# Biotics (Biodiversity Information Management System)

## Overall Biotics Success

- 45,003 mapped locations
- 1,883 tracked species and plant communities
- 1,907 Potential Conservation Areas (40 B1)

## Our Work Since 2020

- 9,080 new/updated mapped locations
- 114 models for Tier 1 and Tier 2 plant species
- 194 animal range maps by HUC

# CNHP Data Request Changes

## CODEX Replaces some Data Requests

- All CODEX reports are free for now
- Same CNHP Sensitive Species and Natural Communities Data provided previously in Tier 2 requests plus greatly enhanced data from a myriad of sources
- Now available online on demand!

## Precise Spatial Data Requests Change

- Same pricing as before and requires a data license
- Statewide data partnerships now grant access to view precise CNHP Partner Data online on CODEX
