

README file: Outcome Metrics

Variable information:

Publication Network Average Degree: average degree per node from social network survey data

Total Publications: number of publications produced by each team during 2016 and 2017*

Total Proposals: dollar amount of grant proposals submitted by each team during 2016 and 2017*

Total Awards: dollar amount of grant funding awarded to each team during 2016 and 2017*

*Seven of the teams were funded for eight quarters, and reported progress metrics quarterly.

One team was an NSF team and reported metrics annually. Team development takes time and occurs over stages. As some teams were brand new and others had previous history, we excluded metrics reported from the first year to allow teams time to become established.
