Phil Kessler:

This letter is your official notification that the Redstone Canyon Wildfire Mitigation Group has been awarded an Emergency Supplemental grant award based on the application you recently submitted. I am attaching all the necessary paperwork you will need which describes the amount awarded and minimum required treated acres. Attached you should find all required forms including Forms A-ES, C-ES, and D-ES.

I need form A-ES signed and returned to me at your earliest convenience. Forms C-ES and D-ES are for your completion and submittal when requesting reimbursement. All forms should be mailed to:

Diana Selby

CSFS- Fort Collins District

5060 Campus Delivery

Fort Collins, CO 80523-5060

If you have any questions about filling out the documents please feel free to contact me at 970-491-8839 or diana.selby@colostate.edu.

Finally, I'd like to schedule a pre-inspection site visit with you to look at the areas prior to or toward the beginning of the project.

Thank you,

Diana Selby

Dollar Amount Requested	\$ 4700
Will this Project be conducted as a Pass-Through Grant?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Provide a brief overview of the project and the project area. (If applying for a fuels reduction project, identify vegetation types)	
<p>The Redstone Canyon area west of Ft. Collins is an unincorporated community in Larimer County with sparsely developed single family dwellings on land that has been historically open rangeland. Redstone Canyon consists of approximately 85 residences on 170 lots that are 35 to 40 acres in size (6800 acres). One 7-mile county road (NCR 25E) provides access to Redstone Canyon in the bottom of the drainage, with up to 24 miles of privately maintained roads accessing homes on the upper slopes. Redstone Canyon has been ranked as having a severe community hazard rating by Poudre Fire Authority and is considered part of the wildland urban interface (see "red zone" maps in the CWPP). Vegetation consists mainly of timber, shrubs, and grasslands. Timber consists of ponderosa pine, juniper, and some Douglas-fir, with a mix of open and closed canopy. A history of successful fire suppression has contributed to areas of closely spaced regenerative tree growth which are prime ladder fuels for intense fire. The community has an existing CWPP on-file with the CSFS. A high priority action item identified by the CWPP is the reduction of hazardous fuels and enhancement of defensible space. This project will augment completed work in 2010-2011 and extend our mitigation efforts to other areas to enhance defensible space, reduce fuel loads, and create fuel breaks.</p>	

Scope of Work / Project Timeline

All information for the project must fit into the space provided below. Attachments will not be considered by the review committee.

Provide a brief scope of work that clearly describes how grant funds will be spent. (This should be more specific than the project description)

4

The purpose of this project is to enhance the defensibility of residences and outbuildings, reduce fuel hazard, and to thin the margins of existing fuelbreaks such as those represented by the 24 miles of privately owned access roads. Public education is also an important objective of the project. This project is part of an ongoing and multi-year effort. The specific goal of this project is to treat 10 acres of strategically selected areas (locations included on CWPP/project map provided below). These 10 acres will be treated in three phases. PHASE 1: Four acres in the vicinity of four residences (one acre each) will be treated for defensible space fuel reduction. We have identified high-priority defensible space needs, and will be working with the corresponding home owners to identify which 4 acres we will process as part of this grant. Homesites will be selected based on hazard, need, and willingness. Qualified personnel will prescribe specific actions at each homesite to accomplish this. Volunteers and the homeowners will perform most of the cutting and pruning. A hired contractor will chip and broadcast the debris.

PHASE 2: Three acres of roadside fuelbreak improvement will be treated along Roan Mountain Road. This work will connect with fuelbreak improvements accomplished in 2010. Volunteers will perform most of the cutting, the contractor will do the chipping.

PHASE 3: Three acres of roadside fuelbreak improvements will be treated along west end of Roan Mountain Rd. Volunteers will cut, the contractor will chip.

Notes: 1) Disposal of roadside tree slash will primarily be accomplished by chipping and broadcasting using contractor-supplied labor and equipment. Broadcast chips will not be permitted to accumulate past a depth of 3 inches. 2) Ongoing throughout the project, we will provide public education on wildfire mitigation and implementation of Firewise safety practices through newsletters, website, and talks.

Describe all planned long-term maintenance (grant funded or other).

The mission of the Redstone Canyon Wildfire Mitigation Group (RCWMG) is ongoing and will continue well beyond this grant. Our goal is to create a perpetual cycle of mitigation work within our community. We will ensure the mitigation efforts associated with this grant will continue to be effective well into the future by carrying out the following activities:

-- Environmental Factors: Work performed as part of this grant will include methods that minimize adverse affects on ecological and hydrological factors such as wildlife habitat and soil erosion.

-- Commitments: This grant will serve as a demonstration project for the Redstone Canyon community. Community members will see how mitigation can work for them and additional homeowners will participate in mitigation as part of accepting responsibility for living in the wildland-urban interface. Our long-term goal is to support the community in this responsibility.

-- Monitoring and Maintenance: The work completed with these grant dollars will be annually inspected by the RCWMG. New ladder fuels and dead trees will be removed by the residents and/or the RCWMG.

-- Future Funding: We will seek additional funding in future years to extend our mitigation efforts to other Redstone Canyon areas needing to enhance defensible space and to reduce fuel loads.

-- Education and Outreach: Our website (<http://redstonemitigation.org>) will be used to inform people of "living with fire" and of actions needed to mitigate fuel hazards and create defensible space. Our RCWMG newsletter will be sent to the Redstone Canyon community on a regular basis.

What is the duration of this project? (check one) ☒ 1 Year ☐ 2 Years ☐ 3Years

Is this a continuing project from previous year/s? (check one) ☒ Yes ☐ No

Provide a timeline for the project

* 4/1/11 to 5/1/11. Select and plan the four homesites for defensible space work (see project map).

Determine exact locations of Roan Mountain roadside thinning areas (see project map). Document and map the existing conditions. Communicate with participating home and land owners. Promote education of the community regarding the goals of this work.

* 5/1/11 to 7/15/11. Accomplish PHASE 1 d-space work around the four homesites. Document the work.

* 7/15/11 to 9/15/11. Accomplish PHASE 2 fuelbreak improvements along Roan Mountain Road. Document the work.

* 9/15/11 to 12/15/11. Accomplish PHASE 3 fuelbreak improvements along west end Roan Mountain Road. Document the work.

Interagency Collaboration

Specify the private, local, tribal, county, state, federal and/or non-governmental (501c3) organizations that will contribute to or participate in the completion of this project. Describe briefly the contributions each partner will make (i.e. – donating time/equipment, funding, etc.).

1. Redstone Canyon Wildfire Mitigation Group (RCWMG). This committee of permanent residents plans, organizes, and coordinates the activities including meetings, newsletters, public education, website development (<http://redstonemitigation.org>), updating the existing CWPP, implementing priorities of CWPP, enhancing defensible space, hauling slash, and clearing of road right-of-ways. This group will also engage and direct the work of hired contractors.
2. Poudre Fire Authority. They will participate in the development of the defensible space prescriptions, supply critical advice in the locating of fuelbreaks and piles for burning, and supervise and conduct large pile burns.
3. Larimer County Emergency Services. They will provide additional input in defensible space prescriptions.
4. Colorado State Forest Service. They will provide technical advice as needed.
5. Private contractor services. These resources will be engaged to provide services related to limbing, felling, hauling, piling, and chipping.
6. Redstone Canyon Association. They are the largest HOA in Redstone Canyon and maintain 24 miles of road; will be a key cooperator in allowing roadway fuelbreak improvements.

Community Wildfire Protection Plan (CWPP)

Does this community have a wildfire protection plan that follows the Healthy Forest Restoration Act CWPP guidelines? (check one) ☒ yes ☐ no

Is this project part of the plan? (check one) ☒ yes ☐ no

Project Category (check all that apply and answer related questions)

Hazard Fuels Reduction ☒ **Other Forest Management Treatment** ☒

Number of acres to be treated: 10 **Estimated cost per acre:** \$ 470

Project Type (check all that apply)

Defensible Space ☒

Thinning w/o Product ☒

Fuelbreak ☒

Mastication ☒

Thinning w/ Product ☐

Other ☐

7	Total Project Expense (Pass Through)		
	<i>Please fill all fields</i>	Grant Share (\$ Amount Requested)	TOTAL
	Contractual Services:	\$ 4700	\$ 4700
	TOTAL:	\$ 4700	\$ 4700 *

Grant funding may only be used for Contractual Service.

* These grant funds will be matched by fund-equivalent labor provided by local residents and members of the Redstone Canyon Wildfire Mitigation Group (RCWMG).

8	Total Project Expense (Non-Pass Through)		
	<i>Please fill all fields</i>	Grant Share (\$ Amount Requested)	TOTAL
	Contractual Services:		\$ 0
	Indirect Costs:		\$ 0
	TOTAL:	\$ 0	\$ 0

Grant funding may only be used for Contractual Service and Indirect.

Attach Project Map Showing Specific Treatment Areas

Treatment areas are plotted on the Redstone Canyon Community Wildfire Protection Plan (CWPP). See legend for proposed (this proposal and others) and already-completed treatment areas.
