Tom - What do you think of this? This seems unnecessarily complicated to me.

John

MEMORANDUM

March 23, 1995

To: John C. Raich, Dean
College of Natural Sciences
408 University Services
Campus

From: T. N. Solie *MSol*

Subject: Regarding the Proposal for the Administration of the Physical Science Major

Remarks: Oren and I have discussed this proposal and offer the following comments:

- 1) We think it is a good idea to have the advisers for these majors in the individual department.
- 2) Since key aspects of the physical science major involves both physics and chemistry, we suggest that the Department of Chemistry and the Department of Physics share the responsibilities for these students. This could be on a 50:50 basis or as indicated by student interest.
- 3) The distributions indicated in the proposal might be adjusted accordingly.

xc: OPA

John -
This is not a good idea. - It creates more hassle for the students. There are supposed to be advisers for the students who have declared the minors anyway. So - The P.S. advisors send those students to the departments & they will see them. Tom
