## I. INTRODUCTION

### A. Colorado Hydrometeorological Committee

The Colorado Hydrometeorological Committee (CHC) is an organization of federal, state, and local agencies and private sector representatives established in 1977 to foster interaction and cooperation among groups in Colorado with common hydrometeorological concerns. The primary purposes of the CHC as specified in its charter is to "Promote greater and more effective exchanges of hydrometeorological data between concerned agencies" and to "Decrease the duplication of effort in the collection of hydrometeorological data." A specific goal of the group is to reduce redundancy in precipitation data collection and analysis and to assure that data collected by one agency is available to all.

### B. Precipitation Index

The development of a comprehensive index of precipitation measurement sites in Colorado was determined by CHC membership to be a cost-effective approach to meeting some of its specific goals. This publication, and the associated computerized index, represent a cooperative effort of several CHC participants to put in one place as much information as possible about current and historic precipitation measurements. This effort is not a compilation of data. It is simply a compilation of where precipitation measurements have been taken and who has the data. Our assumption is that a serious user or potential user of precipitation information will pursue data to the original source.

The information contained in this report is abbreviated as much as possible and simply designed to be a quick reference. More complete information is contained in the computerized index. For complete

information the user should contact the designated agency as shown in the next chapter.

The user must keep in mind that this index is a compilation from only those CHC member agencies that chose to participate in this project. It does include stations from the major Federal hydro-meteorological data collecting agencies: National Weather Service, DOA U.S. Soil Conservation Service, DOI U.S. Bureau of Reclamation, and the DOA U.S. Forest Service. It is inevitable, however, that some sources of precipitation data have been overlooked. Other likely sources of data which are not included here include special federal, state, and university research projects, local communities, civil defense organizations, irrigation companies, private meteorologists, news media, other private businesses and private citizens. These additional data sources most likely involve few measurement sites and short periods of record. Through the publication and dissemination of this index, it is hoped that more precipitation data sources will be identified and included.

## II. INDEX EXPLANATION

### A. Content of Index

Precipitation measurement sites are grouped by county. Within each county they are separated by agency and then listed alphabetically by station name. Station numbers, as assigned by the respective agencies, are given. If blank, no station number has been assigned. Locations for each site are specified with latitude and longitude (in whole degrees and minutes) and elevations above sea level (feet).

Additional information includes the date when each site first began collecting data (month/year) and the date when the station closed. If this field is blank it means the station remains open as of the date of this report. The next heading labels are MID and EQUIPMENT. MID stands for missing data. The codes used in these fields are defined in the next section.

### B. Definition of Codes

MID is the missing data field. Codes are used to indicate how many cumulative years of missing data occurred from the opening date of the station to the closing or present date.

<u>MID code</u>	<u>Definition</u>
0	none
1	less than one year
2	one to three years
3	three to five years
4	five to ten years
5	more than ten years
blank	unknown or unspecified

The following codes identify the type of precipitation gages or measurement devices at each site. These are listed beneath the EQUIPMENT heading on the printed index. Conceivably, any number of

equipment items may be present at a given site. In practice most stations have no more than 3 devices. If this field is blank, it means the type of gage is unknown.

<u>EQUIPMENT code</u>	<u>Definition</u>
01	8 inch standard rain gage
02	4 inch plastic rain gage
03	Wedge gage
05	Plastic conical rain gage
10	8 inch Fischer-Porter recording rain gage
11	12 inch Fischer-Porter recording rain gage
12	12 inch D.T. universal recording rain gage
13	9 inch S.T. recording rain gage
14	2.4 inch S.T. universal recording rain gage
15	Tipping bucket rain gage
16	8 inch universal recording rain gage
17	Bur. of Rec. recording rain gage 0.02" resolution
18	Bur. of Rec. recording rain gage 0.03" resolution
19	Bur. of Rec. recording rain gage 0.06" resolution
20	Metal snow pillow
21	8 foot hypolon snow pillow
22	12 foot hypolon snow pillow
23	D.P.G. gage
24	Zig-zag gage
30	Snow stake
31	Storage gage
32	Density tube
33	Federal snow sampler

### C. Agency Contact Points

The following contact points have been designated for each data set included in the CHC precipitation index.

<u>Station Affiliation</u>	<u>Designated Contact Point</u>
<b>Department of Agriculture:</b>	
U.S. Forest Service	Boise Interagency Fire Center (208) 334-9458
U.S. Soil Conservation Service	U.S. Soil Conservation Service Snow Survey (303) 964-0492
<b>Department of Commerce:</b>	
NOAA, National Weather Service	Colorado Climate Center (303) 491-8545
<b>Department of Interior:</b>	
U.S. Bureau of Land Management	Seven different contact points indicated: field offices in Craig, Kremmling, Meeker, Grand Junction, Denver, Canon City, and Montrose.
U.S. Bureau of Reclamation	Division of Atmospheric Resources Research, Attn: Data Manager (303) 236-4339
U.S. Geological Survey	U.S. Geological Survey Colorado District (303) 236-4890
<b>State of Colorado:</b>	
Department of Natural Resources	Colorado Department of Natural Resources Division of Water Resources State Engineers Office (303) 866-3581
<b>Local:</b>	
Denver Water Department	Denver Water Department (303) 623-2500

**B. Accessibility**

Documentation including specific formats, codes, editing, updating and general user information is available from the Colorado Climate Center. To obtain this information or to obtain access to or possession of a copy of the index data base, please contact:

Colorado Climate Center  
Department of Atmospheric Science  
Colorado State University  
Fort Collins, CO 80523

phone: (303) 491-8545

## V. REPORTING ADDITIONAL DATA SOURCES

It is the intent of the Colorado Hydrometeorological Committee to periodically update this published index and regularly update the computerized index. As a result, there will be opportunities to add station index information from individual stations or station networks currently not included in the CHC precipitation station index.

To facilitate the addition of new information, information sheets are attached. Readers of this report are encouraged to copy and distribute these pages to individuals, agencies, or research groups involved in the collection of precipitation data.

Information Sheet  
 Colorado Hydrometeorological Committee  
 Precipitation Station Index

Date: \_\_\_\_\_

INDIVIDUAL/ORGANIZATION RESPONSIBLE FOR COLLECTING PRECIPITATION DATA

Name: \_\_\_\_\_

Address: \_\_\_\_\_

City, State, Zip: \_\_\_\_\_

Phone Number: \_\_\_\_\_

STATION INFORMATION (one sheet per station, please)

Fill out as much of the following information as is known or applicable.

Station Name: \_\_\_\_\_

Station Number: \_\_\_\_\_ (cannot exceed 10 characters)

Latitude: \_\_\_\_\_ degrees/ \_\_\_\_\_ minutes/ \_\_\_\_\_ seconds

Longitude: \_\_\_\_\_ degrees/ \_\_\_\_\_ minutes/ \_\_\_\_\_ seconds

Elevation: \_\_\_\_\_ feet

Township: \_\_\_\_\_ Range: \_\_\_\_\_

Section: \_\_\_\_\_ Quarter: \_\_\_\_\_ (if known)

Drainage Code: \_\_\_\_\_ (from USGS hydrologic unit map)

When did data collection BEGIN: \_\_\_\_\_ month/ \_\_\_\_\_ year

When did data collection END: \_\_\_\_\_ month/ \_\_\_\_\_ year

(leave blank if station still operating)

Does station operate (check one) \_\_\_\_\_ all year?  
 \_\_\_\_\_ winter only?  
 \_\_\_\_\_ summer only?  
 \_\_\_\_\_ other?

Since data collection first began, how much data is missing?

(check one) \_\_\_\_\_ none  
 \_\_\_\_\_ less than 1 year  
 \_\_\_\_\_ one to three years  
 \_\_\_\_\_ three to five years  
 \_\_\_\_\_ five to 10 years  
 \_\_\_\_\_ more than 10 years

What quantities are you measuring? \_\_\_\_\_

(example, precipitation to the nearest 0.01",  
 snowfall to the nearest 0.5",  
 snowdepth to the nearest inch,  
 snow water content to nearest 0.10",  
 etc.)

How frequently do you take measurements (check one or more)?

<input type="checkbox"/> less than hourly	<input type="checkbox"/> daily
<input type="checkbox"/> hourly	<input type="checkbox"/> weekly
<input type="checkbox"/> every 6 hours	<input type="checkbox"/> monthly
<input type="checkbox"/> every 12 hours	<input type="checkbox"/> seasonally
<input type="checkbox"/> other	<input type="checkbox"/> annually

If measurements are taken daily or less frequently,  
what time do you take your observation. \_\_\_\_\_ (MST)

What instruments are you using to measure precipitation? \_\_\_\_\_

---

example, 4" plastic rain gage  
8" standard rain gage  
8" tipping bucket rain gage  
universal recording rain gage  
snow stake  
metal snow pillow  
etc.

#### OTHER INFORMATION

How do you store your data? \_\_\_\_\_ charts  
(check one)  handwritten records  
 printed records  
 disk or tape  
 cards  
 other

To whom do you routinely provide your data? \_\_\_\_\_

---

(example: National Weather Service, private meteorologist,  
city water department, local radio station, etc.)

Who owns the land on which these measurements are taken? \_\_\_\_\_

---

(example: Forest Service, Bureau of Land Management,  
City, County, Private, etc.)

Other information: \_\_\_\_\_

---
