ABSTRACT

Results of the study of primary production on the Osage Site in the 1970 season are summarized in tabular form. These include meteorological data, sampling dates and results of above- and belowground biomass, and litter collection on the grazed and the ungrazed treatment areas.

INTRODUCTION

The Osage Site has been described in Technical Report No. 44. This report makes no attempt to synthesize the data, but will present results of the study in tabular form.

Table 1. List of meteorological equipment^{a/} used for various abiotic components.

Factor	Equipment	Sensor Location
Precipitation	U.S. Weather Bureau Rain Gauge	76 cm above soil surface
Wind	Bendix Corporation Totalizing Anemometer	153 cm above soil surface
Solar Radiation	Belfort Instrument Co. Recording Pyranometer	76 cm above soil surface
Maximum and Minimum Air Temp.	Taylor Max - Min Thermometer	153 cm above soil surface
Continuous Air Temperature	Friez-Bendix Instruments Recording Hygro-thermograph	153 and 31 cm above soil surface
Continuous Air Humidity	Friez-Bendix Instruments Recording Hygro-thermograph	153 and 31 cm above soil surface
Continuous Soil Temperature	Friez-Bendix Instruments Thermograph	10.0 and 1.0 cm below soil surface
Soil Moisture	Gravimetric Technique	2-5.1 cm diameter cores/rep. on each biomass sampling date at depths of 0-15, 15-30, and 30-45 cm.

^{a/} With the exception of the soil moisture which was taken in both treatments, the abiotic factors were measured in the ungrazed plot.

Table 2. Sampling dates and number of clipped and ranked quadrats at each date. There are two replicates in each of the two treatments; ungrazed and moderately grazed.^{a/}

Date of Sample	Number of Quadrats Per Treatment			
	Ungrazed		Grazed	
	Clipped	Ranked	Clipped	Ranked
Dec. 1, 1969	10	0	10	0
April 1, 1970	6	100	10	100
May 1, 1970	6	60	14	100
June 1, 1970	10	60	14	100
June 17, 1970	10	60	14	100
July 1, 1970	10	60	14	100
July 16, 1970	10	50	20	200
August 1, 1970	10	50	20	200
August 17, 1970	10	50	20	200
Sept. 26, 1970	10	50	20	200
Oct. 17, 1970	10	0	20	0
Nov. 14, 1970	10	0	20	0

^{a/} All quadrats were square, 0.5 m × 0.5 m, and were located in a stratified random design. The same number of quadrats were always taken in the two replicates of a given treatment on any one sampling date.

Table 3. Sampling dates and number of quadrats used to measure transfer from the green and standing dead compartments to the litter compartments.^{a/}

Date of Sampling	Number of Screens Sampled
May 1, 1970	36
June 17, 1970	36
August 1, 1970	36
Sept. 26, 1970	36
Nov. 14, 1970	36

^{a/} The litter screens were 15.3 × 15.3 cm square and constructed of 2 mm mesh screen wire. The screens were nailed directly to the soil surface without disturbing the litter layer.

Table 4. Sampling dates and number of litter bags used to measure litter decomposition rates.^{a/}

Date of Sampling	Number of Bags Collected				
	<i>Andropogon</i> <i>scoparius</i>	<i>Andropogon</i> <i>gerardii</i>	<i>Panicum</i> <i>virgatum</i>	<i>Sorghastrum</i> <i>nutans</i>	All Species From Mixed Standing Dead
Sept. 30, 1970	1	2	1	1	4
Nov. 14, 1970	1	1	1	1	5

^{a/} The litter bags were constructed of 2 mm mesh screen wire and nailed to the soil surface. Litter was from the standing dead category and collected on the Osage Site. Each bag was 15.3 x 15.3 cm square and the litter was sewn inside. Initial bags were set out May 26, 1970.

^{a/} Where possible, soil cores were taken within the clipped quadrat at each sampling date. The probe was 5.0 cm in diameter and two cores were taken from each quadrat. The hydraulic corer was furnished by the Soil Conservation Service, courtesy of Mr. Bob Boulier, Pawhuska, Oklahoma.

Table 6. Sampling dates and number of quadrats collected for litter data.^{a/}

Sampling Date	Number of Quadrats Per Treatment	
	Ungrazed	Grazed
April 1, 1970	10	10
May 1, 1970	6	10
June 1, 1970	6	14

APPENDIX I

FIELD DATA

Aboveground Biomass Data

Aboveground Biomass Data collected in 1970 at the Osage Site is Grass-land Biome Data Set A2U0009. Data were collected on Form NREL-01. A sample data form and a sample of the field data follow.
