John Snyder
P. O. Box 67
Bellvue, CO 80512

Dear Mr. Snyder,

Thank you for your participation in the Wildland Urban Interface Incentives D-Space Program. Your project, # 7110-001-53, was approved in February for \$9,625. We have received many applications for limited funding for fuels mitigation work in this program. In order to provide assistance to other landowners and due to lack of funding we had to deny your second application.

To ensure prompt payment on your current thinning project, please complete the designated work, contact the Fort Collins District for certification and have your Accomplishment Report submitted by September 1, 2003. We appreciate your efforts in reducing hazardous fuels and improving forest health condition.

Sincerely,

A handwritten signature in cursive script that reads "Jan J. Hackett".

Jan J. Hackett
WUI Incentives Program Manager

Mr. Collinet,

Regretfully, we were not able to fund your Wildland Urban Interface Incentives D-Space Program (WUI) grant request. There was simply not enough funding to approve all the grant requests received at our office.

Your application will be kept on file for approximately one year and you will be notified if funding becomes available during that time period.

If you have any questions, please contact our office at (970) 491-8660.

Sincerely,

A handwritten signature in black ink that reads "David A. Farmer". The signature is written in a cursive, flowing style.

WILDLAND URBAN INTERFACE INCENTIVES D-SPACE PROGRAM PLAN

OBJECTIVES: What do you want to achieve by this practice? (If more than one objective, list in order of priority).

Example: To reduce the risk of mountain pine beetle, and with the proper slash disposal, improve forest health.

TO IMPROVE D-SPACE THROUGH FOREST THINNING, TREE PRUNING,
; SLASH DISPOSAL THROUGH CHIPPING; AS WELL AS IMPROVE FOREST HEALTH.

CURRENT NATURAL RESOURCE CONDITIONS:

Vegetative cover (trees, shrubs, grasses) on the property:

HEAVILY FORESTED TRACT OF LODGEPOLE PINE, LIMBER PINE, SPRUCE VARIETIES
; SOME ASPEN.

Fire hazard rating and risk factors of the area:

HEAVILY FORESTED WITH LOTS OF DEAD; DOWN TREES; LOWER LIMBS HAVING NEVER
BEEN TRIMMED ; MUCH THINNING TO BE COMPLETED. LOTS OF LADDER-FUEL.

Summary of insect and disease presence, damage, or risk, including information on significant incidents, historical and current:

SOME MITLEDE PRESENT, NO MITIGATION DONE.

Soil Type(s) and limitations:

LIMITED SOIL DEPTH OVER DECOMPOSING GRANITE. MANY TREES VULNERABLE TO WIND
; EROSION.

Wetlands present:

STREAM RUNS ALONG NORTHERN PROPERTY BOUNDARY. SIGNIFICANT WILDFLOWERS ; WILDLIFE
ACTIVITY PRESENT.

Wildlife (or sign) present:

FREQUENT DEER, ELK, COYOTE, SMALL MAMMALS ; BIRDS. OCCASSIONAL BEAR ; WILD CATS.

Threatened or Endangered plants or animals that may inhabit the property:

NOT KNOWN.

Noxious weeds present:

THIS YEAR NOTICED SOME CANADIAN THISTLE.

Cultural or historic resources on the property:

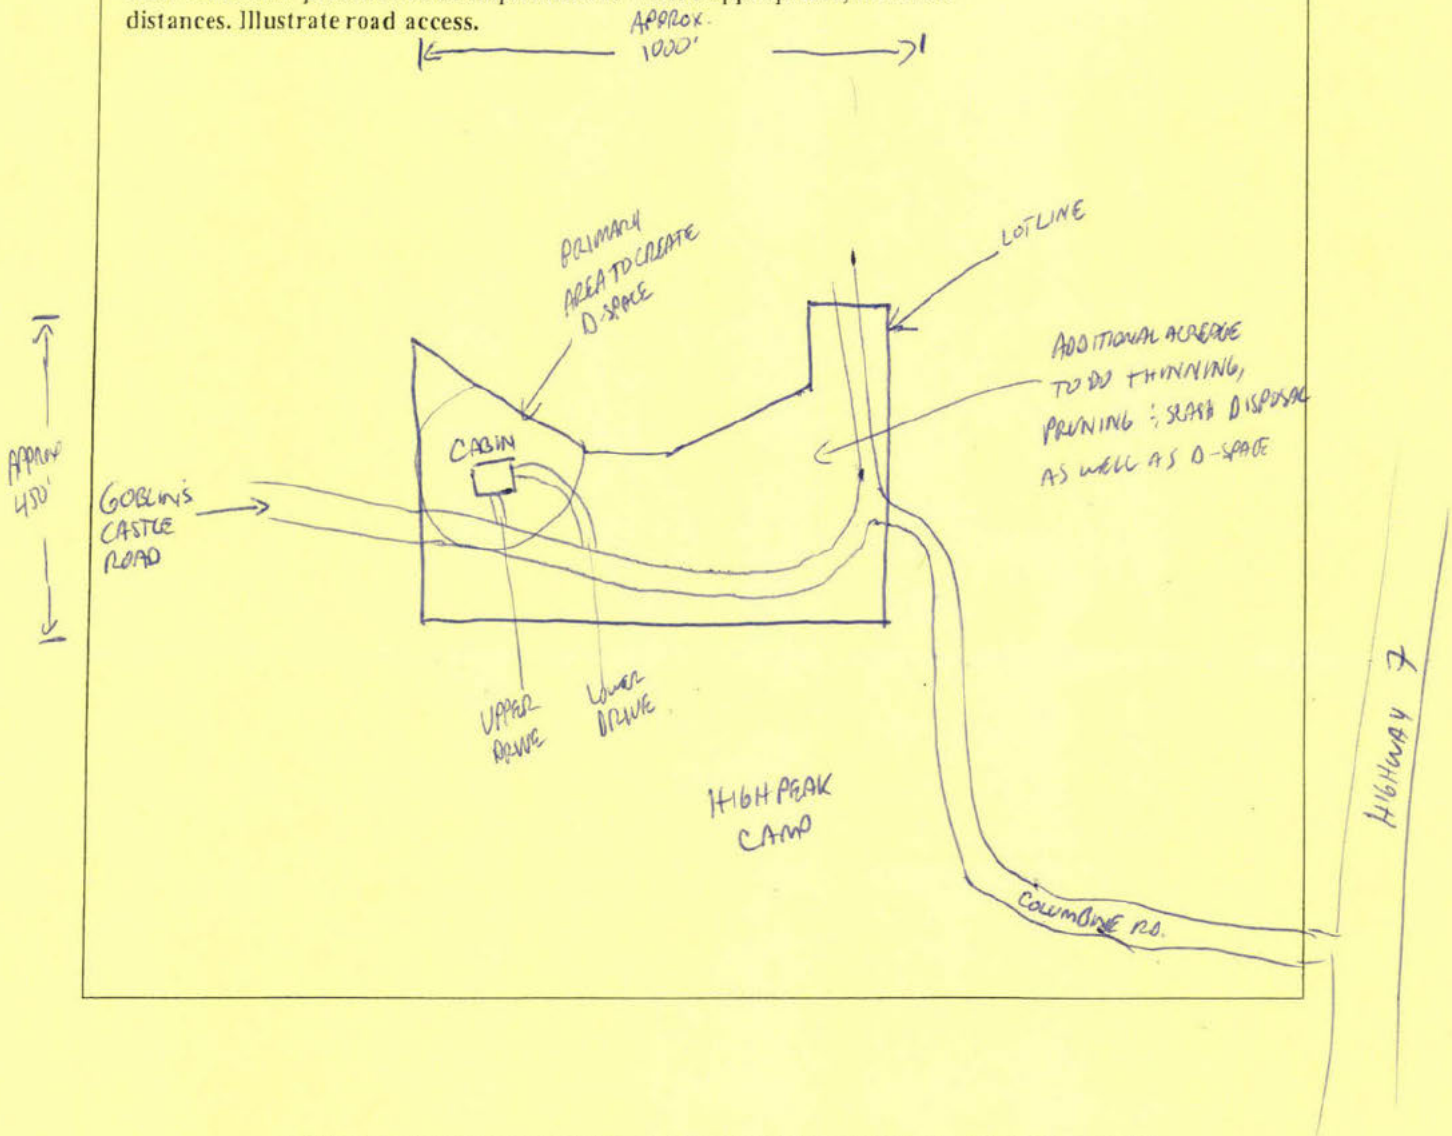

HISTORICAL "RANGE" OF ENOS MILLS HOMESTEAD. FREQUENT REFERENCES TO THIS AREA IN MANY
OF HIS BOOKS.

Recreational use on the property:

HIKING.

WILDLAND URBAN INTERFACE INCENTIVES D-SPACE PROGRAM PLAN DESIGN

Sketch project area and design. Include structures and landmarks. Indicate, by location, fuels reduction practices to be implemented. Where appropriate, illustrate distances. Illustrate road access.

LIST PRACTICE WITH PROJECTED COMPLETION DATE:

PRACTICE/OTHER SPECIFICATIONS	COMPLETION DATE
D-SPACE	2001-2005
THINNING, PRUNING, SCALP DISPOSAL THROUGH CHIPPING	ONGOING. CHIPPING OPERATION
(WITH GRANT \$, THESE CAN BE ACCOMPLISHED WITHIN	2-4X ANNUALLY. THINNING
12 MONTHS - 24 MONTHS)	PRUNING THROUGHOUT YEAR.

SEE REVERSE →

THE PLAN I HAVE IS A MULTI-YEAR ONE, CONSIDERING NO FOREST FUELS REDUCTION HAS EVER BEEN DONE ON THIS PROPERTY. CURRENTLY, MY NEIGHBOR (JACK KOLHNER, #234 GOBLINS CASTLE ROAD) AND I RENT A CHIPPER 2-4X ANNUALLY TO DISPOSE OF SLASH WE PILE THROUGHOUT THE YEAR, ~~AND~~ TO ACCOMPLISH THE THINNING & SLASH PILE-UP I EMPLOY SOME LIMITED LABOR ASSISTANCE 2X ANNUALLY, BUT DO MOST OF IT MYSELF.

THIS INCENTIVE TO ASSIST IN SPEEDING UP THE PROCESS IS OF GREAT INTEREST TO BOTH ME & JACK! WE HOPE TO REACH OUR GOALS OF CREATING DEFENSIBLE SPACE ON THESE FOREST PROPERTY/WILDLAND-URBAN INTERFACE MORE EFFICIENTLY WITH THE FINANCIAL HELP OF THIS GRANT.

THANK YOU FOR YOUR CONSIDERATION. PLEASE CALL WITH ANY QUESTIONS —

SEP 3 2003

August 29, 2003

Dear Mike Babler,

Please accept our application for the D-Space Grants Cost-Share. You will notice that we are planning to spend about \$9,500 in labor and supplies from September 2003 to September 2004. If approved for the cost-share program it will offset our expenses by 50%. Please note that we have also applied for the Forest Land Enhancement Program; the application was for nearly the same work to be completed, therefore, only one should be approved or only parts of both.

Since we have been admitted into the Forest Agricultural program we have focussed upon thinning in order to promote forest health, gain forest products and reduce fuels. We have thinned approximately 3.25 acres in 2001, 3.25 acres in 2002 and 0.5 acres this year so far, 7 acres total. However, we have not done any serious removal of the waste we have produced. We did use a lot of logs for our home building and firewood, and mulch for the garden but most of the waste remains in the woods in piles waiting to be burned.

If approved for the cost-share program we would like to thin and prune the additional 2.75 acres that is part of our 2003 commitment and also complete the 3.25 acres as part of our 2004 commitment; 6 acres total. Also, we would like to burn all the piles that were created in the past as well as the piles that will be created on the newly thinned acreage; 13 acres total.

To complete these two projects both of us plan to work for about 9 weeks, 44 hours/wk at the labor equivalent rate of \$11.68/hr; totalling \$9,250.56. The additional \$249.44 will be spent on gasoline, diesel, bar oil, chain saw files, chains, etc.

The area we are intending to work is the upper one half of our property. With the forest meadow that does not need thinning taking up approximately 7.5 acres in that upper half, the additional 13 acres is half of 40 total forested acres we own (the upper half nearest the house).

Thank you for your time in considering our application. Please call if there are any questions.

Sincerely,

OBJECTIVES: What do you want to achieve by this practice? (If more than one objective, list in order of priority).

Example: To reduce the risk of mountain pine beetle, and with the proper slash disposal, improve forest health.

To create defensible space ^{and reduce fuels} around my home on forested property. To promote forest health.

CURRENT NATURAL RESOURCE CONDITIONS:

Vegetative cover (trees, shrubs, grasses) on the property:

Ponderosa Pine, Douglas fir, juniper, wax currant, gooseberry, Stipa commata

Fire hazard rating and risk factors of the area:

Summary of insect and disease presence, damage, or risk, including information on significant incidents, historical and current:

Mountain Pine Beetle is at epidemic levels directly to the west in a community adjacent to ours. They have not quite reached our area, however, probably within a short time they will.

Soil Type(s) and limitations:

Low in Unit #1 (A) and high in Units #2 + #3 (C)

Unit #1 12" topsoil & 6 1/2' of sandy silty clay; Units #2 + #3 thin & rocky soil

Wetlands present:

Intermittent stream on northern edge of property.

Wildlife (or sign) present:

Bobcat, mountain lion, bear, deer, elk, skunk, turkey, etc.

Threatened or Endangered plants or animals that may inhabit the property:

N/A

Invasive [?] Noxious weeds present:

Cheat grass, Canada thistle, field bindweed

Cultural or historic resources on the property:

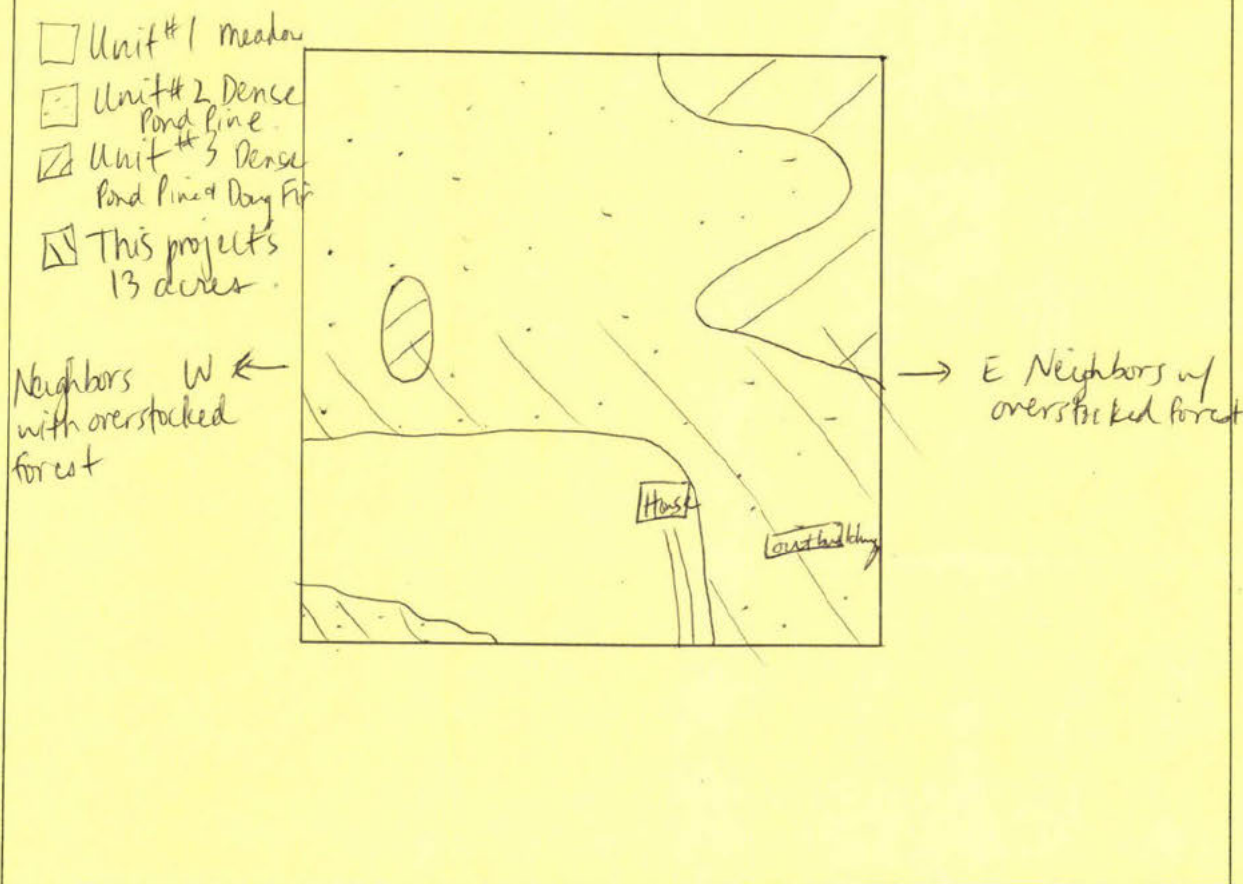

House, outbuildings, buck-n-rail fence.
Nothing historical.

Recreational use on the property:

Hiking

WILDLAND URBAN INTERFACE INCENTIVES D-SPACE PROGRAM PLAN

OBJECTIVES: What do you want to achieve by this practice? (If more than one objective, list in order of priority).

Example: To reduce the risk of mountain pine beetle, and with the proper slash disposal, improve forest health.

To create defensible space and improve forest health and reduce pine beetle risk by thinning, pruning, and properly removing slash and dead wood.

CURRENT NATURAL RESOURCE CONDITIONS:

Vegetative cover (trees, shrubs, grasses) on the property: Montane forest. Pines: ponderosa, Doug fir, lodgepole. Blue spruce. Common juniper, cedar. Aspen, Gambel's quince, many grasses, currant, Many flowers.

Fire hazard rating and risk factors of the area:

Extreme hazard due to forest density and fuel load.

Summary of insect and disease presence, damage, or risk, including information on significant incidents, historical and current:

15-20 years ago: spruce had worm kill; much standing dead & fallen dead, huge fuel load. Currently pine beetle infestation creeping toward us. Some evidence of dwarf mistletoe.

Soil Type(s) and limitations:

Mountainous; granite; thin, fragile soil.

Wetlands present: none

Wildlife (or sign) present: elk, deer, coyote, rabbit, chipmunk, ground squirrel, bear, cougar, many raptors, many songbirds, night hawks, crows, jays.

Threatened or Endangered plants or animals that may inhabit the property: none known.

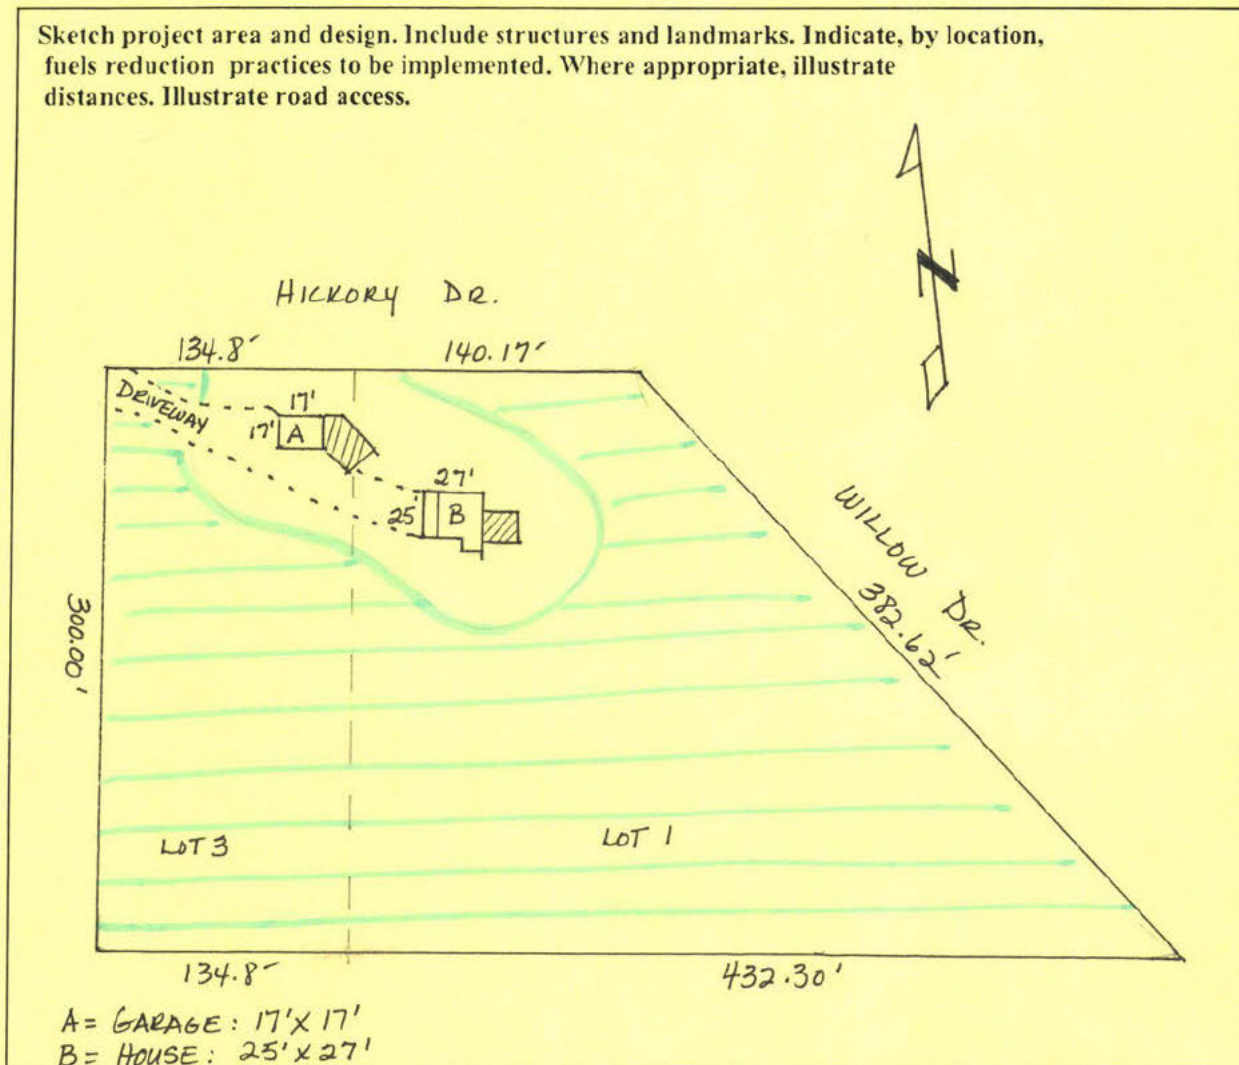

Noxious weeds present: none currently, although neighboring properties host Canada thistle, Musk thistle, dalmatian toadflax, snapweed.

Cultural or historic resources on the property: none known.

Recreational use on the property: hiking.

Prepared by:

Resource Professional

Date

The Wildland Urban Interface Incentives Program management plan,, prepared at my request, reflects objectives that I have for my property to reduce hazardous fuels. It contains implementation recommendations that have been reviewed with me by a natural resource professional. I agree to implement this practice as designed and planned.
