SUMMER
2016

Artist Statement

Bayley Warren

My art explores the idea of memory and how we reflect on the past; I work to find new ways to touch on memory using html, video and animation. I am interested in engaging the viewer and creating an experience between them and my work. To fully engage the observer I focus on bold colors while still keeping things simplistic with clean lines.

Ever since I was a child I have been a lover of movies, from those that appear on the big screen to home videos stuck on VHS. I've been pulled into the YouTube world and have become inspired by many people such as Remi Cruz and Devin Graham. I work towards documenting my life to have memories to look back on. I tend to want to re-live experiences, and experiment with multiple mediums.

My work explores the intimate autobiographical side of my life and in the future I see myself continuing to find new artistic ways to relive my past.

Biography

Contact

inspiration:http://davidrodriguez.cat/

the bar at the top would have a logo i need to design for myself and then the buttons would just jump you further down the page rather than to different pages

idealy i would want each button image to be clickable and once you click it it would become a light box and you could cycle through other images like it.

the services section would show what i can do, graphic design ui/ui, video editing, painting, etc

the about me would be the basics where im from what i like etc

and the contact section would be able to send an email from my page.

● = images/ my work

○ = symbols i need to make

● = java script i need to figure out for emailing
