

Teagan Keeler

Fall 2023

Capstone - Electronic Art

Artist Statement:

Animation has always been a passion of mine, since I could remember cartoons were always my main inspiration and comfort. I always wanted to make a connection with my future employment and these shows so I stuck with Electronic media. I use various software to create characters and stories, these tools are not just means to achieve a goal, they are also channels to my imagination.

Procreate is great for experiencing the same sense of euphoria and ease that my childhood drawings brought, with an easy upfront program and a remarkable database for improvement, I have learned to excel and sometimes even animate in Procreate. The ability to use Adobe Premiere to transform raw animation into a visual story, is one of the many things I have been experimenting and excelling with in school. With Blender, I can create intricate 3D landscapes that transport viewers to magical places, and bring the flat drawing from procreate to life.

My work now is mostly 2D animation with touches of 3D. I test with rotoscoping but I stick mostly to 2D character work. By embarking on this journey, I hope viewers establish a bond with my work and embody the same sense of wonder and happiness that filled me during my childhood.

Title

Original format

Figure 1: Cat Pottery Animation

Pottery and Procreate, 11 FT

Figure 2: Venery

Procreate and Adobe Premiere

Figure 3: PerfectPerson Inc.

Procreate and Adobe Premiere

Figure 4: Fingers

Flip-a-Clip and Adobe Premiere

Figure 5: Rotoscope Antiwoman

Flip-a-Clip and Adobe Premiere

Figure 6: Man I Really Hate Bird Noises

Procreate
