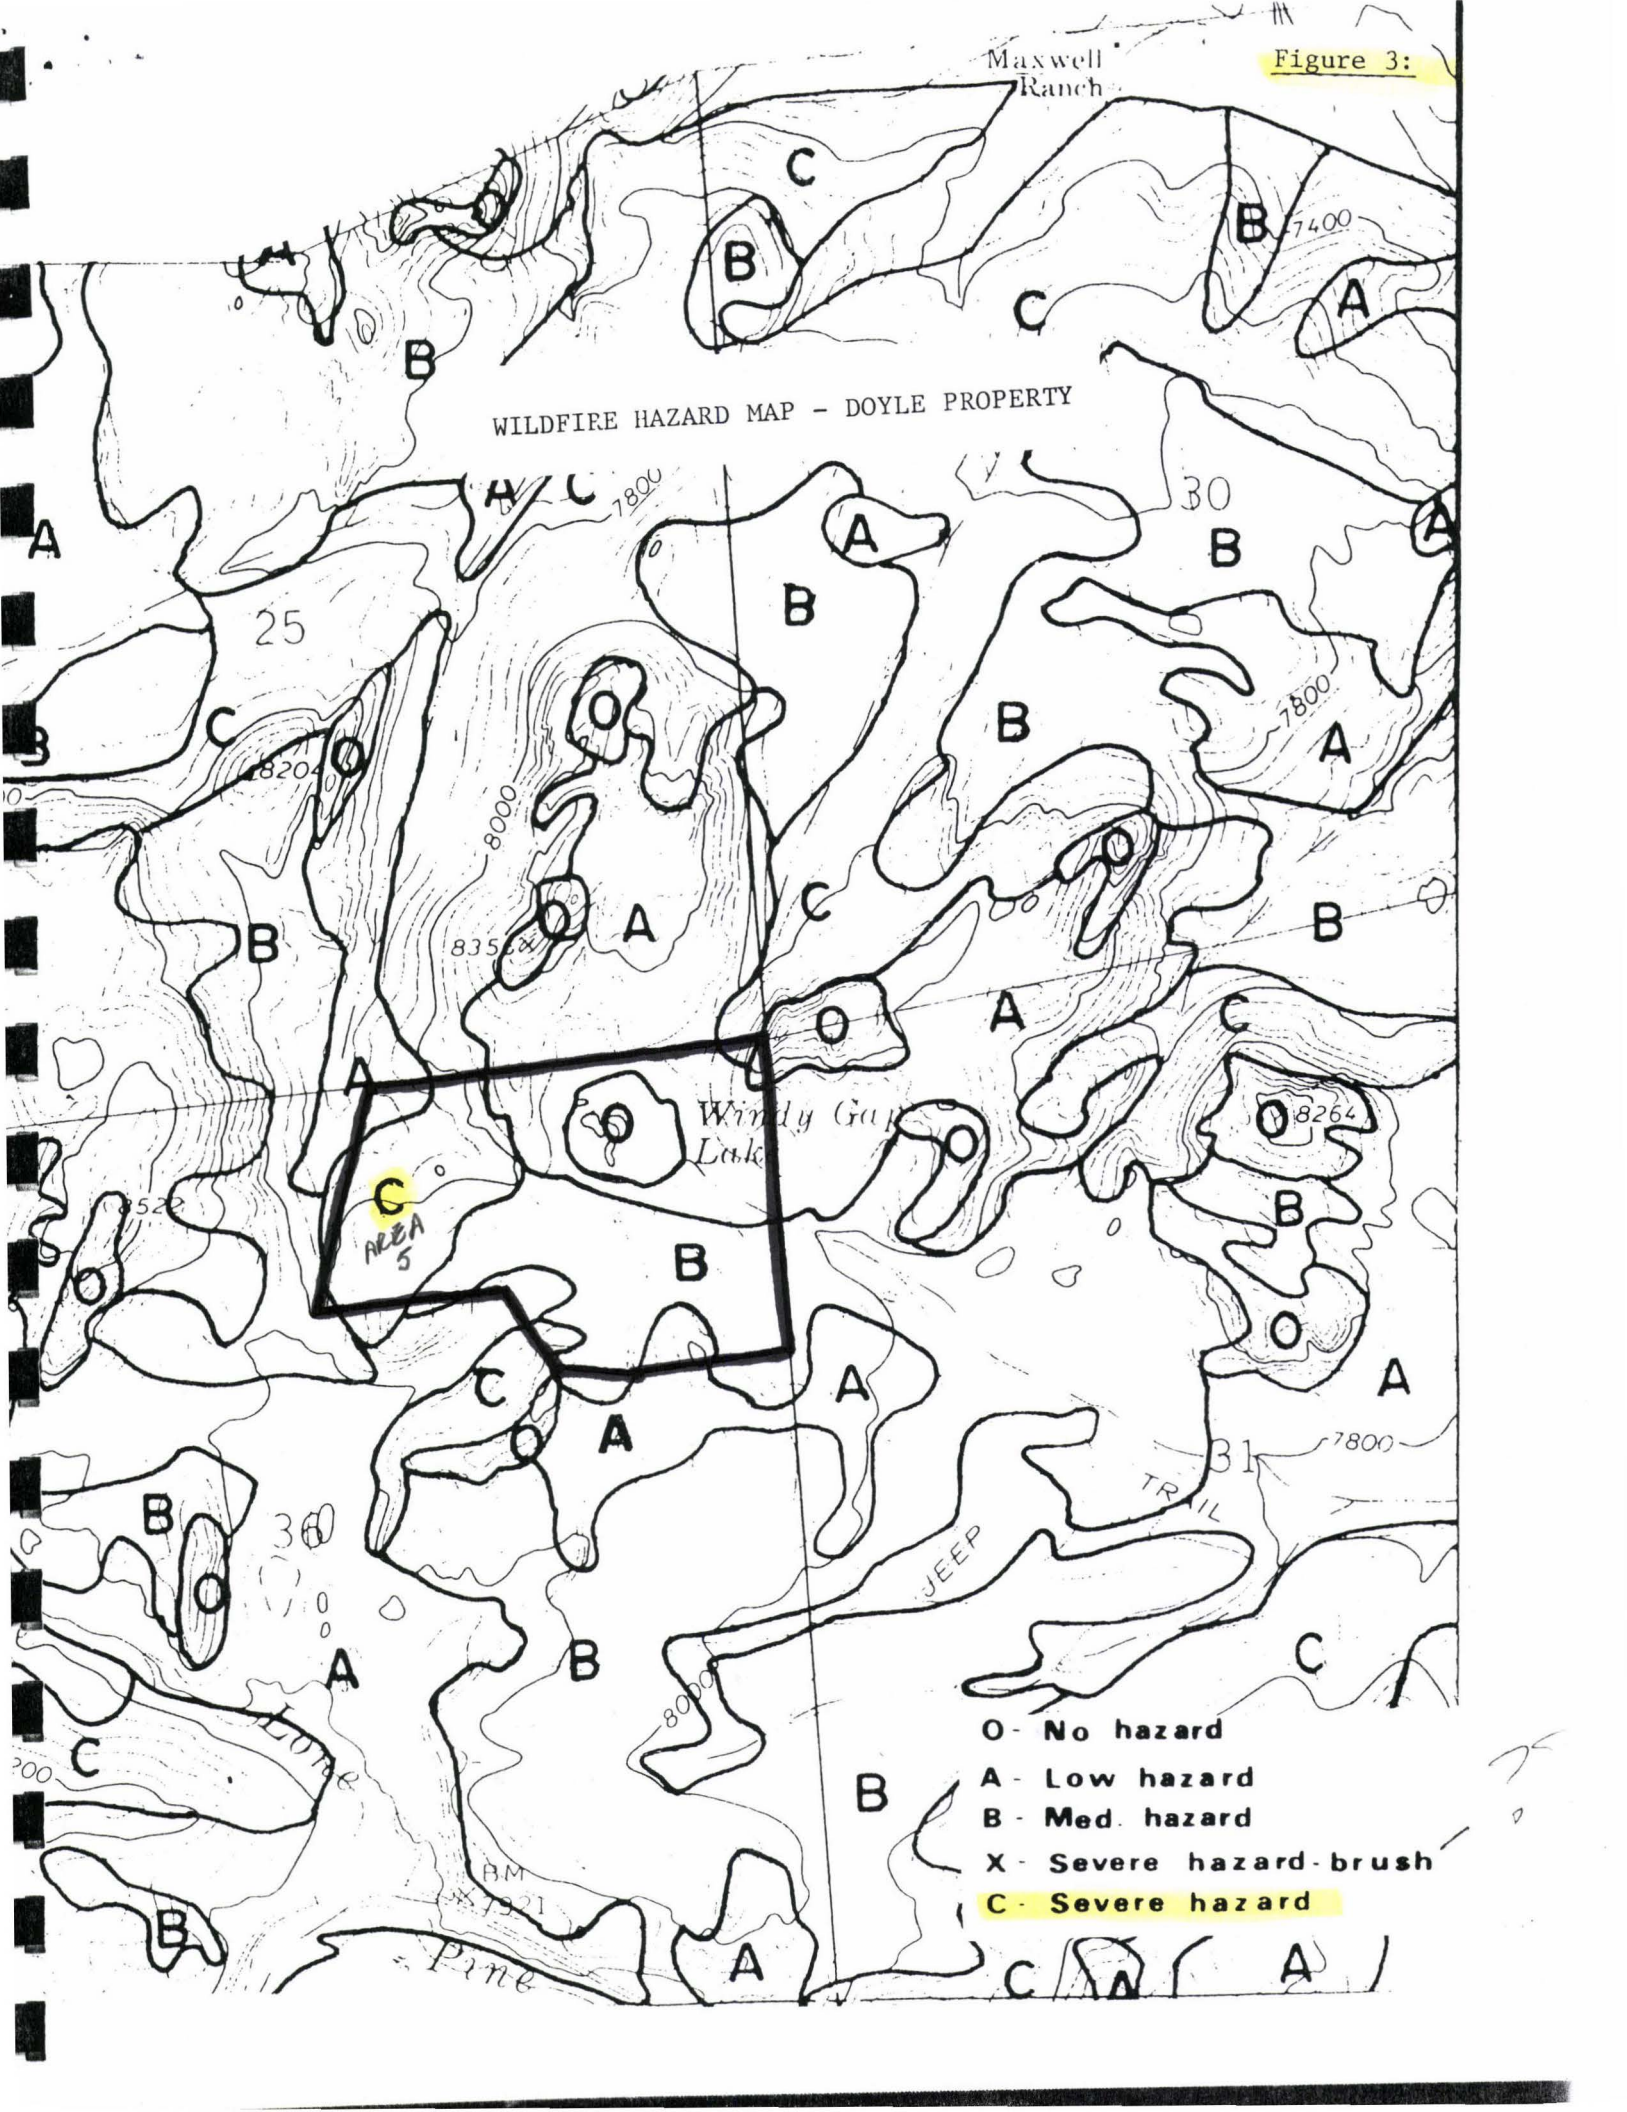

The hazard on this tract is significantly less due to the lack of steep slopes. A few small areas near the "minor peaks" or high points on the property exceed the 30% necessary to be designated as "Extreme". The ponderosa pine stands are a more "fire safe" fuel species than lodgepole pine or spruce-fir. The Wildfire Hazard Area Map (WHAM) shows approximately 40% of the tract as "low" or no wildfire hazard. Another 35% is classed as "medium" wildfire hazard. The remaining 25% is classed "severe" hazard. See Figure 3.

Risk factors for this property include the large amount of dead beetle-killed trees. Many of these have been or are in the process of being removed by the landowner. Lightning fire starts are possible, especially on the rocky points. Recreation use is limited to family members or adjacent property owners. Elimination of livestock grazing in recent years has resulted in a higher risk category in late summer after grasses have dried. Harvest activities can increase the potential for fire starts from both harvesting equipment and logging residue (slash).
