DEPARTMENT OF BIOMEDICAL SCIENCES

ANNUAL REPORT 2008

I. Summary

The Department of Biomedical Sciences makes major contributions to the academic and scientific environment in the College of Veterinary Medicine and Biomedical Sciences and Colorado State University. It maintains a reputation for skilled and innovative teaching at the professional veterinary, graduate and undergraduate levels. The Department trained 22 PhD, 19 MS and 110 MS-B students and graduated 4 PhD, 4 MS-A and 45 MS-B students in 2008. The Department currently sponsors one DVM/PhD student. Departmental faculty members have visible, active research programs. Research expenditures exceeded \$6,810,000 in FY 2008. A number of faculty members received national and local awards for their activities in teaching and research during the year. Biomedical Sciences faculty also contributed significantly to service activities at the College, University, national and international levels.

II. Mission

The mission of the Department is to foster an environment conducive to the achievement of excellence in teaching and advising, research and scholarly activity, and service and outreach by its faculty, staff and students. This will be accomplished by discovery, dissemination and application of knowledge in the biomedical sciences, and by educating and training undergraduate, graduate, professional veterinary medical, and post-graduate students.

III. Department Organization

The Department Head is Dr. Barbara Sanborn. The Department is organized into two divisions: the Neuroscience Division (Dr. Ray Whalen, Division Director) and the Physiology Division (Dr. Thomas Hansen, Division Director). Dr. C.W. Miller serves as Assistant to the Head for Educational Activities. Ms. Melissa Hein serves as the Department Administrator. The BMS Advisory Committee, comprised of the Division Directors and elected representatives from the Divisions, provides advice to the Head on departmental affairs.

The Department faculty consisted of 30 regular, 9 special, 18 affiliate, 8 joint, 2 transitional and 5 emeritus faculty members in 2008 (Table 1). Among the faculty, Richard Bowen, Elaine Carnevale, Mark Frasier, Charles Miller, George Seidel, Edward Squires, John Walrond and Ray Whalen received special recognition in the form of awards for teaching and research excellence in 2008 (Table 11).

Other Departmental members included 19 office staff, 15 postdoctoral fellows, 46 research associates and technicians, 2 administrative professional program coordinators and 5 research scientists (Tables 2 and 3). The Department hosted 18 visiting faculty/scientists in 2008 (Table 1).

Faculty members are housed in four facilities: the Anatomy/Zoology and Physiology buildings on the Main Campus and the Animal Reproduction and Biotechnology Laboratory and Equine Reproduction Laboratory buildings on the Foothills Campus. Departmental faculty members

participate in and support three University Programs of Research and Scholarly Excellence: the Animal Reproduction and Biotechnology Laboratory, the Molecular, Cellular and Integrative Neurosciences Program, and the Cell and Molecular Biology Program.

IV. Strategic Plan and Self-Evaluation

The Department Code was revised and adopted in 2005 and updated in 2008. A Departmental Five Year Strategic Plan was developed in 2005 and a Departmental Evaluative Self-Study was initiated in 2008 and completed in 2009. Part of the self-study involved additional strategic planning. Some of the findings of the self-study include the following:

- The Department has a significant impact on its own educational mission and the wider CSU mission in the areas of undergraduate, graduate and professional veterinary medicine teaching. In fact, in the CSU Student FTE summary for Fall 2008, Biomedical Sciences ranked 8th in the entire University and first among departments in the College in overall FTE production.
- Biomedical Sciences has the largest number of enrolled graduate students among the departments in the College. Biomedical Sciences faculty members have had a significant impact on the careers of the students and fellows they have trained and mentored. All respondents to a recent alumni survey thought that their degree program (MS-B, MS-A, PhD) had prepared them adequately for their current career and would recommend their program to others.
- Traditional research strengths in reproductive biology and anatomy/neuroscience have remained the central foci of the Department. In addition, Biomedical Sciences is building a focus in cardiovascular physiology. There is a great deal of collaboration between investigators in the department, which increases national visibility and enhances research productivity. Research strengths have coalesced around faculty expertise and result in collaborative research, national and international collaborations, and ties to industry.
- Biomedical Sciences faculty members have excelled in service and outreach to practicing veterinarians, private clients, professional organizations and the lay community.

V. Education

The Department of Biomedical Sciences fulfills its educational mission in a number of important ways. The Department contributed a total of 18,115 student credit and 23,815 contact hours in Academic Year 2007/2008. All faculty members are engaged in didactic teaching at one or more levels.

BMS Faculty Teaching Contribution Summary 2007/2008

	Student Credit Hours	Contact Hours
PVM	2,699	4,848
Graduate	2,181	3,342
Undergraduate	13,235	15,625
TOTAL	18,115	23,815

Professional Veterinary Medicine:

In the Professional Veterinary Medicine curriculum, departmental faculty members are responsible for general anatomy, neuroanatomy, theriogenology, image interpretation and

significant portions of pharmacology and physiology (Table 7), contributing 2,699 student credit and 4,848 contact hours. In all of these areas, faculty are constantly upgrading lectures, modifying and developing new course material and evaluating effectiveness. The innovative computer-assisted anatomy programs and curricula developed by L. Ray Whalen and colleagues have gained national and international recognition and are used widely at other institutions.

Graduate Education:

Biomedical Sciences faculty members are active in teaching graduate courses, planning and implementing curriculum opportunities for training graduate students, and mentoring MS and PhD students in career development, research design and execution, and development of oral and written communication skills. Table 7 summarizes graduate level teaching activities (classes numbered 500 or higher). The Department contributed 2,181 student credit and 3,342 contact hours in didactic courses and laboratories. Faculty members also sponsor a number of journal clubs, mentored research and independent study opportunities.

The Department sponsors a PhD degree in Biomedical Sciences that enrolled 22 and graduated 4 students this year (Tables 4 and 5). Students entered this program either by direct application to the department or by selection after rotation through the Molecular, Cellular and Integrative Neurosciences (MCIN) Program. Of the 22 PhD students enrolled in 2008, 4 (18%) were supported by training grants and 3 (14%) were supported by individual NRSA's or comparable fellowships (Tables 4 and 6). Biomedical Sciences faculty also sponsored 30 students through other graduate programs and departments. One DVM/PhD student is currently being mentored by a Departmental faculty member.

The Department sponsors two types of MS degrees. The research MS-A program enrolled 19 and graduated 4 students in 2008 (Tables 4 and 5). These students have formal course requirements, write a thesis and formally present and defend their research. Four MS-A students (26%) were supported by individual fellowships (Tables 4 and 6). The MS-B program is a one-year, coursework-only degree program aimed at providing students aspiring to enter professional veterinary or medical schools or the biomedical industry with specific biomedical training. The department enrolled 110 and graduated 45 students in 2008 (Table 4).

With guidance from Erin Bisenius, Coordinator of Graduate Activities, the Graduate Student Association and its representatives contributed substantially to several Departmental and College activities, included planning the Fall Research Retreat and contributing to the planning of the Frontiers in Biomedical Sciences seminar series and the CVMBS Research Day. A number of students were active in the Brain Awareness Week outreach program to K-12. The Department sponsored a number of other activities aimed at building cohesiveness, including a fall barbeque and a spring reception for graduates and their families, faculty and colleagues.

In addition to existing seminar programs attended by the graduate students, the Department co-sponsors the Frontiers in Biomedical Science seminar series (with the Cell and Molecular Biology and the Molecular, Cellular and Integrative Programs). This series brings exceptional speakers of general interest to the campus. Speakers in 2008 included Dr. Robert Singer from Albert Einstein College of Medicine in New York and Dr. Michael Marletta from University of California Berkeley. The Department also sponsored a number of career speakers for graduate students and contributed financial support for the Front Range Neuroscience Regional Meeting

and the Rocky Mountain Reproductive Sciences Symposium, both organized by Departmental faculty members and students.

Undergraduate Education:

The Department contributed 13,235 student credit and 23,815 contract hours in teaching at the undergraduate level (Table 7). The Biomedical Sciences Undergraduate Major admitted its 4th class in 2008 and reached its cap enrollment target, with a total of 320 students enrolled by Fall 2008. The Department also has about 250 students declared in the BMS minor. In 2008, 15 students graduated with a BS in Biomedical Sciences and 115 students graduated with the BMS minor.

The Undergraduate Professional Advisor, Kelly Swetich, provided expert guidance for the BMS undergraduate students. The Undergraduate Major Steering Committee provided oversight for implementation and operations of the undergraduate major on issues such as recruitment criteria and activities, development of criteria for undergraduate scholarships, curriculum review and development, experiential learning opportunities, and preparation for graduation. New courses developed and offered for the first time in Spring 2008 included the Capstone (BMS 460, Essentials of Pathophysiology) and related Senior Seminar course (BMS 492, Seminar-Pathophysiology of Disease) and an introductory 200-level course (BMS 260, Introduction to Biomedical Sciences). BMS 487 (Internship) and BMS 498 (Research) were also added to address the need for experiential learning experiences.

General statistics of the 320 currently enrolled BMS undergraduate students:

- 16% indicated ethnically diverse backgrounds
- 25% non-residents
- 74% female
- 36% in the Honors Program; 37 in the Hughes Undergraduate Research Scholars (HURS) Program
- 3.38 – average CSU cumulative GPA
- The Biomedical Student Association (BSA), a very active undergraduate organization, hosted regular guest speakers, community service activities, and social events throughout the academic year.
- Daniel Woldtvedt, a BMS undergraduate student, received the national Barry M. Goldwater Scholarship. Ashley Denney, another BMS student, received Honorable Mention. The Barry M. Goldwater Scholarship and Excellence in Education Program was established by Congress in 1986 to honor Senator Barry M. Goldwater, who served his country for 56 years as a soldier and statesman, including 30 years of service in the U.S. Senate. The program awarded 321 scholarships for 2008-2009. The Goldwater Scholars were selected on the basis of academic merit from a field of 1,035 mathematics, science and engineering students who were nominated by the faculties of colleges and universities nationwide. This award has not been received by a CSU student since 2003.
- 10 students studied abroad at institutions located in Wales, Australia, Belize, South Africa, Italy, Argentina, and Czech Republic.
- 17 HURS students are being mentored by BMS faculty (7 are BMS majors).

Participation in Interdisciplinary Programs:

The NIH Training Grant in Mammalian Reproductive Biology is supported by faculty members in the Animal Reproduction and Biotechnology Laboratory, a designated Program in Research

and Scholarly Excellence (PRSE) and other areas in the Department (Table 8). In addition, faculty members in the Department form an important nucleus in the Molecular, Cellular and Integrative Neuroscience Program PRSE. Departmental faculty members also participated in the Merck/Merial Summer Research Program for PVM Students, the NIH Short-Term Training for Minority Students Program and the Hughes Undergraduate Research Scholars Program.

Postgraduate Education:

The Department is actively involved in providing postdoctoral students with advanced training. There are currently 10 post-PhD and 7 post-DVM graduates working in laboratories. In addition, departmental faculty trained 1 visiting student and 17 visiting faculty/clinicians during 2008.

Thornburg Awards:

The Department gives several research awards annually, sponsored by the Thornburg Endowment. In 2008, these included the following (Table 11):

Departmental Research Excellence Awards (retreat)

Jill Guttormsen (Best Talk – Session 1)

Katie Torley (Best Talk – Session 2)

Aida Ulloa (Best Graduate Student Poster)

Daesuk Chung (Best Postdoctoral Fellow Poster)

O.E. Thornburg Undergraduate Research Excellence Awards:

Hamid Gari and Daniel Woldtvedt

O.E. Thornburg Graduate Research Excellence Awards:

Albert Gonzales and Scott Purcell

VI. Research

Traditional strengths in the BMS Department include world-recognized programs in reproductive biology and anatomy/neuroscience. The reproductive biology focus includes faculty working in the broad areas of (1) pregnancy, reproductive development and stem cell biology (Anthony, Bouma, Hansen, Niswender, Sanborn, Seidel, Veeramachaneni, Winger); (2) fertility, sterility and contraception (Carnevale, Graham, Nett, Roess); (3) environmental reproductive toxicology (Bouma, Veeramachaneni); (4) assisted reproductive technologies and cryopreservation of animal germ plasm (Carnevale, Clay, Graham, Nett, Seidel, Woods); (4) reproductive cancers (Clay, Woods); and (5) clinical and infectious disease (Bowen, Hansen, Smeraski).

The neuroscience focus encompasses BMS faculty with research interests in a number of areas: (1) neurotransmission and circuitry (Hentges, Madl, Partin, Rash, Reist, Vigh); (2) neuroendocrinology and developmental biology (Clay, Hentges, Ishii, Nett, Tobet); and (3) ion channel structure and function (Amberg, Earley, Partin, Sanborn, Tamkun). Faculty positions awarded in 2008 will fill out strength in neuroendocrinology, sensory neurobiology and integrative neuroscience.

The developing cardiovascular focus includes faculty with broad interests in this area from several points of view: Amberg (changes in ion channel behavior in pathophysiological conditions; Anthony (placental insufficiency and predisposition for adult onset of diabetes, hypertension, stroke and coronary heart disease); Earley (regulation of arterial smooth muscle activity by ion channels); Frye (cardiovascular and pulmonary physiology and pathophysiology; clinical cardiovascular disease); and Tamkun (ion channel trafficking in relation to control of electrical excitability in the cardiovascular system).

The research enterprise is very strong (Table 9). Department research expenditures exceeded \$6,810,000 in 2008. Funding sources included peer-reviewed extramural funding, Agricultural Experiment Station funding, contracts and gifts. Activity in research also is evidenced by the high productivity of the faculty in producing peer-reviewed papers and other scientific publications (Table 11) and by receipt of one patent and applications for two more (Table 10).

Faculty members also have participated in international organizations, organized international symposia and collaborated widely around the world, thus enhancing the outreach and extending the reputation of the University.

VII. Service

Departmental faculty members have been engaged in important service activities for the University. This includes significant committee service at the Department, College and University levels and a very visible Short Course educational activity in Equine Reproduction, as well as an internationally respected commercial program in equine reproduction. The commercial program generated more than \$2.2 million in total revenues in 2008 and served 413 clients and 241 short course attendees. Faculty members also have been highly sought after as members on editorial boards and grant review panels, as consultants and as reviewers of manuscripts.

VIII. New Faculty

Dr. Quinton Winger joined the Biomedical Sciences faculty as an Assistant Professor in July 2008.

IX. Goals for 2009

- The Department will continue to evaluate its educational activities and course offerings, their effectiveness and their role in the educational mission.
- The Department is seeking a new Department Head in 2009 and is conducting 3 searches for new faculty members in the area of neuroscience.
- The Department will continue to sponsor activities that will enhance the research and academic programs of faculty and students and seek additional sources of support for scholarships and endowed lectureships.
- The Department will continue service and commercial activities and will encourage technology transfer.

Table 1: BIOMEDICAL SCIENCES FACULTY — 2008

Regular Faculty

Gregory C. Amberg , PhD, PharmD	Assistant Professor
<i>Specialty:</i> Membrane biophysiology	
Russell V. Anthony , PhD	Hill Professor of Biotechnology (part-time)
<i>Specialty:</i> Molecular endocrinology	
Gerrit J. Bouma , PhD	Assistant Professor
<i>Specialty:</i> Reproductive biology	
Richard A. Bowen , DVM, PhD	Professor
<i>Specialty:</i> Infectious disease and reproductive physiology	
Elaine M. Carnevale , DVM, PhD	Assistant Professor
<i>Specialty:</i> Equine assisted reproduction	
Colin M. Clay , PhD	Professor
<i>Specialty:</i> Molecular endocrinology	
Scott Earley , PhD	Assistant Professor
<i>Specialty:</i> Cardiovascular physiology	
Melinda Frye , DVM, PhD	Assistant Professor
<i>Specialty:</i> Cardiovascular physiology	
James K. Graham , PhD	Professor
<i>Specialty:</i> Male reproductive physiology	
Robert J. Handa , PhD [terminated 05/08]	Professor
<i>Specialty:</i> Reproductive biology, early pregnancy, fetal development	
Thomas R. Hansen , PhD	Traubert Professor and Director, ARBL
<i>Specialty:</i> Establishment and maintenance of pregnancy; Effects of maternal undernutrition	
Shane T. Hentges , PhD	Assistant Professor
<i>Specialty:</i> Pharmacology	
Douglas N. Ishii , PhD	Professor
<i>Specialty:</i> Molecular neurobiology	
Sue C. Kinnamon , PhD	Professor
<i>Specialty:</i> Molecular mechanisms of taste transduction	
James E. Madl , DVM, PhD	Associate Professor
<i>Specialty:</i> Neurotransmitter release in central nervous system disease	
Charles W. Miller , PhD	Professor
<i>Specialty:</i> Cardiovascular physiology	
Terry M. Nett , PhD	Professor
<i>Specialty:</i> Reproductive endocrinology	
Kathryn M. Partin , PhD	Associate Professor
<i>Specialty:</i> Structural and functional analysis of glutamate receptors	
John E. Rash , PhD	Professor
<i>Specialty:</i> Identifying and mapping connexins, aquaporins, and neurotransmitter receptors	
Noreen E. Reist , PhD	Associate Professor
<i>Specialty:</i> Molecular dissection of neurotransmitter release	
Deborah A. Roess , PhD	Professor
<i>Specialty:</i> Cellular endocrinology	
Barbara M. Sanborn , PhD	Professor and Head
<i>Specialty:</i> Hormonal signal transduction	
Michael M. Tamkun , PhD	Professor
<i>Specialty:</i> Molecular physiology, ion channels	

Stuart Tobet, PhD	Professor
<i>Specialty:</i> Developmental neurobiology	
D.N. Rao Veeramachaneni, BVSc, MScVet, PhD	Professor
<i>Specialty:</i> Andrology and reproductive toxicology	
Jozsef Vigh, PhD	Assistant Professor
<i>Specialty:</i> Neurobiology	
John P. Walrond, PhD	Associate Professor
<i>Specialty:</i> Structure and function of central and peripheral nicotinic cholinergic synapses	
L. Ray Whalen, DVM, PhD	University Distinguished Teaching Scholar
<i>Specialty:</i> Design, development, and evaluation of interactive multimedia educational programs	
Quinton A. Winger, PhD	Assistant Professor
<i>Specialty:</i> Genetic regulation of mammalian reproduction	
Gordon L. Woods, DVM, PhD	Professor and Alexander Chair in Equine Reproduction
<i>Specialty:</i> Equine reproduction	

Transitional Faculty

Gordon D. Niswender, PhD	University Distinguished Professor
<i>Specialty:</i> Reproductive endocrinology	
George E. Seidel, Jr., PhD	University Distinguished Professor
<i>Specialty:</i> Reproductive physiology	

Special Faculty

Anna D. Fails, DVM, PhD	Assistant Professor
<i>Specialty:</i> Teaching	
Mark B. Frasier, MS	Associate Professor
<i>Specialty:</i> Teaching	
Chun-Ying Ku, PhD	Assistant Professor
<i>Specialty:</i> Molecular signal transduction	
Lawrence Olsen, DVM	Assistant Professor
<i>Specialty:</i> Research	
Gary E. Pickard, PhD	Professor
<i>Specialty:</i> Biological rhythms	
Sandra Pitcaithley, PhD	Assistant Professor
<i>Specialty:</i> Teaching	
Cynthia Smeraski, PhD	Assistant Professor
<i>Specialty:</i> Neurobiology, neuroimmunology and infectious diseases	
Patricia J. Sollars, PhD [terminated 11/08]	Assistant Professor
<i>Specialty:</i> Chronobiology and sleep	
Connie Vader-Lindholm, PhD	Assistant Professor
<i>Specialty:</i> Teaching	

Joint Faculty

Kenneth Allen, PhD	Professor, Food Science and Nutrition
<i>Specialization:</i> Nutrition	
Jason Bruemmer, PhD	Associate Professor, Animal Sciences
<i>Specialty:</i> Equine reproduction	

Robert W. Gotshall, PhD Professor, Health and Exercise Science
Specialization: Cardiovascular and exercise physiology

Matthew Hickey, PhD Associate Professor, Health and Exercise Science
Specialization: Cardiovascular, nutrition and exercise physiology

Patrick McCue, DVM, PhD Associate Professor, Clinical Sciences
Specialization: Equine reproduction and assisted reproductive technologies

Christopher Orton, DVM, PhD Professor, Clinical Sciences
Specialization: Cardiopulmonary physiology / surgery

Narda Robinson, DO, DVM, MS, DABMA, FAAMA Assistant Professor, Clinical Sciences
Specialization: Complementary medicine

Bernard Rollin, PhD University Distinguished Professor, Philosophy
Specialization: Animal ethics

Affiliate Faculty

Dan Baker, PhD
 Colorado Division of Wildlife

Bruce W. Banfield, PhD
 Department of Microbiology, University of Colorado School of Medicine, Denver, CO

James Barry, MD
 The Children's Hospital, Denver, CO

Frederick Battaglia, MD
 Perinatal Research Center, University of Colorado Health Sciences Center, Denver, CO

Kurt Beam, PhD
 University of Colorado Health Sciences Center, Denver, CO

F. Edward Dudek, PhD
 Department of Physiology, University of Utah, Salt Lake City, UT

David Gardner, PhD
 Colorado Center for Reproductive Medicine, Denver, CO

Rayna Gonzales, PhD
 University of Arizona, Phoenix, AZ

Robert J. Handa, PhD
 University of Arizona, Tucson, AZ

William Horne, DVM, PhD
 Cornell University, Ithaca, NY

Richard Martin, MD
 Department of Medicine, Pulmonary Division, National Jewish Research and Medical Center, Denver, CO

Lowell Miller, PhD
 National Wildlife Research Center, Fort Collins, CO

Gary Pickard, PhD
 University of Nebraska, Lincoln, NE

William Sather, PhD
 University of Colorado Health Sciences Center, Denver, CO

Patty Sollars, PhD
 University of Nebraska, Lincoln, NE

Edward L. Squires, PhD
 Gluck Equine Research Center, University of Kentucky, Lexington, KY

Martha Tissot Van Patot, PhD
 Department of Anesthesiology, University of Colorado Health Sciences Center, Denver, CO

Randall Wilkening, MD
 Department of Pediatrics, University of Colorado Health Sciences Center, Denver, CO

Emeritus Faculty

Rupert P. Amann, tenure 1983–1995

Specialization: Male reproductive physiology

Howard O. Nornes, tenure 1972–2002

Specialization: Development and regeneration of the central nervous system

Robert Phillips, tenure 1964–1997

Specialization: General physiology

Bill W. Pickett, tenure 1967–2000

Specialization: Equine reproductive physiology; assisted reproductive technology

W. Lee Wilke, tenure 1978–2006

Specialty: Cardiovascular and renal physiology

Joint Faculty Appointments in Other Departments

Russell Anthony

Department of Pediatrics, UCHSC

Richard Bowen

Department of Microbiology, CSU

Douglas Ishii

Department of Biochemistry, CSU

Sue Kinnamon

Department of Cellular and Structural Biology, UCHSC

Noreen Reist

Special Appointment Faculty, UCHSC

Michael Tamkun

Department of Biochemistry, CSU

Ray Whalen

Department of Clinical Sciences, CSU

Gordon Woods

Department of Clinical Sciences, CSU

Visiting Faculty / Scientists

Dr. Mahmood Amiry-Moghaddam, University of Oslo, Oslo, Norway

Host: J. Rash

Alfredo Antoniazzi, Brazil

Host: T. Hansen

Juliano da Silveira, graduate student from Brazil

Host: J. Bouma

Dr. Christina Ferreira, Brazil

Host: G. Seidel

Dr. C. Sue Furman, University of Southern Illinois

Host: J. Rash

Thais Marques Granato, Brazil

Host: E. Carnevale

Prof. Ross Johnson, University of Minnesota

Host: J. Rash

Dr. Naomi Kamasawa, Japan

Host: J. Rash

Dr. Karima Mahmoud, Scientist, Egyptian Department of Agriculture
Host: G. Seidel

Dr. Ken McNatty, Victoria University of Wellington
Host: R. Veeramachaneni

Jimena Mugica, Mexico
Host: E. Carnevale

Table 5: DEGREES AWARDED — 2008

Ph.D. Degree

<u>Student</u>	<u>Advisor</u>	<u>Thesis/Dissertation Title</u>
Jessica Fawley	Dudek	Status Epilepticus, Epilepsy and the Estrous Cycle in an Animal Model of Temporal Lobe Epilepsy
Ryan Maresh	Anthony	Characterization of Mediators of Cardiac and Renal Development in Response to Increased Prenatal Testosterone
Scott Purcell	Anthony/Seidel	Characterization of Periattachment Factor
Michael Weiser	Handa	Estrogen Receptors Alpha and Beta: Opposing Roles in Hypothalamic-Pituitary-Adrenal Axis Function and Stress-Related Behaviors

M.S.-A Degree

<u>Student</u>	<u>Advisor</u>	<u>Thesis/Dissertation Title</u>
Nina Donner	Handa	Behavioral Effects of Estrogen Receptor Beta Acting Locally to Regulate the Expression of Tryptophan Hydroxylase 2 (TPH2) in Serotonergic Neurons of the Dorsal Raphe Nuclei
Melissa Hudson	Seidel / Graham	In Vitro Capacitation of Stallion Spermatozoa as Assayed by Fertilization of Bovine Oocytes
Paula Moffett	Bruemmer / McCue	Comparison of Dimethyl Formamide and Glycerol for Cryopreservation and Fertility of Equine Sperm
Megan Shoemaker	Hansen	Infection with Noncytopathic Bovine Viral Diarrhea Virus Results in Differential Expression of Immune Pathways, Including Type-I Interferon

Degrees Awarded in Other Departments to Students Advised by BMS Faculty

<u>Student</u>	<u>Advisor</u>	<u>Degree</u>	<u>Thesis/Dissertation Title</u>
Kristy McClellan	Tobet	Ph.D.	Role of GABA in Hypothalamic Nuclear Development
Brandon Wadas	Tobet (co-advisor)	M.S.	Development of the Gonadotropin-Releasing Hormone Neuronal Network in Normal and Endocrine-Disrupted Models

Table 6: FELLOWSHIP AND SCHOLARSHIP RECIPIENTS — 2008

Abney Foundation Scholarship

Fernando Campos-Chillon
Melissa Hudson
Gretchen Lund

Biomedical Sciences Undergraduate Scholarship

Megan Faucett
Brooke Jarvie
Matthew Vonloh

E.J. Carroll Memorial Scholarship

Sara-Lesley Rasmussen

Lisa Marie Craft Scholarship

Cari O'Driscoll

James N. Dupree Scholarship

Gretchen Lund

Ed H. Honnen Award

Gretchen Lund

Imagine The Possibilities . . . 100-Year Anniversary CVMBS Scholarship

Kyle Carter

Dr. Dean Pavillard Scholarship

Catie DeLuca

Delano F. Scott Scholarship

Kyle Miller
Andrew Stahly

France Stone Scholarship

Catie DeLuca

Thornburg Graduate Research Excellence Award

Albert Gonzales
Scott Purcell

Thornburg Undergraduate Research Excellence Award

Hamid Gari
Daniel Woldtvedt

Barry M. Goldwater Scholarship

Daniel Woldtvedt

Dr. Alan Tucker Memorial Scholarship

Nhung Nguyen

Office of International Programs Study Grant

Sarah Hindman

National Research Service Award or Individual Fellowship Recipients

Jennifer Anema (PRSE Fellowship)*

Dr. Jennifer Barfield

Jessica Fawley

Albert Gonzalez (NIH-NRSA Fellowship)

Jillian Guttormsen (PRSE Fellowship)*

Cheryl Hartshorn*

Dr. Andrew Hartwick

Bernardo Rodrigues (PRSE Fellowship)*

Samantha Schoeberl (PRSE Fellowship)*

Katie Torley (PRSE Fellowship)*

Rebecca Yourey (PRSE Fellowship)*

Training Grant Recipients

Rebecca Bott

Christianne Magee

Kristy McClellan

Scott Purcell

Amber Wolf-Ringwall

* Colorado State Graduate Fellowship

Table 7: COURSES TAUGHT — 2008

<u>Course #</u>	<u>Title</u>	<u>Instructors</u>
Spring		
PVM Courses		
VM 619	Veterinary Neurobiology	Fails, Lee, Pitcaithley, Whalen
VM 621	Exotic Animal Anatomy and Husbandry	Madl, Pitcaithley
VM 640	Biology of Disease I	Bowen
VM 744	Theriogenology	Bowen, Graham, Woods
VM 786A	Junior Practicum	Carnevale
VM 786B	Senior Practicum	Carnevale
Graduate Courses		
BC 698	Research	Roess
BC 798	Research	Ishii
BMS 501	Mammalian Physiology II	Anthony, Bowen, Seidel, Vader
BMS 531	Domestic Animal Dissection	Frasier
BMS 545	Neuroanatomy	Clapp, Fails, Hartman
BMS 633	Domestic Animal Anatomy: Case Discussion	Fails, Frasier
BMS 642	Research Techniques – Gametes & Embryos	Bowen, Carnevale, Graham, Niswender, Seidel, Veeramachaneni
BMS 684	Supervised College Teaching	Vader
BMS 695E	Independent Study – Surgical Anatomy	Frye
BMS 695F	Independent Study – Gross Anatomy	Frasier
BMS 699	Thesis	Hansen, Seidel
BMS 784	Supervised College Teaching	Carnevale, Fails, Frasier, Reist, Walrond, Woods
BMS 792A	Seminar – Biomedical Sciences	Bouma, Carnevale, Graham, Sollars
BMS 795A	Independent Study – Endocrinology	Anthony, Handa, Roess
BMS 795B	Independent Study – Neurophysiology	Earley, Reist, Sollars
BMS 795E	Independent Study – Reproductive Physiology	Bouma, Carnevale, Graham, Roess
BMS 796C	Group Study – Reproductive Physiology	Graham
BMS 799	Dissertation	Anthony, Bruemmer, Carnevale, Handa, Sollars
ERHS 602	Toxicological Mechanisms	Bouma, Earley
MGT 450	Biomedical Entrepreneurship I	Tobet
NB 503	Developmental Neurobiology	Handa, Ishii, Tobet
NB 505	Neuronal Circuits – Systems, Behavior	Handa, Hentges, Kinnamon, Reist, Tamkun, Vigh

<u>Course #</u>	<u>Title</u>	<u>Instructors</u>
NB 793	Neuroscience Seminar	Earley
NB 795	Independent Study	Earley
NB 796A	Group Study -- Ion Channels	Tamkun
NB 796C	Group Study – Topics in Neuroscience	Reist
NB 796E	Group Study – Neuroendocrine Mechanisms	Clay, Handa, Tobet

Undergraduate Courses

ANEQ 487	Internship	Hansen
BC 475	Mentored Research	Ishii, Tamkun
BC 499A	Thesis – Lab Research Based	Ishii, Tamkun
BMS 122	Drugs and the Human Body	Roess
BMS 124	Sexuality and Health	Nett
BMS 200	Concepts in Human Anatomy and Physiology	Cole, Early, Walrond
BMS 260	Biomedical Sciences	Clay
BMS 300	Human Anatomy and Physiology	Bouma, Bowen, Miller, Walrond
BMS 302	Laboratory in Principles of Physiology	Shoemaker, Vader
BMS 305	Domestic Animal Gross Anatomy	Frasier, Madl
BMS 330	Microscopic Anatomy	Madl
BMS 345	Functional Neuroanatomy	Clapp, Foradori, Hartman, Kinnamon, Reist
BMS 360	Fundamentals of Physiology	Ishii, Miller, Veeramachaneni
BMS 365	Nerve & Muscle – Toxins, Trauma and Disease	Kinnamon, Rash, Smeraski, Whalen
BMS 384	Supervised College Teaching	Frasier, Walrond
BMS 450	Human Pharmacology	Ishii, Jones, Nett, Wilke
BMS 460	Essentials of Pathophysiology	Miller, Roess, Smeraski, Veeramachaneni
BMS 492	Seminar – Pathophysiology/Disease	Miller, Roess, Smeraski, Veeramachaneni
BMS 498	Research	Sanborn

Summer PVM Courses

VM 786B	Senior Practicum	Carnevale
---------	------------------	-----------

Graduate Courses

BC 698	Research	Tobet
BC 699	Thesis	Tobet
BMS 684	Supervised College Teaching	Frasier
BMS 695C	Independent Study – Neuroanatomy	Madl
BMS 795C	Independent Study – Cell Physiology	Roess

Undergraduate Courses

BMS 300	Human Anatomy and Physiology	Clay, Miller, Walrond
BMS 301	Human Gross Anatomy	Frasier, Hartman
BMS 495	Independent Study	Frasier

Fall

PVM Courses

VM 616	Functional Anatomy	Fails, Lee, Madl, Pitcaithley, Whalen
VM 618	Organ Systems – Anatomy and Physiology	Bowen, Fails, Frye, Pitcaithley, Walrond
VM 722	Veterinary Pharmacology	Amberg, Ishii, Madl
VM 749	Clinical Sciences III	Fails
VS 333	Domestic Animal Anatomy	Madl

Graduate Courses

BC 698	Research	Roess
BC 798	Research	Ishii
BMS 500	Mammalian Physiology I	Earley, Hentges, Kinnamon, Tamkun
BMS 575	Human Anatomy Dissection	Clapp, Frasier
BMS 610A	Managing a Career in Science	Clapp, Fails, Frasier, Kogan, Madden, Partin, Tobet, Vigh
BMS 610B	Managing a Career in Research	Failr, Partin, Sanborn, Tamkun, Vigh
BMS 619	Advanced Human Gross Anatomy	Clapp, Frasier
BMS 640	Reproductive Physiology and Endocrinology	Anthony, Bouma, Clay, Hansen, Sanborn, Seidel, Veeramachaneni
BMS 684	Supervised College Teaching	Clapp, Frasier, Vader
BMS 695A	Independent Study – Developmental Anatomy	Madl
BMS 695C	Independent Study – Neuroanatomy	Ishii, Frasier, Madl
BMS 695E	Independent Study – Surgical Anatomy	McIlwraith
BMS 699	Thesis	Tobet, Seidel
BMS 784	Supervised College Teaching	Clapp, Fails, Frasier, Walrond, Whalen
BMS 792A	Seminar – Biomedical Sciences	Partin
BMS 792C	Seminar – Reproductive Physiology	Anthony, Frye
BMS 795A	Independent Study – Endocrinology	Anthony, Tobet
BMS 795B	Independent Study – Neurophysiology	Earley
BMS 795C	Independent Study – Cell Physiology	Roess, Vigh
BMS 795D	Independent Study – Cardiopulmonary Physiology	Earley, Frye
BMS 795E	Independent Study – Reproductive Physiology	Bouma, Carnevale, Graham, Roess, Seidel, Woods

BMS 796A	Group Study – Neurophysiology	Clay
BMS 796C	Group Study – Reproductive Physiology	McCue
BMS 799	Dissertation	Niswender, Roess, Tobet, Winger
CM 795	Independent Study	Roess
CM 799	Dissertation	Roess, Sanborn
ERHS 502	Fundamentals of Toxicology	Bouma
MIP 651	Immunobiology	Smeraski
MIP 698	Research	Bowen
MIP 798	Research	Bowen
MIP 799	Dissertation	Bowen
NB 500	Readings in Molecular & Cellular Neuroscience	Tamkun
NB 501	Cell and Molecular Neurophysiology	Tamkun
NB 771	Grant Writing	Kinnamon, Reist, Tobet
NB 796A	Group Study – Ion Channels	Tamkun
NB 796C	Topics in Neuroscience	Reist
NB 796E	Group study – Neuroendocrine Mechanisms	Tobet

Undergraduate Courses

BC 475	Mentored Research	Ishii
BC 499A	Thesis – Lab Based Research	Ishii
BMS 192	Freshman Seminar in Biomedical Sciences	Vader
BMS 200	Concepts in Human Anatomy and Physiology	Bourland, Hickey, Walrond
BMS 300	Human Anatomy and Physiology	Clay, Miller, Walrond
BMS 301	Human Gross Anatomy	Clapp, Frasier
BMS 302	Laboratory in Principles of Physiology	Hines, Vader
BMS 325	Introduction to Cellular Neurobiology	Hentges, Kinnamon, Stone-Roy, Tobet, Vigh, Volbrecht, Walrond, Whalen
BMS 384	Supervised College Teaching	Clapp, Frasier, Walrond
BMS 420	Cardiopulmonary Physiology	Miller
BMS 430	Endocrinology	Graham
BMS 487	Internship	Miller
BMS 495	Independent Study	Earley, Frasier, Miller, Reist
BMS 496	Group Study	Clapp, Frasier
BMS 498	Research	Bouma, Clay, Rash
ERHS 446	Environmental Toxicology	Veeramachaneni
LIFE 102	Attributes of Living Systems	Roess
MGT 450	Biomedical Entrepreneurship I	Tobet

Table 8: TRAINING GRANTS — 2008

	<u>Sponsor</u>	<u>Grant Title</u>	<u>Dates</u>	<u>Total \$</u>
G. Florant, PI	NIH	Short-term Training Program for Minority Students in Biomedical Sciences	7/04–6/09	211,754
T. Nett, PI	NIH	Training in Mammalian Reproductive Biology	5/05–4/10	789,900

Table 9: RESEARCH FUNDING — 2008

<u>PI Name</u>	<u>Sponsor</u>	<u>Title</u>	<u>Dates</u>	<u>Total Expenditures</u>
Amberg	American Heart Assoc	Calcium sparklets during hypertension	7/1/06–6/30/10	53,038.95
	CRC	Regulation of calcium sparklets by reactive oxygen species	7/1/08–6/30/09	1,068.93
Anthony	NIH-NICHD	Regulation of placental metabolism by glucose supply (W.W. Hay, Jr., PI; R. Anthony, Co-I)	2/22/02–1/31/08	CU
	NIH-NICHD	Fetoplacental amino acid metabolism in IUGR pregnancies (R.B. Wilkening, PI; R. Anthony, Co-I)	7/1/02–6/30/08	CU
	NIH-NICHD	Fetal and neonatal hemodynamics in IUGR	9/1/03–8/31/08	CU
	NIH	Prenatal hypoxia and development of insulin resistance	7/1/05–6/30/07	0
	NIH-NICHD	Early placental development in IUGR pregnancies	7/29/05–5/30/10	CU
	USDA	Characterization of periattachment factor (Co-PI; Seidel Co-PI)	9/1/05–8/31/08	30,969.27
	CRC	Placental-fetal hormonal interactions (W112 project)	7/1/07–6/30/08	11,724.54
	CRC	Placental-fetal hormonal interactions (W112 project)	7/1/08–6/30/09	12,208.24
	CRC	MicroRNAs in sheep reproduction and development	7/1/07–6/30/08	16,386.18
	CRC	Environmental regulation of sheep fetal gonadal programming through microRNAs and DNA methyltransferases	7/1/08–6/30/09	12,264.46
Bouma	NIH	United States based collaboration in emerging infectious disease (Co-PI; B. Beaty, PI)	9/29/02–9/29/08	122,866.16
	NIH-NIAID	RCE: Animal models scientific facilities core (Core Scientist)	6/1/05–4/30/09	MIP
	NIH-NIAID	New OPS funds (Co-PI)	6/1/05–4/30/09	MIP
	NIH-NIAID	Program income for RCE	6/1/05–4/30/09	MIP
	Lawrence-Livermore Labs	Evaluation of a synthetic vaccine to protect mice from West Nile virus	4/24/06–9/30/08	2,063.12
	CDC	Zoonotic avian influenza: The human-animal interface in the US and Asia	9/30/06–9/29/09	637,400.92
	Merial, Ltd.	Evaluation of efficacy of a multivalent West Nile vaccine	11/10/06–10/31/09	9,220.95
	Merial, Ltd.	Eastern Equine Encephalitis (EEE): A dose/response study in horses on the Sindbis EEEV South American . . .	3/19/07–6/30/07	8,986.52

<u>PI Name</u>	<u>Sponsor</u>	<u>Title</u>	<u>Dates</u>	<u>Total Expenditures</u>
Carnevale	Merial, Ltd.	Evaluation of the efficacy of a WNV vaccine against an experimental WNV-intrathecal challenge in horses	5/7/07– 3/31/08	89,888.00
	USDA-APHIS	Evaluations of wild bird AI surveillance sampling and testing protocols	9/20/07– 9/19/08	55,614.68
	Hennessy Research	Efficacy of a West Nile virus vaccine in horses	10/1/07– 12/31/07	5,196.29
	Intervet	Immunogenicity of equine West Nile vaccine in horses	2/18/08– 5/16/08	82,111.26
	GlobeImmune, Inc.	Ferret study for GI-8004 with seasonal influenza virus challenge	4/1/08– 6/30/08	52,545.64
	NIH	Neurological sequelae in survivors of West Nile virus (Investigator)	4/15/08– 3/31/10	57,279.64
	Hennessy Research	Evaluation of West Nile virus vaccines in horses (Phase 1)	6/1/08– 12/31/08	47,828.82
	Hennessy Research	Evaluation of West Nile virus vaccines in horses	7/1/08– 1/31/09	36,226.76
	USDA-APHIS	Indonesian HPIA Testing Cooperative Agreement	9/16/08– 9/15/09	0
	Intervet	Duration of immunity testing in horses	12/26/08– 3/23/09	0
	Hylton Foundation	Development of assisted reproductive techniques for mares and stallions (Co-PI; E. Squires, Co-PI)	7/1/05– 6/30/11	27,055.84
	PEG	Differences in arrest and resumption of oocyte maturation in young versus old mares (Co-PI; E. Squires, Co-PI)	4/1/07– 10/1/08	40,572.44
	XY, Inc.	Use of sexed semen to produce embryos in vitro (Co-PI; E. Squires, Co-PI)	9/6/07– 9/5/08	5,978.54
	CRC	Advanced age alters meiotic and fertilization competency of oocytes in mares	7/1/07– 6/30/08	21,000.00
Clay	PEG	Age associated alterations in fertilization and blood flow	7/1/07– 6/30/08	40,572.43

Table 11: AWARDS — 2008

Richard A. Bowen

Provost's N. Preston Davis Award for Instructional Innovation, Colorado State University

Elaine M. Carnevale

Pfizer Animal Health Award for Research Excellence

Mark Frasier

2008 Honors Professor of the Year, Colorado State University
Award for Innovative Instructional Methodology in Undergraduate Education, Colorado State University

Charles Miller

Outstanding Faculty Member, Biomedical Sciences Students, Colorado State University

George E. Seidel, Jr.

Pioneer Award, International Embryo Transfer Society
Researcher of the Year Award, Colorado State University Research Foundation
Animal Physiology and Endocrinology Award, American Society of Animal Science

Edward L. Squires

Distinguished Alumni Award, West Virginia University College of Agriculture,
Forestry and Consumer Sciences

John Walrond

Best Teacher Award, Colorado State University Student Alumni Connection and Alumni Association

L. Ray Whalen

Award for Innovative Instructional Methodology in Professional Veterinary Medicine Education

Student Awards

O.E. Thornburg Graduate Research Excellence Award

Albert Gonzales (Earley lab), Scott Purcell (Anthony/Seidel labs)

O.E. Thornburg Undergraduate Research Excellence Award

Hamid Gari, Daniel Woldtvedt

Student Award, Experimental Biology, Molecular Physiology Section of American Physiological Society

Rachael Crnich (undergraduate student in Earley lab)

Highest Honors, Colorado State University Undergraduate Research and Creativity Poster Session

Rachael Crnich (undergraduate student in Earley lab)

Best Talk, Session 1 BMS Graduate Research Retreat

Jill Guttormsen (Winger lab)

Best Talk, Session 2 BMS Graduate Research Retreat

Katie Torley (Bouma lab)

Best Grad Student Poster, BMS Graduate Research Retreat

Aida Ulloa (Sanborn lab)

Best Post-Doc Poster, BMS Graduate Research Retreat

Daesuk Chung (Sanborn lab)

Table 10: PATENTS — 2008

T.R. Hansen

Patent application — *Surrogate maternal markers for fetal viral infection and other inflammatory responses*. Patent ref: CSURF Technology ID 08-031, PCT/US 61014172, filed 12-17-07, continuation 12-17-08, Thomas R. Hansen and Natalia Smirnova..

Patent issued — *Methods and compositions for the detection of pregnancy in ruminants*. Patent ref: 43,047; 3309-WYO.05-091, licensed to AspenBio, Inc., Thomas R. Hansen and Kathleen J. Austin

Patent application — *Pregnancy detection*. Patent ref:PCT/US2003/0224452A1, Mark Colgin, Diane Newman, Cathy Landmann, J.W. Roth and Roger Hurst, co-inventors Thomas R. Hansen and Kathleen Austin.

BUDGET — 2007/2008

Biomedical Sciences – Main Accounts	Allocation 7/07-6/08	Expenses 7/07-6/08	Indirect Cost Return Allocation	ICR Expenses
Faculty Salaries	2,908,244	2,589,226		
Admin Pro Salaries	316,861	266,493		3,538
State Classified Salaries	298,512	286,100		33,882
GTA Salaries	70,470	75,984		
Operating/Supplies/ Travel, etc.	204,245	38,388	114,000	5,271
Equipment Reimbursement		<2,144>		
Other Direct		2,353		15,150
Balance Forward	16,861		859	
BCR's	<148,952>		<50,500>	
MOU's	<63,400>			
Dean's Adjustment				
Subtotal	3,602,841	3,256,400	64,359	57,841
Neuroscience Division Accounts	Allocation	Expenses	Indirect Cost Return Allocation	ICR Expenses
Salaries		26,138		4,285
Operating/Supplies/ Travel, etc.	104,606	39,482	98,534	97,583
BCR's	<5,426>		19,500	
Balance Forward	5,183		<1,713>	
MOU's	<27,000>			
Subtotal	77,363	65,620	116,321	101,868
Physiology Division Accounts	Allocation	Expenses	Indirect Cost Return Allocation	ICR Expenses
Salaries		29,680		1,710
Operating/Supplies	70,057	45,891	24,528	49,273
BCR's	15,379		26,281	
Balance Forward	39		25	
MOU's	<5,000>			
Subtotal	80,475	75,571	50,834	50,983
	State Allocation	Expenses	Budgeted	ICR Expenses
Summer Teaching	48,603	42,718		
Recruiting Expenses			38,126	45,058
Seminar Expenses			770	1,937
Total Biomedical Sciences	3,809,282	3,440,309	270,410	257,687
