Letter to Graduates From President Tony Frank

Collegian File Photo

**The occasion is piled high with difficulty,
and so we must rise with the occasion.
As our situation is new, we must think
anew and act anew.**

— President Abraham Lincoln

Dear Graduates,

Congratulations on your upcoming commencement! This is a great occasion for you and for Colorado State University, and we are enormously proud of our students and all you have achieved.

The outlook for the Class of 2015 is encouraging. In recent years, 81 percent of our graduating students secured their first destination plans—either a job or admission to graduate school—within six months of graduation. Our students also left CSU with smaller average debt loads, and 92 percent said they would choose Colorado State again. Most recently, a national study has revealed that CSU graduates by mid-career are earning more than the national average—pointing to the long-term economic value of your degree.

Still, I know these kinds of statistics don't matter much when you're trying to find a decent-paying job in your field—and student loans are coming due. So let me pile on with some more statistics that might help brighten your perspective: Countless financial analysts continue to demonstrate that a college degree ultimately has a greater payoff than a similar investment in the stock market. The Brookings Institution calculates the return on investment on a student loan at 15 percent annually. College graduates earn on average \$1 million more over their working lives than people without a bachelor's degree.

In other words, the hard work you've put in to get to this point is a great investment in yourself and your future. But the most important payoff from that investment is what you actually do with the skills, knowledge and credentials you've acquired at Colorado State. Our world needs you—your ideas, your passion and your commitment. We have problems that need fixing. How do we feed a world

whose population is expected to grow to 9 billion in the decades ahead? How do we safely and sustainably meet the world's energy needs? How do we combat the rapid spread of disease in a world that seems to get smaller day by day? How do we help instill hope and a sense of real potential in younger generations that see these challenges coming their way?

As educated women and men, these challenges are now yours. The solutions won't be easy or obvious—if they were, my own generation would have solved these problems a long time ago. But I have full confidence that those solutions are within your reach.

In that spirit, I want to offer a thought from the man who authorized the creation of Land-Grant Universities like CSU more than 150 years ago, President Abraham Lincoln. (You didn't think I'd miss a chance to quote Lincoln, did you?) In his now famous annual address to Congress on Dec. 3, 1863, he spoke these words:

"The occasion is piled high with difficulty, and so we must rise with the occasion. As our situation is new, we must think anew and act anew."

You are leaving CSU to venture off into the new—and that path is yours to clear and build.

The term "commencement" signifies that the end of this phase of your education is not truly an end, but a beginning—a foundation upon which you will build a life and career. Your graduation is, indeed, a beginning. Make the most of it, and take on your future with a sense of optimism and the confidence that you've made an outstanding investment in your future.

All of us at CSU are proud of you, and we celebrate this achievement with you. Congratulations again to the Class of 2015!

Dr. Tony Frank
President

Congratulations 2015 Graduates!

A Graduate's Freshman Year in Review

By Erin Douglas
College Avenue Magazine

April 4, 2011

Obama announces he will run for reelection

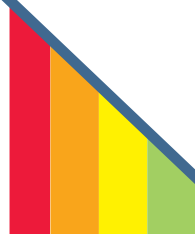

This news foreshadowed the president's visit to the CSU campus during graduates' sophomore year, Aug. 28, 2012. The graduates have had an involved college experience with the Obama Administration. Obama was president in the four years they were in school and won a second term against Romney during this time. Most recently, first lady Michelle Obama also visited the campus Oct. 23, 2014.

May 20, 2011

Legalization of Marijuana initiative files with the Colorado Attorney General in hopes of being put on the 2012 ballot.

The idea to legalize marijuana began in 2011. The graduates voted on Amendment 64 in 2012. It passed but was not implemented until 2014.

June 2011

Same-Sex Marriage is legalized in New York

Throughout the year of 2011, only six states allowed same sex marriage: Connecticut, Iowa, Massachusetts, New Hampshire, Vermont, District of Columbia and New York. Now, 37 states have legalized same-sex marriage, including Colorado. The Supreme Court will most likely make a decision on same-sex marriage in June 2015.

August 2011

The freshman class sets a record for the most students and most diverse class prior to 2011

"We are particularly proud to be welcoming a record number of diverse and first-generation students to the most academically qualified freshman class in CSU history," President Tony Frank said during a press release at the time.

Occupy Wall Street movement begins

Inspired by uprisings in Egypt and Tunisia, the movement aimed to fight back economically against the richest 1 percent of the U.S. population.

Sept. 17, 2011

September 2011

Snapchat is created

There's no question that Snapchat is now one of the most used social media apps by college students. The graduates remember when it caught on, when it changed from a happy ghost to an expressionless ghost, the Snapchat stories update, the interesting feature to exchange money and the newest additions of live streams and Discover.

Oct. 5, 2011

Steve Jobs dies

The Apple co-founder, dies at 56.

Dec. 15, 2011

The United States formally declares an end to the Iraq War

March 2012

Peyton Manning signs a 5-year contract with the Broncos

Jan. 1, 2012

The End of the World Countdown begins based on a prediction by an ancient Mayan calendar

5 trends from 2011-2012

1. Adele's "Rolling in the Deep" was the number one song
2. Hair feathers
3. "Draw Something" (mobile app game)
4. "Jersey Shore" (reality TV show)
5. "Friday" by Rebecca Black

"My world view has become more all-encompassing. I pay more attention to what's going on around the world and I am more critical of issues that I may not have given a second thought to before," said Cameron Fritz, senior civil engineering major.

"The campus is trying to grow, and compared to how it was when I started, it really has," said Sarah Taylor, senior technical theatre major.

By Jessica Hayes
College Avenue Magazine

Graduation is approaching fast, and many students will move on with their lives, finding their place in large companies or impressive careers. Students will search for a career they are passionate about, something they will be able to wake up for every day and be excited to go to work. As people say, "You'll never work a day in your life if

you have a job you love." These students had to start somewhere. As college students, we find it challenging at times to find that balance between work and school. Some students don't even have time to work during their college years, but many find time to help pay their rent. Some students have the opportunity to have great jobs in college, something we all strive to find.

Austin Campbell, a senior majoring in computer information systems, had an amazing experience during his time working for the mastermind of all companies, Apple.

"It was probably the best job I could have as a college student," Campbell said. "I learned a lot about business more than technology just because I already knew about the technology. It was a great experience."

Working in customer service, Campbell spent his time answering the many questions Apple users encounter. He also got to go through Apple's rigorous training program to give him added experience in the technology field.

Lucy Skrobacz, a junior majoring in journalism and media communication, has had many jobs during her college career. From passing out the campus newspaper every day to working in the retail and food industries, Skrobacz continues to build up her resume with an impressive workload.

"My favorite part of being on

the [Collegian] Street Team is that I get to say 'I have a great day' to so many great people," Skrobacz said. "I know it's a small gesture but I hope it actually impacts people."

Not many people in the food industry can say they love showing up to work everyday. It can be an overwhelming job, whether it be waitressing, hosting or cooking. Skrobacz finds a great balance with her job at Ben & Jerry's.

"I love working at Ben & Jerry's because customers are always happy," Skrobacz said. "Who isn't happy when they're getting ice cream? As staff, we all have so much fun working together that work doesn't feel like work."

Gabrielle Smith, a sophomore more majoring in psychology, found herself working at Studio Be Salon. Time management is key when working many hours during your college career.

"I would say as far as Studio Be, it could definitely be stressful when my hours were

more than I was comfortable with or I had a lot going on in school, but overall, it has been a great experience," Smith said. "It's a little hard because all of my coworkers are older than me but that kind of adds to the experience too. Managing my time pretty much meant doing my homework after I got off at 10 p.m."

Working in college is an impressive addition to your resume. Many employers look for students who are able to manage their time efficiently and get an education while also gaining experience in a work environment.

Internships are also crucial to a successful resume during a college career. As many students move on after graduation to bigger and better careers, there is always room for younger students to begin applying for that next chapter in life. Work in college can be challenging but well worth the time spent investing in yourself.

DEBT

(Not a Life Sentence)

By Erin Douglas
College Avenue Magazine

As graduates walk across the stage this spring, many will be taking more than a diploma into the real world: debt. Student loans have caused a majority of graduates in Colorado to start their career by paying off their debt, according to the Colorado Public Interest Research Group. The Colorado Department of Higher Education stated in the 2014-15 Financial Aid Report that the average debt at graduation in Colorado was \$26,000 per borrower.

"The student debt that I have amassed is absolutely nuts," said Cassie MacDonald, senior education major.

"Thankfully, my

parents believe in education and believe there is value to it. Some families do not have the same support, and I think because college is so expensive, it expands this vicious cycle of the rich getting richer and the poor getting poorer."

At CSU, the average starting salary after graduation is \$45,000, according to university research based on surveys of recently departed graduates. The research also found that 81 percent of graduates were either employed or continuing education within six months of graduation.

"I believe that CSU is a great university and surprisingly cheaper than other universities in which my friends have attended," MacDonald said. "I love the work that I do and believe that I received an awesome education at CSU."

While students may believe their student loans were worth the investment in their education, debt is still a financial hardship that many will have to face right as their career kicks off.

There are many ways to begin paying off student loans, but if ignored, the cost of education is going to spiral out of control. Student loan debt doesn't have to haunt students forever, but taking steps to reduce it immediately after graduation is imperative.

After graduation, direct subsidized loans will begin collecting interest at 4.66 percent if the loan was disbursed on or after July 1, 2014 and before July 1, 2015. For loans prior to this academic year, check with the loan service provider. For direct unsubsidized loans, the borrower is responsible for interest while in school and after at a rate of 4.66 percent for undergraduates.

Although it is rare, some student loans can be forgiven or canceled if you get a job as a teacher in a low-income school or as a public service employee and have a Perkins Loan.

Go to studentaid.ed.gov to find out if you could qualify for forgiveness, cancellation or discharge.

5 Steps to Get Started Paying off Your Loans:

- 1 Go to studentaid.ed.gov to learn about repayment plans, loan service providers, loan consolidation and default.
- 2 Make sure you know who your loan service provider is and maintain contact with them. Let them know if your financial circumstances have changed.
- 3 Use the Repayment Estimator on studentaid.ed.gov to look at which repayment plans you may be eligible for and estimate how much you would pay monthly and overall.
- 4 Make a payment plan. Many loan service providers allow you to make a payment plan customized to your income and costs.
- 5 Keep up with your monthly payments and avoid default.

Potential Jobs That Could Cancel Your Perkins Loans:

- 1 Teacher
- 2 Volunteer in the Peace Corps or ACTION program
- 3 Member of the U.S. Armed Forces
- 4 Nurse or medical technician
- 5 Law enforcement or corrections officer
- 6 Head Start worker
- 7 Child or Family Services worker
- 8 Professional provider of early intervention services

Fashion after Graduation

By Octavia Perry
College Avenue Magazine

After graduation, your closet full of pajama pants and sweatshirts will evolve into a closet filled with pantsuits and knee-length skirts. Your college hoodie and sweatshirt leggings don't scream, "Hire me!" and therefore, will have to go.

Liamour Johnson, a sophomore journalism major, suggests dressing more professionally, which means no more Uggs or baseball caps as your everyday wear. As a

working member of society, the professional world will require you to take the time to actually get ready and be as presentable as possible.

After getting rid of your everyday college wear, it's time to develop your own and new professional style. Button-down shirts and pencil skirts will become your new go-to every morning.

Your closet will become filled with blazers, blouses, suit jackets and slacks. This new acquired style may seem boring and disappointing, but you can always spice it up

and make it your own.

"The way you dress should reflect your own unique style, but in given professional circumstances you should dress accordingly," said Lindsey Hale, an undeclared sophomore.

For example, to spice up a blouse and pencil skirt, add fun colored and patterned scarves and shoes to change your look. This could also be an opportunity to experiment with your makeup and hair to find something that works for your new professional apparel, but still

reflects your personality.

To separate yourself from everyone wearing a suit and tie, add a bright and playful tie, or maybe a bow tie. Dressing professionally doesn't mean you have to settle for the gray suit. Even in professional settings, you should strive to stand out from the others.

After graduation, you will be forced to say goodbye to your beloved flip-flops and CSU hoodies but will say hello to a new and fun yet professional style.

ROTC at CSU: An insider's perspective

By Hunter Goddard

College Avenue Magazine

A college education can be challenging enough, but, as graduation approaches for this year's 1st Battalion, the CSU Army Reserve Officers' Training Corps (ROTC), these military graduates are at the forefront of an increasingly complex world.

Lt. Col. James Blanton has been a professor of military science at CSU since July. He enlisted in the Army 25 years ago and graduated from the University of Texas with an undergraduate degree in government. He holds his master's in military arts and science.

"A military education gives you a different look at the world," Blanton said. "We

worked with incredible people across the globe—all from different nationalities and cultures. The military has to be a disciplined organization, and there's a leadership aspect that a lot of people don't get."

Blanton said he was a squad leader by the time he was 22 years old, responsible for nine other soldiers. The number of soldiers and the dollar amounts that he is in charge of have only increased since then, according to Blanton.

"I joined during the Cold War, and, the year after basic training, the Wall fell in Berlin," Blanton said. "The military I joined was originally designed to counter the Soviets. The Global War on Terrorism has changed our perspectives

from high-end conflict to more urban environments."

A military education gives you a different look at the world."

— Lt. Col. James Blanton

According to Blanton, today's soldier operates in and around indigenous populations, and studying the nuances of any given culture is the key to success. Understanding what motivates ISIS is not as easy as reading up on Marx or Lenin to understand the Communists, Blanton said.

"Students in ROTC this year have an incredible opportunity as the Global War on Terror shifts," Blanton said. "The military and the Army are struggling to define their mission. New, young officers get to be right there at the beginning."

Cadet Jonathan Kummer is one of Blanton's graduating seniors. Kummer is majoring in natural resources management, and his participation in ROTC automatically grants him a military sciences minor.

"I saw how good the program was here at CSU while I was still in high school, and I decided to give it a try," Kummer said. "It's such a welcoming environment, so I decided to stay."

Kummer said his military education taught him balance

and time management.

According to Kummer, everyone in ROTC has different majors, and, no matter what that major is, the program is doable.

"The Army has taught me how to look at the world from different angles," Kummer said.

Kummer will be enlisted in the National Guard after graduation, and he found a civilian side job up in Alaska at the Center for Environmental Management of Military Lands.

"We learned so much more from ROTC than just about college or the Army, but about life in general," Kummer said. "We learned how to be a better person and how to have better people skills."

"Cyber's Most Wanted" FBI List

According to Lt. Col. James Blanton, a professor of military science at CSU, the Army's cyber branch is becoming official next year. Cyber crime is the way of the future. The FBI has a "Cyber's Most Wanted" list available on its website.

1. Evgeniy Mikhailovich Bogachev
Wanted For: Conspiracy to Participate in Racketeering Activity

2. Nicolae Popescu
Wanted For: Conspiracy to Commit Wire Fraud

3. Alexsey Belan
Wanted For: Computer Intrusion

4. Viet Quoc Nguyen
Wanted For: Computer Intrusion

5. Peteris Sahurovs
Wanted For: Wire Fraud

6. Sun Kailiang
Wanted For: Conspiring to Commit Computer Fraud

7. Huang Zhenyu

Seniors admit their most EMBARRASSING moments in college

By Sarah Hansen

College Avenue Magazine

Graduating from college is one of the most monumental moments you can experience in your entire academic career.

You've taken all the impossibly difficult courses. You've stayed awake all night cramming for exams and presentations. You've nearly been in tears from the immense stress that being in college can bring. At this point in college, you've accomplished everything. It's easy to feel like you're on top of the world.

It's even easier to forget about all the little *aux pas* that happened along the way. There are a few fellow seniors,

however, who are not ashamed to speak up about their most embarrassing moments as a student at CSU.

One of these embarrassing moments happened for senior human development and family studies major Taylor Sundermeier.

During the first few weeks of her freshman year, she was taking a business class with a group of upperclassmen who she said she really wanted to impress. One day, Taylor had to do a presentation, and she was dressed in business attire.

"I was walking with all the upperclassman to class and was really nervous to present in front of them," Sundermeier said. "Then, out of nowhere,

I tripped on the steps and scrapped my legs and arms. I even had a Marilyn Monroe moment!"

Senior history major Terrance Dickens could also relate to Sundermeier's awful first college presentation experience.

Dickens said he completely misinterpreted the main objective of a speech he had to present. Instead of describing unconventional ways to use an object, he simply described the object.

"Everyone in the room was looking at me like I was crazy," Dickens said. "At one point, I realized I was completely messing up the speech. I kind of ended it awkwardly and

quickly went to my seat."

Dickens said he received the low grade he expected, with only two words written by his professor: "Impress me."

An embarrassing moment from more recent times happened only a few weeks ago to senior health and exercise science major Carlos Jaquez.

"I was walking out of Yates in between a heavy time for traffic in that walkway," Jaquez said. "I had a lot running through my mind. I walked through the first set of doors with ease, but the second set were completely stuck."

Jaquez then said he proceeded to walk and smashed his entire face into the glass.

"So many people saw it

happen, but I just had to keep moving and walk it off," Jaquez said.

Yes, even the least embarrassing of stories can seem like the biggest of issues when they happen, but everyone manages to keep moving and walk it off.

Life moved on for the three seniors and led them to their final college moment of graduating at the end of this week. Hopefully, one last embarrassing trip up the stage at the ceremony isn't in any of their futures.

"I was walking out of Yates in between a heavy time for traffic in that walkway . . . I walked through the first set of doors with ease, but the second set were completely stuck." But, Jaquez said he kept walking and smashed his face into the glass.

– Carlos Jaquez,
health and exercise science

Expert's advice on Goal Setting

By Sarah Ross

College Avenue Magazine

Many seniors express feeling unprepared or scared of the future, but well thought out goals will get you where you want to be with time to spare.

To help you on this journey is Ruth Newell, a facilitator who uses ATH: Planning Alternative Tomorrows with Hope to help people plan their future.

She works with many groups, including community clubs and special needs adults, on how to make their dreams come true.

Setting goals gives a person a sense of direction and gives a sense of purpose to an activity.

-Ruth Newell

By beginning with the end in mind, you can achieve great things and experience unbridled success in your life. Newell said. Goals, once set and achieved, give a sense of accomplishment and provide a road map of where you want to go and how you plan to get there.

However, not all goals are made the same and some are unrealistic.

Teach starting with broad overarching goals or defining your dreams. Newell said. Then, once dreams and direction are identified, bring those dreams down to specific, attainable, positive and possible goals. Date and time are assigned to each goal so they can literally be checked off a list. Goals should be clearly defined.

A way to do this is by setting SMART Specific Measurable Achievable Relevant Time Based goals.

Make sure that the assigned times are realistic and that you assign goals as steps toward the bigger dream rather than the entire dream being your goal.

An easy way to set SMART goals is a practice called backwards Planning. This is the

practice of visualizing where you want to be in a certain amount of time.

Starting with the dream or end result in mind, plan in reverse until you get to the present and what needs to get done now. Newell said.

Speak your goals out loud daily, and give yourself permission to adjust or rewrite your goals as necessary. Cross off your goals as you achieve them and celebrate milestones.

-Ruth Newell

The system we use is very visual. Newell said. When using the backwards planning method, you not only set goals, you assign a time and date to accomplish the goals and spell out the steps to get there, how it will be achieved and who will be necessary to help you achieve your goals.

This method breaks down your goal so that you know exactly how to achieve it.

My son, Rick, had a dream to achieve the rank of Eagle Scout. Newell said. His goal was to complete his Eagle by the end of May. Rick set the goal as soon as he achieved the rank of Life Scout in October. He gave himself seven months to get it done, which was optimistic and aggressive. According to Newell, Rick was 15 when he earned his Eagle. Utilizing backwards planning, he defined each activity necessary to get there.

Rick is also a student with Intellectual and Developmental Disabilities. A task that may take another scout an hour to accomplish might take Rick an evening.

Rick went on to earn seven Eagle Palms before he aged out at 18 years old.

Utilize others in goal setting. Newell said. Friends, family and others who are significant in your life can offer assistance, support and accountability.

1 Map out your dream self.

Describe who your dream self is, what you are doing, how you are feeling and how you are perceived, and write it all down.

2 Decide when a goal will be reality.

Set a realistic time to achieve the goal, as well as what will signify the achievement of the goal.

3 Make smaller steps to get there.

Set a realistic time to achieve the goal, as well as what will signify the achievement of the goal.

CONGRATULATIONS BIOCHEMISTRY & MOLECULAR BIOLOGY GRADUATES!

The Faculty and Staff of the Department of Biochemistry and Molecular Biology extend their congratulations and best wishes for future success to the class of 2015!

decoding THE GRADUATION WARDROBE

Bachelor's Degrees:

Gown*:

Black: Traditional bachelor's degree gown

Green: University Honors Program Scholar

Gold: Latin Honors gown for graduates with distinction

*designed to be worn closed

Stoles:

Black: Honors Scholar

Cords:

Gold: Honor cord

Master's Degrees:

Gown:

Supplied with fasteners to be worn open
or closed.

Sleeves:

Oblong sleeve: Rear part of oblong shape is
square cut, and the front has an arc cut away.

LIFE AFTER GRADUATION

By Sarah Ross

College Avenue Magazine

Graduating is both liberating and terrifying. For many, we have been in school longer than we can remember, and the feeling of knowing that you never have to go to school again unless you choose to is both amazing and very uncertain.

What is life like after graduation? What is the real world that we've heard so much about like? We reached out to CSU alumna Danika Barbour, a 2012 graduate with a double major in biomedical sciences and Spanish, and asked her how it felt for her to graduate.

It felt different knowing there was a light at the end of the long tunnel, Barbour said. Knowing I wasn't going back to school didn't hit me until

August when I would usually start classes again. There was relief, but I knew I was in for more schooling eventually.

After graduation, Barbour said her main goal was to get into the medical field.

I knew I wanted to be a medical professional, but I didn't know what kind yet, Barbour said. I am currently in an RN [registered nurse] program, getting my Bachelor of Nursing. I had a minor in psychology [at CSU] that led me to applying within the mental health field. I got a job with Bellefaire Jewish Children's Bureau, Monarch School for Autism.

Setting and achieving goals, especially career-related goals, are especially hard in today's society. Good jobs are hard to come by, and only 38 percent of new college graduates who

started working in the past three years negotiated their job offers, according to a survey by NerdWallet, a personal finance website. So how did Barbour achieve her success in not only finding a job, but finding one in her career field?

Truthfully, I drove around to see what facilities were around me, did a Google search, then researched the places I found before applying, Barbour said. It's best to give an application in person. Working full-time was different, having to get up every day and do the same job was rough at first, but once you get used to 40 plus hours and your own routine, you get comfortable. Understanding who you are and what your strengths/weaknesses are will help you move into a position quickly.

Although having a job is a definite perk, there is definitely more to life after graduation than the work force. We asked Barbour about where her journey after graduation had taken her outside of the career world.

The best thing I've done since graduation, non-school related, would be getting married, Barbour said. My husband and I got an apartment once we moved to Ohio. It was comfortable, but we had to learn a new area. It seems to take about a year to get truly comfortable in either a job or housing situation. You think you know a lot after six months, but things really start to evolve at the year mark.

Life in the real world doesn't seem so scary, in fact, the way Barbour makes it seem, it's comfortable and fun. Maybe

the transition won't be so rough after all, right? Just in case it is, we asked Barbour what surprised her about graduation.

When I graduated, I didn't realize how quickly you were required to be the adult you were trying to grow up into, Barbour said. It was interesting having more responsibility with little supervision and expected to perform efficiently. You have to be independent immediately out of the gate.

Graduation is a double-edged sword for many. It is full of freedom and the power to do your own thing, but with that power comes great responsibility, as Uncle Ben has taught us well.

However, as Barbour and our other successful graduates can tell you, no one has it figured out right out of the gate, and it will take some trial and error.

The Department of Psychology Congratulates our Spring 2015 PhD Graduates

College: A journey through self

By Ricki Watkins

College Avenue Magazine

Oftentimes we come to college unsure of who we want to be. But most often, we come not even knowing who we are. And, the decisions we make in the four years we are here help define us.

Can one senior say the person who shuffled boxes into his/her dorm room is the same person who will walk across that podium with diploma in hand?

I know I can.

It's impossible when you are surrounded by new people, new places and new experiences.

In our time here, we get more than just lectures about our field of study. We get a lecture

in life. From the moment you move into the dorms and live in close quarters with a complete stranger to your first final to graduation looms ever closer, you learn about yourself. You learn about relationships and friendships, about how you handle stress, about the demons you carry with you, about what you believe in.

College not only enhances our knowledge of the world, but it also enhances our perception of self. It forces us to grow up, to find our passions, to take responsibility.

And, I could not be more grateful that I had this learning experience at Colorado State. This university is far from

perfect but I admire its commitment to providing students with opportunities to find their place in the world. From a diverse range of clubs to on-campus resources to sports, you are sure to find the people and passion that help you find yourself. I, for one, don't know what I would have done without Student Media in my life. I found a family, a home and a passion here.

To my fellow seniors, I hope you are proud of the person who walks across the stage this weekend. You should be. We have accomplished and learned a lot in our time at CSU and we can take on the world with this knowledge.

Best of luck to you in the future, grads!

BECOME A PAID SPERM DONOR

Must be ages 18 - 35

Must provide complete medical history, including parents & grandparents

Must have some college experience or college degree

Must make a weekly commitment for 6 months to a year

Must apply online (no phone calls)

WHAT YOU NEED TO KNOW ABOUT RECREATIONAL MARIJUANA

As Recreational Marijuana becomes a reality in Larimer County, Choice Organics would like to highlight the rules for marijuana consumption.

- It is illegal to possess any amount of marijuana if you are under the age of 21. It is illegal to provide to or consume marijuana with a minor under the the age of 21.
- Adults 21 and older are allowed to possess one ounce of marijuana at any given time
- It is illegal to consume marijuana in any public place.
- It is illegal to drive under the influence of any drug, including marijuana. Driving under the influence of marijuana (or any drug) will result in stiff legal penaaalties
- Adults may give away up to one ounce to another adult 21 and over, but it is illegal to sell marijuana outside a licensed retail marijuana business.
- Marijuana that is bought legally in Colorado, stays in Colorado. It is illegal to travel outside the state with any marijuana, including infused edibles and topicals.

Dating Post-Graduation

THE GUIDE

By Alex Rager

College Avenue Magazine

You are graduating. It is time to say goodbye to Tinder and Grindr and it's time to stop sending naughty Snapchats and kind of flattering but mostly creepy Yaks about the girl in the library basement.

Now, it's crunch time — that awkward stage between being graduated and starting a family where everyone is looking to latch onto someone else while they are still wrinkle-free.

I think [dating outside of CSU] will be a different atmosphere," said Stefanie Mougey,

a senior psychology major.

"I'm more worried about the limited time I have to meet someone after I graduate."

Luckily, there are plenty of websites, bars, nightclubs and Facebook stalking friends of friends to occupy your time until you find that special someone.

In this Internet-dominated society, you can customize your Ken or Barbie doll. There are dynamic sites like the classic Match.com and eHarmony, but who wants to do that boring stuff?

Get creative with Gluten Free Singles, Black People Meet or Zoosk. You never know, maybe that college crush is lurking somewhere you wouldn't expect; they could be gluten-free and you just never knew.

"I see the dynamic changing from casual flirting and dating

to more deep and meaningful connections and longer-lasting relationships," Mougey said.

Bars and nightclubs always work out for people too. I mean, just look at The Jersey Shore. That is how you find a financially stable and self-assured individual to spend the rest of your life with. Bars are great for women because you get all the nicest guys coming up to you asking to buy you a drink.

"I have hit on people everywhere — bars, parties, class, Tinder, the airport, out in public etc.," said Alexander Coleman, a senior business administration major. "If there is any opportunity, and I've got the balls to do it, I'll do it."

If all else fails, there is always the classic Facebook stalking.

You know Jennifer's friend, Tiffany. Well, she has a brother

whose friend would be perfect for you.

Yes, just spend the next hour and a half stalking him and everything he has ever accomplished so that way the first date is guaranteed to be awkward.

"I am a bit nervous to date after college," Coleman said. "However, I am confident I will meet someone."

All kidding aside, you do not need to worry about dating after college. If you go out into the world or into a graduate program, if you just stay focused and live your life, the person of your dreams is going to come along.

The cliché remains true that good things come to those who wait, and it is when you are least expecting it that love sweeps you off your feet. Give it time.

It's time to leave the NEST BUT FLY back anytime

By James D. Cao

College Avenue Magazine

I love college. Quoth, Asher Roth. Speaking of college, it's almost the end of the year. That means graduation, and seniors flocking from the second nest into the real world. Scary.

Talking to a lot of freshmen, even they, first year they may be, are reluctant and a little sad about leaving beautiful Colorado State and the friends they made in the dorms, even for a couple months.

I cannot imagine the huge life leap of the graduating senior. What is there to miss about CSU?

A lot. The Rec Center. Grand old/new Lory Student Center. The nice people in the plaza exercising their First Amendment rights and yelling to a crowd of gathered students. Tony Frank's beard.

I don't know. I'm super clueless. My excuse: freshman.

The social aspect without a doubt, said Andrew Lee, a senior business major, when asked what he'll miss the most. In college, you have a lot of free time, so you can discover yourself. Don't be so frugal on your money, spend your money on experiences. I wish I spent more time on road trips and classes instead of other stuff.

Definitely not the school or education aspect, that's for sure, said Matt Barrett, a senior business major. Honestly, I'm gonna miss my friends, that's the biggest part. Friends, the mountains especially here, activities, everything friends do.

I miss drinking every day, said Barrett's friend, who wishes to remain anonymous.

Now remember, buddy, the

moment you graduate, that's considered alcoholism. But, I do joke too much.

College isn't just about that. It's the community that makes it great and what those graduating are going to miss.

I think the community, said Kate Simmons, a senior journalism major. You meet people with similar passions and life goals. You don't really get that in the real world. It's harder finding people your age and finding people with similar interests to you.

Urban Dictionary describes it perfectly: College: A magical place where it is rumored that learning takes place.

Ultimately, people come to college to get an education and a degree, but it's the time at the university, as a Ram, as a loving community that those graduating are going to remember and keep in their hearts as they go on to the next stage of their lives.

So, to those graduating, go forth, brave Rams, unto the new green pasture before you, and take with pleasure the sweet milk of life.

And when thou come back as fabled alumni for the great battle known as the Rocky Mountain Showdown, we will welcome you with open arms and a full red Solo cup.

You're going to miss this place, and we are going to miss all you've done at CSU, from freshman year to now.

Because, from what I've seen, the people here have been nothing short of kind and friendly, making Fort Collins a better place. Let's hope that never changes. Rams take care of Rams. Always.

CSU fight song

Fight on you
stalwart Ram Team,
On to the goal!
Tear the (Opponent's)
line asunder,
As down the field we
thunder.
Knights of the green
and gold,
Fight on with all
your might!
Fight on you
stalwart Ram Team,
Fight! Fight! Fight!
