MEMORANDUM

TO: E. Gilfoyle, Provost

FROM: T. Gorell, Associate Dean 

SUBJECT: Physical Science B. S. Degree Program

I spoke with Dean Jaros today regarding the Physical Science degree program which was to have been reviewed during this past academic year through the program review process. He indicated to me that the process had reached a point where the proposal to drop the degree was, in fact, on the State Board agenda for the September 1 and 2 meetings. I was not aware that the degree program would be proposed for discontinuance because no program review was forthcoming and that it would be formally submitted to the board for that action. We have intended that the degree program not be discontinued but realize that the process has gotten to the point, at this late date, that it may be irretrievable from the agenda. It is my responsibility that the review document was not submitted in a timely fashion and that the communication regarding my intentions was not as clear as it should have been. At this point, I am in a quandary as to what to do realizing that the agenda has been printed and is probably in the hands of the members of the Board. I would appreciate having this particular item removed from the agenda if at all possible and would appreciate your efforts to do so. I will be happy to discuss this matter with you.

Thank you.
