Requested Grant Amount / Project Description	
All information for the project must fit into the space provided below. The review committee will not consider attachments.	
Dollar Amount Requested May Not Exceed \$470 x Number of Acres Proposed For Treatment	
Dollar Amount Requested	\$1,786.00
Will this Project be conducted as a Pass-Through Grant?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Provide a brief overview of the project and the project area. (If applying for a fuels reduction project, identify vegetation types)	
<p>The project area is located due west of the town of Boulder, in the Boulder Heights area. The project area is best accessed off of Brook Road. The residence is located near the southeast corner of the lot. The southern 1/3 of the property is located on moderate slope, with easy access. Vegetation in this area consists of predominantly ponderosa pine and douglas fir, with a small mix of juniper throughout. The northern 2/3 of the property is located on steep north facing slopes, with access only from the southern 1/3. Vegetation in this area is highly composed of douglas fir, with pockets of ponderosa pine throughout. Tree density is much thicker in this area.</p>	

Scope of Work / Project Timeline

All information for the project must fit into the space provided below. Attachments will not be considered by the review committee.

Provide a brief scope of work that clearly describes how grant funds will be spent. (This should be more specific than the project description)

- 4 Grant funding will be used to conduct hazardous fuels reduction across the entire property. Increasing the spacing of the overstory trees is a high priority, to reduce the risks associated with wildfire. The area where the property shifts from a southern aspect slope to a northern aspect, will look to do heavy fuels thinning, as to serve as a fire break. Thinning will continue downslope to the north, but feathering out efforts as work moves further to the north. Most bole wood will be contoured to the ground, stacked for firewood, or hauled off. Slash will either be chipped (where accessible), or lopped and scattered throughout, with a new depth not to exceed 18 inches. Trees left uncut will be limbed to a minimum of 6 feet, or 25% of the bottom limbs, whichever is of the lesser.

Describe all planned long-term maintenance (grant funded or other).

Landowner will continually monitor property for new, undesirable re-growth, and remove upon detection. Landowner will also monitor trees growing in desirable locations, and limb vegetation as necessary.

What is the duration of this project? (check one) ☒ 1 Year ☐ 2 Years ☐ 3 Years ☐ 4 Years
