Selected Pilots and Next Steps

Hello former AI Task Force members,

The task force sponsors met earlier this month and selected AI pilots to pursue from our proposals:

- Curricular Innovations and AI Faculty Foundations
- Prompt Engineering Workshops & Promotion (Microsoft has already agreed to sponsor promptathons at both campuses!)
- Meeting note tool

Additionally, the sponsors want to readdress support for " Leveraging AI for Student Success: Collaborative Opportunities for Students with Disabilities" this summer. There was great enthusiasm to pursue this and also recognition that mid spring semester wasn't feasible.

An AI implementation task force chaired by Steve Juarez and Jim Cox is working on making these pilots a reality.

Thank you all for your great work!

Best,
Karen
