Fax:	

Community At Risk Information			
Name of Project:	Caswell Property		
Community Name(s):	Spring Gulch		
County:	Boulder	Congressional District:	T3N, R71W, Sec#3
Latitude (decimal degrees):	40.261 N	Longitude (decimal degrees):	105.333 W
Threat Description (check all that apply)			
Homes:	<input checked="" type="checkbox"/> X	Number of:	1
Businesses:	<input type="checkbox"/>	Number of:	
Watersheds:	<input type="checkbox"/>	Number of:	
Other (Describe):			

Requested Grant Amount / Project Description	
All information for the project must fit into the space provided below. The review committee will not consider attachments.	
<b>Dollar Amount Requested May Not Exceed \$470 x Number of Acres Proposed For Treatment</b>	
Dollar Amount Requested	\$15,980.00
Will this Project be conducted as a Pass-Through Grant? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
Provide a brief overview of the project and the project area. (If applying for a fuels reduction project, identify vegetation types)	
<p>The project area is located on mild to moderate slopes, predominantly on a southeast aspect. Tree species composition is largely ponderosa pine, with juniper and douglas fir randomly scattered throughout. Understory composition consists of random native grasses, shrubs, and ground juniper. Access throughout the project area is very good, as 75% of the property/project area is bordered by a road. The main drive is accessed at the center of the southern boundary, leading to the residence, located centrally on the property.</p>	

### Scope of Work / Project Timeline

All information for the project must fit into the space provided below. Attachments will not be considered by the review committee.

**Provide a brief scope of work that clearly describes how grant funds will be spent. (This should be more specific than the project description)**

- 4 Project work will improve upon the defensible space around the residence and the entry road corridor as the primary objective. The secondary objective will be to thin the remaining forested areas throughout the project area. Thinning will strive to remove a great deal of the encroaching, suppressed trees, with an emphasis on retaining the dominant, healthy overstory trees. Additional thinning will occur in the overstory trees, in order to achieve an average tree-crown spacing of 15 feet in the forested areas throughout the project area. Slash will be hauled to a local burn area, chipped, or lopped and scattered, depending upon landowner preference in any given area. Bole wood will be cut to manageable and desirable lengths and stacked appropriately, depending upon landowner preference.

**Describe all planned long-term maintenance (grant funded or other).**

Landowner will continually monitor property for any new growth, and remove any undesired encroachment. Landowner will also monitor property for any new insect and disease activity, and make efforts to eradicate upon detection. Landowner will limb younger, growing vegetation, to eliminate ladder fuels.

**What is the duration of this project? (check one)** ☒ 1 Year ☐ 2 Years ☐ 3 Years ☐ 4 Years

**Is this a continuing project from previous year/s? (check one)** ☐ Yes ☒ No

**Provide a timeline for the project**

Project work will begin as soon as layout is complete, and will continue through completion, which is targeted for Spring, 2012.

### Interagency Collaboration

Specify the private, local, tribal, county, state, federal and/or non-governmental (501c3) organizations that will contribute to or participate in the completion of this project. Describe briefly the contributions each partner will make (i.e. – donating time/equipment, funding, etc.).

- 5 None.

### Community Wildfire Protection Plan (CWPP)

**Does this community have a wildfire protection plan that follows the Healthy Forest Restoration Act CWPP guidelines? (check one)** ☒ yes ☐ no

**Is this project part of the plan? (check one)** ☒ yes ☐ no
